PUBLISHER'S NOTE TO THE FIRST EDITION

The Māndūkya Upanisad and Kārikā, with the English translation of the commentary of Śrī Sańkarācārya, is the third in the series to be published by us, after the Aitareya Upanisad and the Mundaka Upanisad. This is to be followed very soon by the Prašna Upanisad. These four Upanisads together constitute Volume Two of Eight Upanisads by the same author.

In the translation of the commentary, the words quoted from the text by Sańkarācārya are given in italics. These are followed by commas and the English equivalents. Informative explanatory footnotes have been added wherever necessary.

This Upanisad derives its name after its seer Mandūka, and belongs to the Atharva-Veda. Though it is the shortest of the principal Upanisads, having or ly twelve passages, it presents the quintessence of the entire Upanisadic teaching. It analyses the whole gamut of human consciousness, in the three states of waking (jāgrat), dream (svapna), and dreamless sleep (susupti). It asserts unequivocally that the ultimate Reality is non-dual (advaita) by adopting a unique method of investigating the three states of human consciousness, and proclaims the mahāvākya. (sacred dictum): ayamātmā brahma (this self is Brahman).

This Upanisad provides a symbol for the meditation on, and the realization of, the supreme Reality; and that symbol is the mono-syllable AUM, the word of all words, comprising three sounds A, U, M, whose philosophical implications are elaborated in the text. The language of this Upanisad is compact and concise. Hence the need of a $K\bar{a}rik\bar{a}$ (expository treatise) by no less a person than Srī Gaudapāda, the *paramaguru* (spiritual teacher's teacher) of Srī Šankarācārya. The Acārya considered it necessary to write a *bhāsya* (commentary) on the Kārikā also, because of its lucid exposition of the text, apart from a commentary on the Upanisad proper. It can be said that the Kārikā is one of the earliest attempts to systematize the teachings of the Upanisads on rational lines. As such, it is looked upon as an authentic treatise on the Advaita Vedānta.

We earnestly hope that, with the publication of the present separate edition of this very important Upanişad, it will reach a wider circle of readers and arouse in them a genuine interest in the subject matter and help them to have correct idea of the Advaita Vedānta philosophy, which presents Truth without any consideration for creed, sect, colour, race, sex, or belief.

ॐ शान्तिः शान्तिः शान्तिः ॥

Om! O gods, may we hear auspicious words with the ears; while engaged in sacrifices, may we see auspicious things with the eyes; while praising the gods with steady limbs, may we enjoy a life that is beneficial to the gods.

May Indra of ancient fame be auspicious to us; may the supremely rich (or all-knowing) Pūşā (god of the earth) be propitious to us; may Garuda, the destroyer of evil, be well disposed towards us; may Brhaspati ensure our welfare.

Om! Peace! Peace! Peace!

MĀŅŪŪKYA UPANIŞAD CHAPTER 1

AGAMA-PRAKARANA (ON THE VEDIC TEXT)

प्रज्ञानांशुप्रतानैः स्थिरचरनिकरव्यापिमिर्व्याप्य लोकान् भुक्त्वा भोगान्स्थविष्ठान्पुनरपि धिषणोद्भासितान्कामजन्यान् ॥ पीत्वा सर्वान्विशेषान्स्वपिति मधुरमुङ्मायया भोजयन्नो मायासंख्यातुरीयं परममृतमजं ब्रह्म यत्तन्नतोऽस्मि ॥१॥ यो विश्वात्मा विधिजविषयान्प्राश्य मोगान्स्थविष्ठान् पश्चाच्चान्यान्स्वमतिविभवाञ्जोतिषा स्वेन सूक्ष्मान् ॥ सर्वानेतान्पुनरपि शनैः स्वात्मनि स्थापयित्वा हित्वा सर्वान्विशेषान्विगतगुणगणः पात्वसौ नस्तुरीयः ॥२॥

Commentator's invocation: (1) I bow to that Brahman which after having enjoyed¹ (during the waking state) the gross objects by pervading all the human objectives through a diffusion of Its rays² of unchanging Consciousness that embraces all that moves or does not move; which again after having drunk³ (during the dream state) all the variety of objects, produced by desire (as well as action and ignorance) and lighted up by the intellect,⁴ sleeps while enjoying bliss and

I Enjoyment consisting in witnessing the various mental moods of happiness, sorrow, etc.

² The individual souls that are but reflections of Brahman on the intellect.

3 I.e. having merged all in the unrealized Self.

⁴ Existing only subjectively in the form of mental moods or impressions of past experience.

making us enjoy through Māyā; and which is counted as the Fourth¹ from the point of view of Māyā, and is supreme, immortal, and birthless.

(2) May that Fourth one protect us which, after having identified Itself with the universe,² enjoys (during the cosmic waking state) the gross objects created by virtue (and vice); which again (during the cosmic dream state³) experiences through Its own light the subtle objects of enjoyment that are called up by Its own intellect; which, further (in sound sleep or cosmic dissolution), withdraws promptly all these into Itself; and which lastly becomes free from all attributes by discarding every distinction and difference.

Introduction: 'The letter Om is all this. Of this a clear exposition (follows)' (Mā. 1). These four Chapters (of the Kārikā) that sum up the quintessence of the Vedāntic ideas are commenced with the text, 'The letter Omis all this,' etc. Accordingly, the connection, subject matter, and utility (of this treatise) need not be separately dealt with. The connection, subject matter, and utility that pertain to Vedānta itself should fit in here also.⁴ Still they ought to be briefly stated by one who

¹ Not possessed of the three states of waking, dream, and sleep. ² The cosmic gross body of Virāt.

³ As identified with the cosmic subtle body of Hiranyagarbha. ⁴ The present book comprising the Upanişadic text and the Kārikā of Gaudapāda forms a sort of a treatise on the Vedānta; and hence the four anubandhas or interconnecting elements — viz adhikāri, the person competent for study, sambandha, connection, e.g. that between the book and the subject matter, visaya, subject matter of the book, viz unity of the Self and Brahman, and prayojana, utility, viz liberation — are the same in both cases.

wants to explain a treatise. In this connection it is to be noted that by the very fact that a scripture (whether it be Vedanta or a treatise on it) reveals the spiritual disciplines conducive to the goal, it becomes endowed with a subject matter; and from this fact it becomes indirectly possessed of a distinct relationship, a subject matter, and utility.1 What again is the objective in view? That is being explained: Just as the normal state of a man, afflicted by disease, consists in his getting cured of the disease, similarly the normalcy of the Self, stricken with identification with misery, is regained through the cessation of the phenomenal universe of duality. The end in view is the realization of non-duality. Since the phenomenal world of duality is a creation of ignorance, it can be eradicated through knowledge; and hence this book is begun in order to reveal the knowledge of Brahman. This fact is established by such Vedic texts as: 'Because when there is duality, as it were, then one smells something, one sees something,' and so on (Br. II. iv. 14); 'When there is something else, as it were, then one can see something, one can know something' (Br. IV. iii. 31); 'But when to the knower of Brahman everything has become the Self, then what should one see and through

¹ We are concerned primarily with knowledge and its result, and not with books. The result aimed at is liberation which follows from the realization of the non-difference of the Self and Brahman, and not from mere scriptures. Still the scriptures express that nondifference, and knowledge does not dawn without the help of scriptural deliberation. Thus, as the indirect means to knowledge, the scriptures become connected with the subject matter. what? What should one know and through what?' (Br. II. iv. 14).

That being so, the first chapter, devoted to a determination of the meaning of Om, is based on (Vedic) traditional knowledge and is an aid to the ascertainment of the reality of the Self. The second chapter is concerned with rationally proving the unreality of that phenomenal world of duality, on the cessation of which is attained non-duality, just as the reality of the rope is known on the elimination of the illusion of a snake etc. imagined on it. The third chapter is there to establish rationally the truth of non-duality, lest it, too, should be negated by a similar process of argument. The fourth chapter seeks to refute through their own arguments all the un-Vedic points of view which are antagonistic to the ascertainment of the truth of non-duality and which remain involved in this unreal duality by the very fact of their mutual antagonism.

How again does the ascertainment of the meaning of Om become an aid to the realization of the reality of the Self? The answer is: From such Vedic texts as, '(That goal which all the Vedas with one voice propound, which all the austerities speak of, and wishing for which people practise Brahmacarya) — it is this, viz Om' (Ka. I. ii. 15), 'This medium is the best' (Ka. I. ii. 17), 'O Satyakāma, this (Om) is verily Brahman, (superior and inferior)' (Pr. V. 2), 'Meditate on the Self as Om' (Mai. VI. 3), 'Om is Brahman' (Tai. I. viii. 1), 'Om indeed is all these' (Ch. II. xxiii. 3), it follows that just as the non-dual Self, notwithstanding the fact that It is the supreme Reality, can still be the substratum of all such illusions as the vital force, like the rope etc. becoming the substrata of the illusory snake etc., similarly it is but Om that appears as all the ramifications of speech which have for their contents such illusory manifestations of the Self as the vital force etc. And Om is essentially the same as the Self, since it denotes the latter. And all the illusory manifestations of the Self, such as the vital force etc., that are denoted by the modifications of Om, do not exist apart from their names, in accordance with the Vedic texts: 'All transformation has speech as its basis, and it is name only' (Ch. VI. i. 4), 'All this phenomenal creation of that Brahman is strung together by the thread of speech and by the strands of names', 'All these are but dependent on names'1, and so on. Hence the Upanisad says, 'Om iti etat akşaram idam samam — the letter Om is all this."

ओमित्येतदक्षरमिदः सर्वं तस्योपव्याख्यानं भूतं भवद्भविष्य-दिति सर्वमोङ्कार एव। यच्चान्यत् त्रिकालातीतं तवप्योङ्कार एव॥१॥

1. This letter that is Om is all this. Of this a clear exposition (is started with): All that is past, present, or future is verily Om. And whatever is beyond the three periods of time is also verily Om.

As all these objects that are indicated by names are non-different from the names, and as names are non-different from Om, so Om is verily all this. And

¹ Names make empirical dealings possible for objects.

as the supreme Brahman is known through the relationship subsisting between name and its object, It, too, is but Om. Tasya, of that, of this letter, viz Om, that is the same as the supreme as well as the inferior Brahman; upavyākhyānam, a clear exposition, showing its proximity to Brahman by virtue of its being a means for the attainment of Brahman; the expression, 'is to be understood as started with', has to be supplied after 'clear exposition' to complete the sentence. Bhutam, the past; bhavat, the present; bhavisyat, the future; iti, these, that is to say, whatever is circumscribed by the three periods of time; (sarvam) onkārah eva, (all this) is but Om, in accordance with the reasons already advanced. Ca yat trikālātītam, and whatever else there is that is beyond the three periods of time, that is inferable from its effects but is not circumscribed by time, e.g. the Unmanifested and the rest; lat api, that, too; is onkārah eva, verily Om.

Though a word and the thing signified are the same, still the presentation in the text, 'This letter that is Om is all this' etc. was made by giving greater prominence to the word. The very same thing that was presented through an emphasis on the word is being indicated over again with a stress on the thing signified, so that the unity of the name and the nameable may be comprehended. For otherwise, the nameable having been grasped as dependent on the name, the doubt may crop up that the identity of the nameable with the name is to be taken in a secondary sense. And the necessity of understanding their identity arises from the fact that (once this identity is established,) one can by a single effort eliminate both the name and the nameable to realize Brahman that is different from both. And this is what the Upanisad will say in, 'The quarters are the letters of *Om*, and the letters are the quarters' (8). The Upanisad adverts to the topic in, 'All this is surely Brahman' etc.

सर्वः होतद् ब्रह्मायमात्मा ब्रह्म सोऽयमात्मा चतुष्पात् ॥२॥

2. All this is surely Brahman. This Self is Brahman. The Self, such as It is, is possessed of four quarters.

Sarvam etat, all this, all this that was spoken of as but Om; is brahma, Brahman. And that Brahman that was indirectly spoken of is being directly and specifically pointed out as, 'Ayam ātmā brahma, this Self is Brahman.' In the text, 'This Self is Brahman', the very Self that will be presented as divided into four parts is being pointed out as one's innermost Self by the word 'ayam, this', (accompanied) with a gesture of hand.¹ Sah ayam ātmā, that Self that is such, that is signified by Om and exists as the higher and lower Brahman; is caluspāt, possessed of four quarters, like a (kārṣāpaṇa) coin, but not like a cow.² As the Fourth (Turīya) is realized by successively merging the earlier three,

¹ By placing the hand on the heart.

² The word *pāda* may mean either foot or quarter. The second meaning applies here. A kārsāpaņa is divisible into sixteen smaller units. Four of these form a quarter. The smaller units lose their individuality in the bigger ones, as it were. So Visva merges in Taijasa, Taijasa in Prājīna, and Prājīna in Turīya. The word 'quarter' is not used in any physical sense. starting from Visva, the word $p\bar{a}da$ (in the cases of Visva, Taijasa and Prājña) is derived in the instrumental sense of that by which something is attained, whereas in the case of the Turīya the word $p\bar{a}da$ is derived in the objective sense of that which is achieved.

The Upanisad shows how the Self can be possessed of four quarters:

जागरितस्थानो बहिष्प्रज्ञः सप्ताङ्ग एकोर्नीवंशतिमुखः स्थूल-भुग्वैश्वानरः प्रथमः पादः ॥३॥

3. The first quarter is Vaisvanara whose sphere (of action) is the waking state, whose consciousness relates to things external, who is possessed of seven limbs and mineteen mouths, and who enjoys gross things.

He (Vaisvānara) who has the jāgarita, waking state, as His sthāna, sphere of activity, is jāgaritasthānah. He who has His prajňā, awareness, bahih, outside, directed to things other than Himself, is bahisprajňah. The idea is that Consciousness appears as though related to outer objects, owing to ignorance. Similarly, He has seven limbs. For completing the imagery of Agnihotra sacrifice contained in, 'Heaven is verily the head of that Vaišvānara-Self who is such; the sun is the eye, air is the vital force, space is the middle part, water is the bladder, and the earth indeed is the two feet' (Ch. V. xviii. 2), the Āhavanīya fire has been imagined as His mouth (ibid). He that is possessed of these seven limbs is saptāngah. Similarly, He is ekonavinisatimukhah, possessed of nineteen mouths—the (five) senses of perception and the (five) organs of action make up ten, the vital forces — Prāna and the rest — make up five, and (there are) mind (the thinking faculty), intellect, ego, and mind-stuff. These are mouths, since they are comparable to mouths; that is to say, they are the gates of experiences. Since through these aforesaid entrances Vaiśvānara, thus constituted, enjoys gross objects—viz sound and the rest—therefore He is sthūlabhuk, an enjoyer of the gross. He is called vaiśvānarah because He leads in diverse ways all (viśva) beings (nara) (to their enjoyment). Or Vaišvānara is the same as Viśvānara; He is called Vaiśvānara (all beings) since He encompasses all beings by virtue of His being non-different (in reality) from the Self (i.e. Virāț) comprising all the gross bodies. He is the prathamah pādah, the first quarter.¹ He gets this precedence, because the knowledge of the succeeding quarters is contingent on His knowledge.

Objection: The topic under discussion being the possession of four quarters by the indwelling Self referred to in the text, 'This Self is Brahman' etc., how is it that heaven and the rest are presented as the head etc.?

Answer: That is nothing incongruous, inasmuch as the intention is to show that the entire phenomenal universe and the world of gods, in the form of this (gross cosmic) Self, contribute to the constitution of the four parts.² If the presentation is made in this way, non-

¹ The first step to the knowledge of Brahman.

² The gross cosmic world, as constituting Virāt, is the first quarter. The subtle cosmic world, as constituting Hiraņyagarbha, duality stands established on the removal of the entire phenomenal world, and the Self existing in all beings is realized as one, and all beings are seen as existing in the Self.¹ And thus alone will stand affirmed the meaning of the Vedic text: He who sees all beings in the Self Itself, and the Self in all beings . . .' (Is. 6). Otherwise, the indwelling Self, as circumscribed by one's own body, will alone be perceived, as It is by the Sāmkhyas and others; and in that case the specific statement made by the Upanisads that It is non-dual (Mā. I. 7; Ch. VI. ii. 1) will remain unestablished for there will be no difference from the philosophies of the Sāmkhyas and others. But as a matter of fact, it is desirable to find all the Upanisads propounding the unity of all the selves. Therefore it is but reasonable that, having in view the identity of this embodied Self (as Visva) in the individual physical context with the Self as Virāt (i.e. Vaisvānara) in the divine context, the former should be mentioned as possessed of seven limbs comprising such physical constituents as heaven etc. And this is confirmed by the logical grounds (for inferring unity) that is implied in, 'Your head would

¹ C:ि सर्वभूतस्थमात्मानं सर्वभूतानि चात्मनि । संपन्न्यन्नात्मयाजी वै स्वाराज्यमधिगच्छति ॥ (M. XII. 91)

is the second quarter. The cosmic world in its causal state (of ignorance) as constituting the Unmanifested, is the third quarter. That, again, when it is freed from all states of cause and effect and exists merely as the substratum of all, as Existence-Knowledge-Bliss, is the fourth quarter.

have dropped off if you had not come to me'1 (Ch. V. xii. 2).

This identity (of Visva) with Virāț is suggestive of the unity (of Taijasa and Prājña) with Hiraŋyagarbha and the Unmanifested (respectively) as well. And this has been stated in the *Madhu-brāhmaņa* (of the Brhadāraŋyaka Upanişad): '(The same with) the shining immortal being who is in this earth, and the (shining immortal) corporeal being (in the body). (These four are but this Self)' etc. (II. v. 1). As for the unity of the Self in sleep (Prājna) and the Unmanifested, it is a patent fact because of the absence of distinctions.² Such being the case, it will become proved that nonduality follows on the dissipation of all duality.

स्वप्नस्थानोऽन्तःप्रज्ञः सप्ताङ्ग एकोर्नीवंशतिमुखः प्रविविक्त-मुक्तैजसो द्वितीयः पादः ॥४॥

¹ Six Brāhmaņas, who approached Aśvapati, used to worship particular limbs of Vaiśvānara as Vaiśvānara Himself. Aśvapati pointed out their inistakes and said that unless they had come to him for rectification, their head, eye, life, etc. would have been destroyed. But if the individual and Virāţ are not the same, it is unreasonable to say, for instance, that from the mistaken worship of heaven (that is only the head of Virāţ) as Virāţ Himself, one's own head should drop off. The statement becomes reasonable only if the individual and Virāţ are the same, so that the head of the one can be the head of the other.

² The individual sleeps by withdrawing all distinctions into himself, and in dissolution the Unmanifested, too, withdraws everything into itself. The 'Unmanifested' means here the 'inner Director' (Mā. 6) conditioned by Māyā, ruling from inside all. 4. Taijasa is the second quarter, whose sphere (of activity) is the dream state, whose consciousness is internal, who is possessed of seven limbs and nineteen mouths, and who enjoys subtle objects.

Taijasa that has the dream state as his sphere of activity is svapnasthanah. The consciousness of the waking state, though it is only a state of mental vibration, is associated with many means, and it appears to be engrossed in external objects, and thus it leaves in the mind the corresponding impressions. Under the impulsion of ignorance, desire, and (past) action, that mind, thus possessed of the impressions like a piece of painted canvas, makes its appearance (in the dream state) just as in the waking state, but without any external means. In line with this is the statement, '(When he dreams), he takes away a little of (the impressions of) this all-embracing world (the waking state)' (Br. IV. iii. 9). Similarly, in the Upanisad of the Atharva-Veda, after introducing (the subject) with '(All the senses) become one in the highest deity, the mind', it is said, 'In this dream state, this deity (the mind) experiences greatness' (Pr. IV. 5). The mind is antah, internal in relation to the senses. And he whose prajñā, awareness in dream, takes the forms of the impressions in that (antah, internal) mind, is antahprajñah, aware of internal objects. He is called Taijasa (luminous), since he becomes the witness of the (modes of) cognition that is bereft of objects and appears only as a luminous thing. As Visva is dependent on objects, he experiences the (modes of) gross cognition, whereas the awareness that is experienced here consists of mere

Mā. 5]

impressions; and hence the enjoyment is subtle. The rest is common (with the earlier paragraph). Taijasa is the second quarter.

यत्र सुप्तो न कञ्चन कामं कामयते न कञ्चन स्वप्नं पञ्यति तत् सुषुप्तम् । सुषुप्तस्थान एकीभूतः प्रज्ञानघऩ एवा-नन्दमयो ह्यानन्दभुक् चेतोमुखः प्राज्ञस्तृतीयः पादः ।।५।।

5. That state is deep sleep where the sleeper does not desire any enjoyable thing and does not see any dream. The third quarter is Prājňa who has deep sleep as his sphere, in whom everything becomes undifferentiated, who is a mass of mere consciousness, who abounds in bliss, who is surely an enjoyer of bliss, and who is the doorway to the experience (of the dream and waking states).

Since sleep, consisting in the unawareness of Reality, is a common feature of the two states (of waking and dream) where there are the presence and absence (respectively, of perceptible gross objects), therefore the adverbial clause, 'Where the sleeper' etc.,¹ is used in order to keep in view the state of deep sleep. Or since sleep, consisting in the unawareness of Reality, is equally present in all the three states, deep sleep is being distinguished (by that clause) from the earlier

¹ That is to say, the portion 'does not desire any enjoyable thing' etc. occurring in the clause, 'Where the sleeper' etc.; for the portion 'does not' etc. distinguishes deep sleep from the other two states which have the common feature of unawareness.

two states.1 Yatra, in which place, or at which time; suptah, the sleeping man; na pasyati, does not see; kancana svapnam, any dream; na kamayate, does not desire; kañcana kāmam, any enjoyable thing-for in deep sleep there does not exist, as in the two earlier states, either dream, consisting in the perception of things otherwise than what they are, or any desire? -this is tat susuptam, that state of deep sleep. He who · has got this state of deep sleep as his sphere is susuptasthanah. He is said to be ekibhutah, undifferentiated, since the whole host of duality, that are diversified as the two states (of waking and dream) and are but modifications of the mind, become non-discernible (in that state) without losing their aforesaid characteristics, just as the day together with the phenomenal world becomes non-discernible under the cover of nocturnal darkness. As such, conscious experiences, that are but vibrations of the mind in the waking and dream states, become solidified, as it were. This state is called prajnānaghanah, a mass of consciousness, since it is characterized by the absence of discrimination. It is a mass of mere consciousness like everything ap-

¹ Since by the use of the portion, 'does not see any dream', that is to say, 'does not have any false perception of Reality', the other two states of dream and waking can be eliminated, the addition of the portion, 'does not desire any enjoyable thing', may seem to be redundant if we follow the first interpretation. To obviate this difficulty the second explanation is introduced. Non-perception of Reality being a common factor of the three states, deep sleep can be distinguished by the absence of desire.

² Thus either of the adverbial portions—viz absence of falseperception, and freedom from desire — can be used for excluding the earlier two states.

pearing as a mass by becoming indistinguishable under nocturnal darkness. From the use of the word eva, merely, it follows that there is nothing of a separate class other than consciousness. And he is anandamayah, full of joy, his abundance of joy being caused by the absence of the misery involved in the effort of the mind vibrating as the objects and their experiencer; but he is not Bliss itself, since the joy is not absolute. Just as in common parlance, one remaining free from effort is said to be happy or anandabhuk, an experiencer of joy, so this one, too, is called anandabhuk, for by him is enjoyed this state that consists in extreme freedom from effort, in accordance with the Vedic text, 'this is its supreme bliss' (Br. IV. iii. 32). He is cetomukhah, since he is the doorway to the consciousness of the experiences in the dream and waking states. Or he is called cetomukhah, because consciousness, appearing as empirical experience, is his doorway or entrance leading to the states of dream and waking. He is called prājňah, Prājňa, conscious par excellence, since in him alone is there the knowledge of the past and the future and of all things. Even though lying in deep sleep he is called Prajña (conscious) because of his having been so earlier (in the two former states of dream and waking); or he is called conscious, since he alone is possessed of the peculiar characteristics of mere (undiversified) consciousness, whereas the other two have diversified knowledge as well. This Praiña, as described, is the third quarter.

एष सर्वेञ्वर एष सर्वज्ञ एषोऽन्तर्याम्येष योनिः सर्वस्य प्रभवाप्ययौ हि भूतानाम् ॥६॥

6. This one is the Lord of all; this one is Omniscient; this one is the inner Director (of all); this one is the Source of all; this one is verily the place of origin and dissolution of all beings.

Esah, this one (this Prājna), when in his natural state; is surely sarvesvarah, the Lord of all, of all diversity inclusive of the heavenly world; and contrary to what others believe in, He (the Lord of all) is not something intrinsically different from this one (that is Prājna), as is borne out by the Vedic text, 'O goodlooking one, (the individual soul conditioned by) the mind is tethered to (that is to say, has for its goal) the Vital Force (which is Brahman)' (Ch. VI. viii. 2). This one, again, in his (state of) immanence in all diversity, is the knower of all; hence esah sarvamah, this one is Omniscient. Esah, this one, is; antaryāmī, the inner Controller; this one, indeed, becomes also the Director of all beings by entering inside (antar). For the same reason¹ he gives birth to the universe together with its diversities, as described before; and hence esah yonih, this one is the Source; sarvasya, of all. And since this is so, therefore this very one, is hi, certainly; prabhava-apyayau, the place of origin and dissolution; bhūtānām, of all beings.

GAUŅAPĀDA'S KĀRIKĀ

अवैतस्मिन् यथोक्तेऽर्थ एते क्लोका भवन्ति---

¹ Since Prājňa is the Lord, Omniscient, and inner Director (in his identity with Brahman).

Pertaining to this aforesaid idea, here occur these verses:

Atra, with regard to the subject matter dealt with; ete ślokāh bhavanti, here occur these verses:

बहिष्प्रज्ञो विर्मुावक्ष्वो ह्यन्तःप्रज्ञस्तु तैजसः । घनप्रज्ञस्तया प्राज्ञ एक एव त्रिधा स्मृतः ॥१॥

1. Visva experiences the external things and is allpervading; but Taijasa experiences the internal things; similarly, Prājňa is a mass of consciousness. It is but the same entity that is thought of in three ways.

The purport of the verse is this: The transcendence of the three states by the Self, Its unity, purity, and unrelatedness (to anything) are proved by the fact of Its existence in the three states in succession and of Its being interlinked by memory as 'I'. This is borne out by the illustration of the great fish and others in the Vedic texts.¹

दक्षिणाक्षिमुखे विक्वो मनस्यन्तस्तु तैजसः । आकाज्ञे च हृदि प्राज्ञस्त्रिघा देहे व्यवस्थितः ॥२॥

2. Visva is met with in the right eye which is his

¹ 'As a great fish swims alternately to both the banks (of a river), eastern and western, so does this infinite being move to both these states — the dream and waking states' (Br. IV. iii. 18). 'As a hawk or a falcon flying in the sky becomes tired, and stretching its wings is bound for its nest, so does this infinite being run for this state, where falling asleep he craves no desires and sees no dreams' (Br. VI. iii. 19).

I. 2]

place of experience. But Taijasa is inside the mind. Prājňa is in the space within the heart. In three ways he exists in the body.

This verse aims at discovering how all the three, starting with Misva, are experienced in the waking state itself. Visva, the witness of gross objects, is primarily experienced¹ in the daksina-aksi, right eye, that is his mukha, mouth (or place of experience); and this is in accordance with the Vedic text, 'This being who is in the right eye is named Indha' (Br. IV. ii. 2). He who is Indha or Vaisvānara, possessed of effulgence the Virāt Self (identifying Itself with the cosmic gross body) that is within the sun—and he who is the (individual) Self (i.e. Visva) in the (right) eye are identical.

Objection: Hiranyagarbha is different, and different also (is the soul that) is the knower of the body and senses, that exists in the right eye as the controller of the eyes, that is the cognizer, and that is the master of the body.

Answer: Not so, for in reality no difference is admitted, in accordance with the Vedic text, 'One effulgent being hidden in all creatures' (Sv. VI. 11), and the Smrti texts, 'O scion of the Bharata dynasty, know me, again, as the knower of the bodies and senses, in all the bodies' (G. XIII, 2), 'Indivisible, and yet existing in all beings, as though divided' (G. XIII. 16).²

¹ By the adepts in meditation.

² Virāt is essentially identical with Hiraņyagarbha, and so is the Prājūa with them both.

Though Viśva exists equally in all the organs, he is specially referred to as existing in the right eye, for in the right eye is noticed the clarity of his (Visva's) perception. The soul, with its abode in the right eye, perceives some form; and then closing the eyes and recollecting that very form sees it manifested, manasi antah, inside the mind, in the form of impressions as in a dream.¹ As it is the case here, so is it in dream. Therefore, though Taijasa is within the mind, he is really the same as Visva. On the cessation of the activity called memory, Prājňa, sitting ākāse ca hydi, in the space within the heart, becomes free from the diversity (of objects and their perceiving subject) and continues to be a mere mass of consciousness, for then there is no functioning of the mind.² Perception and recollection are merely vibrations of the mind; in the absence of these, there is mere existence in an unmanifested state, in the heart, in identification with the vital force, as is said in the Vedic text, 'It is the vital force indeed that engulfs all these' (Ch. IV. iii. 3). Taijasa is the same as Hiranyagarbha because of existing in the mind,³ as is declared by the Vedic texts:

¹ This is how Taijasa is met with in the waking state. And Visva and Taijasa are the same; for the same entity that sees as Visva, recollects as Taijasa.

² This is how Prājīna is met with in the waking state. When the mind ceases to act, the same entity assumes the characteristics of Prājīna.

³ Taijasa is conditioned by the individual mind, and Hiranyagarbha by the cosmic mind. But the individual and cosmic minds are the same; and so Taijasa and Hiranyagarbha, though conditioned by them, must be the same. '(Being attached, he, together with the work, attains that result to which his) subtle body or mind (is attached)'¹ (Br. IV. iv. 6), 'This Puruşa identified with the mind,² (and resplendent, is realized within the heart)' (Br. V. vi. 1), and so on.

Objection: The vital force is a manifested (i.e. perceptible) reality in deep sleep and the organs merge into it.³ How can the vital force be unmanifested?

Answer: That is no defect; for an undifferentiated thing is characterized by absence of any distinction of time and space. Among those who think themselves to be intimately connected with the individualized vital force,⁴ although the vital force appears to be differentiated so long as (individual) identification with Prāņa persists still, since the self-identification with any speciality resulting from the delimitation of the body is absent in the vital force during deep sleep,

¹ Hiraŋyagarbha, as possessed of the power to act, is the soul within the subtle body (*linga*); and *linga* is equated with mind in the Vedic text. Therefore Taijasa and Hiraŋyagarbha are the same.

² Hiraŋyagarbha is but a special manifestation of the Puruşa identified with the mind. And Taijasa's chief adjunct is the mind. Therefore they are the same.

³ People sitting by a sleeping man clearly perceive the activities of the vital force (Prāṇa). And an additional argument proving that Prāṇa is a manifested entity is provided by the fact that the organs become identified with it in sleep. 'Unmanifested' means 'devoid of the limitations of time, space, and things'. Prāṇa is not so in deep sleep.

4 They may think, 'This is my Prana', 'That is his', and so on.

the vital force is then surely undifferentiated.¹ Just as in the case of people identifying themselves with individualized vital force, the vital force becomes unmanifested after death, similar, too, is the unmanifestedness in the state of absence of distinctions (in deep sleep) in the case of those who identify themselves with the vital force, and similar also is its potentiality to produce effects. And the witness in the state of unmanifestedness and deep sleep is the same (Consciousness).² Moreover, since the individuals who identify themselves with limitations, or witness those states, appear as identical with the Unmanifested, the foregoing attributes, 'in whom everything becomes undifferentiated', 'who is a mass of consciousness', etc., become appropriate with regard to him³ (i.e. Prajna in deep sleep, identifying himself with Prana). And there is also the reason adduced earlier⁴.

Objection: Why should the Unmanifested be called Prana (Vital Force)?

Answer: Because of the Vedic text, 'O good-looking one, (the individual soul conditioned by) the mind

¹ Though to others it may appear to be manifested, to the sleeping man it is unmanifested, because for him the Präna is then unassociated with any particular time or space.

² Consciousness underlines the two entities conditioned by the unmanifested states on the divine and human planes.

³ Not only are the sleeper and the Unmanifested one from the standpoint of absence of distinction, but they are also one even when conditioned by limiting adjuncts.

⁴ The unity of the entity manifested on the divine and human planes.

is surely tethered to (that is to say, has for its goal) the Prāna' (Ch. VI. viii. 2).

Objection: In that text the word Prāņa means Brahman that was introduced as Existence in the sentence, 'O good-looking one, in the beginning this was Existence alone' (Ch. VI. ii. 1).

Answer: That is no valid objection, for Existence was assumed there to be the seed (of creation). Though in that sentence the Existence-Brahman is denoted by the word Prana, still that Existence(-Brahman) is called Prāna as well as Existence without ruling out Its being the source of the emergence of individual beings. Had the seedless (non-causal) state of Brahman been meant, the text would have declared, 'Not this, not this' (Br. IV. iv. 22; IV. v. 15), 'From which speech turns back' (Tai. II. 9), 'That (Brahman) is surely different from the known, and, again, It is above the unknown' (Ke. I. 4), and so on, as it is also stated by the Smrti, 'It is called neither existence nor nonexistence' (G. XIII. 12). If Brahman in Its seedless (non-causal) state be meant there, then the individuals that merge in It in deep sleep and dissolution cannot reasonably re-emerge, and¹ there will be the possibility of the freed souls returning to take birth again, for in either case, the absence of cause is a common factor. Besides, in the absence of any seed (of the worldly state) to be burnt by the knowledge (of Brahman), knowledge itself becomes useless. Hence Exist-

¹ If anybody can re-emerge from sleep or dissolution, conceived of as nothing but identity with the pure Brahman, then...

ence is referred to as Prana (in the Chandogya Upanisad), and in all the Upanisads It is spoken of as the cause in all the Upanisads by assuming It (for the time being) to be the seed of others. And it is because of this that It is referred to — by refuting Its causal state — in such Vedic texts as, 'Superior to the (other) superior imperishable (Māyā) (Mu. II. i. 2), 'From which speech turns back' (Tai. II. 9), 'Not this, not this' (Br. IV. iv. 22), etc. That supremely real state-free from causality, relation with body etc. and modes of waking etc. - of that very entity that is called Prājna, will be spoken separately in its aspect as the Turiya (Fourth). The causal state, too, is verily experienced in the body, inasmuch as an awakened man is seen to have such a recollection as, 'I did not know anything (in my deep sleep).' Hence it is said, 'Tridhā dehc vyavasthitah - existing in three ways in the body'.

विक्वो हि स्थूलभुङ्नित्यं तैजसः प्रविविक्तमुक् । आनन्दमुक्तथा प्राज्ञस्त्रिषा मोगं निबोधत ।।३।।

3. Visva ever enjoys the gross; Taijasa enjoys the subtle; and similarly Prājña enjoys bliss. Know enjoyment to be threefold.

स्थूलं तर्पयते विक्वं प्रविविक्तं तु तैजसम् । आनन्दक्च तथा प्राज्ञं त्रिधा तॄप्ति निबोधत ॥४॥

4. The gross satisfies Visva, and the subtle satisfies

Taijasa. And so also joy satisfies Prājña. Know enjoyment to be threefold.

The two verses need no explanation.

त्रिषु धामसु यद्भोज्यं मोक्ता यश्च प्रकीर्तितः । वेदैतदुमयं यस्तु स मुञ्जानो न लिप्यते ॥१॥

5. He who knows both these — viz the enjoyment that there is in the three states, and that which is declared to be the enjoyer there — does not become affected even while enjoying.

Trisu dhāmasu, in the three states, of waking and the rest; there is but one bhojyam, object of enjoyment, that appears in triple form, known as gross, subtle, and bliss. And the entity known by the names of Visva, Taijasa, and Prajna, is prakirtitah, declared to be; the one bhokta, enjoyer, because of their being unified together as one through the single concept of 'I am that', and because there is no distinction so far as cognition (by them) is concerned. He who veda, knows; etat ubhayam, both these, as diversified multifariously into enjoyers and the things of enjoyment; sah, he; na lipyate, does not become affected; bhunjanah, even while enjoying, because all that is enjoyable belongs to a single enjoyer. For nothing is added to or deducted from one's nature by one's own objects (of enjoyment or awareness) — as in the case of fire, which does not lose or gain (in its essential nature) by consuming its own fuel.

प्रमवः सर्वमावानां सतामिति विनिञ्चयः। सर्वं जनयति प्राणञ्चेतोंशून् पुरुषः पृथक् ॥६॥

6. It is a well-established fact that origination belongs to all entities that have existence. Prāņa creates all (objects); Puruşa creates separately the rays of Consciousness (that are the living creatures).

Prabhavah, origination, in their own respective apparent appearances consisting of names and forms created by ignorance; sarvabhāvānām satām, belongs to all the entities that exist¹ in their different modes of Visva, Taijasa, and Prājňa. It will be said later on, '... a barren woman's son is born neither through Māyā nor in reality' (Kārikā, III. 28). For, if birth really belongs to nonentities themselves, then Brahman, which is beyond all empirical relations, will be left without any ground of cognition,² and may be equated with nonentity. But as a matter of fact, it is seen that the snake and such other things created by

¹ Exist in their own substratum on which they are superimposed. In the sixth paragraph of the Upanisad, 'in this one is verily the place of origin', it was said that Prājna is the source of the phenomenal world. The question now is: 'Is he a producer of entities or nonentities?' The answer is that he produces entities which are a sort of reflection of Reality and are true so long as their substratum is kept in view.

² Logical ground of inference. If the effect is true, the cause can be inferred to be so; but if the effect is non-existing, the cause will be equally so. The inference with regard to Brahman will be like this: 'This world is produced from Existence (Brahman), for it is a superimposed thing like the snake on a rope.' ignorance and sprouting from the seed of Maya, and appearing as a rope etc., have their existence as the rope etc. (which are their substrata). For nobody perceives anywhere a rope-snake or a mirage if there is no substratum. Just as the snake surely had its existence as the rope before its illusory appearance as the snake, so also all positive entities, before their manifestation, certainly had their existence in the form of their cause, Prana.1 And it is therefore that the Upanişad, too, says, 'All this (that is in front) is but Brahman' (Mu. II. ii. 11), 'In the beginning this (universe) was but the Self (Br. I. iv. 1). Pranah janayati, Prāna creates; sarvam, all. Purusah janayati, Purusa creates; prthak, separately; cetomisun, the rays of Consciousness, that issue out (from Purusa) like rays from the sun, that are the modes of the intelligence of Puruşa who is by nature Consciousness, that are comparable to the reflections of the sun on water, and that appear divergently as Visva, Taijasa, and Praina in the different bodies of gods, animals, and others - (Purusa creates) all these rays of Consciousness that possess the characteristics of living creatures, that differ from what has assumed the appearance of objects, and that are similar (to Puruşa) just as the sparks of fire (are to fire), or the reflections of the sun on water (are to the sun). But Prana, or the Self in the causal state, creates all other entities² as shown in the Vedic texts: 'As a spider (spreads and withdraws

¹ Prāna is Brahman considered as an unknown entity but identified with Existence and serving as the source of all.

² Existing in the form of objects, as opposed to the subjects.

its thread)' (Mu. I. i. 7), and 'as from fire tiny sparks fly in all directions' (Br. II. i. 20).

विभूति प्रसवं त्वन्ये मन्यन्ते सृष्टिचिन्तकाः। स्वप्नमायासरूपेति सृष्टिरन्यैविकल्पिता ॥७॥

7. Others steeped in cognition about creation consider origination as an exuberance (of God), while by others it is imagined that creation is comparable to dream or magic.

Sristicintakah, people steeped in the thought (or theories) of creation; manyante, consider; that creation is a *vibhūti*, exuberance, (a demonstration of the super-human power), of God. The idea implied is that for people who think of the supreme Reality there is no interest in questions regarding creation, (which is illusory) as is declared in the Vedic text, 'Indra (the Lord), on account of Māyā, is perceived as manifold' (Br. II. v. 19). For those who observe a magician throw up a rope into the sky, ascend it bearing arms and vanish out of sight, and engage in a fight in which he is cut to pieces and falls to rise up again, do not evince any interest in deliberating on the reality of the magic and its effect conjured up by him. So also, analogous to the spreading out of the rope by the magician, is this manifestation of deep sleep, dream, and so on; comparable to the magician who has climbed up the rope are the Prajna, Taijasa, and the rest in those states; and different from the rope and the man who has climbed up it is the real magician. Just as that very magician stands on the ground, in-

I. 7]

visible because of his magical cover, similar is the supreme Reality called Turīya. Therefore the noble people, aspiring to liberation, evince interest in the contemplation of that Turīya alone, but not so in that of creation which serves no purpose. Hence these theories are advanced only by those who cogitate about creation. This fact is stated in *svapnamāyāsarūpā*, of the same nature as dream and magic.¹

इच्छामात्रं प्रभोः सृष्टिरिति सृष्टौ विनिध्चिताः । कालात्प्रसूति भूतानां मन्यन्ते कालचिन्तकाः ॥८॥

8. With regard to creation some have the firm conviction that creation is a mere will of the Lord. People engrossed in the thought of time (to wit, astrologers) consider that birth of beings is from time.

Srşțih, creation; is icchāmātram, a mere will; prabhoh, of the Lord, because His will is unfailing. A pot, for instance, is a mere thought (of the potter), and it is nothing beyond thought. Some think that creation is from time alone.

मोगार्थं सृष्टिरित्यन्ये क्रीडार्थमिति चापरे । देवस्यैष स्वभावोऽयमाप्तकामस्य का स्पृहा ।।६।।

9. Some others say that creation is for the enjoy-

¹ This differs from the Vedāntic position in believing that dream is true so far as it reflects the phenomenal realities of the waking state, and that the incantations etc., conjuring up magical illusions, are themselves empirically true, though the magical objects are false. Mā. 7]

ment (of God), while still others say that it is for (His) disport. But it is the very nature of the Effulgent Being, (for) what desire can One have whose desire is ever fulfilled?

Others think that srstih, creation; is bhogārtham, for the sake of enjoyment; (and) krādārtham, for the sake of disport. These two views are refuted by 'devasya esah svabhāvah ayam, of the Effulgent Being this is the nature'¹ etc., by basing the argument on the Nature (of God). Or, all the points of view² are refuted by asserting, 'Aptakāmasya kā sprhā, what desire can One have whose desire is ever fulfilled?' For apart from the fact that the rope etc. are constituted by natural ignorance,³ no cause can be ascertained for their appearing as snake etc.

UPANIŞAD

The fourth quarter which follows in order has to be stated; hence this is presented (by the Upanişad) in 'nāntaḥ-prajñam, not conscious of internal world' etc. Since It (i.e. Turīya) is devoid of every characteristic that can make the use of words possible, It is not describable through words; and hence the (Upanişad)

¹ Nature, otherwise known as Māyā, is without any beginning though it is directly perceived. This being so, no motive for creation should be sought.

² Presented in the verses 7 and 8, and the first line of verse 9.

³ Ignorance about the rope etc. that are the substrata of the illusory things like snake etc.

seeks to indicate Turiya merely through the negation of attributes.

Objection: In that case is It a mere void?

Answer: No, for an unreal illusion cannot exist without a substratum; for the illusion of silver, snake, human being, mirage, etc., cannot be imagined to exist apart from the (corresponding) substrata of the mother of pearl, rope, stump of a tree, desert, etc.¹

Objection: In that case, just as a pot etc. that hold water etc. are denoted by words, so also Turīya should be specified by (positive) words, and not by negations, for It is the substratum of all such illusion as Prāņa etc.

Answer: Not so, because the illusion of Prāņa and the rest is unreal just as silver and the rest are on the mother of pearl etc. For a relation between the real and the unreal does not lend itself to verbal representation, since the relation itself is unsubstantial. Unlike a cow, for instance, the Self, in Its own reality, is not an object of any other means of knowledge; for the Self is free from all adventitious attributes. Nor like a cow etc. does It belong to any class; because, by virtue of Its being one without a second, It is free from generic and specific attributes. Nor is It possessed of activity like a cook for instance, since It is devoid of all action. Nor is It possessed of qualities like blueness etc., It being free from qualities. Therefore It baffles all verbal description.

¹ Since an illusion is perceived as soaked in the idea of existence, it cannot have non-existence as its basis.

Objection: It will, in that case, serve no useful purpose, like the horn of a hare and such other things.

Answer: Not so; for when Turīya is realized as the Self, it leads to the cessation of craving for the non-Self, just as the hankering for silver ceases on recognizing the nacre. Indeed, there can be no possibility of such defects as ignorance, desire, and the like, after the realization of Turīya as one's Self. Nor is there any reason why Turīya should not be realized as identical with one's Self, inasmuch as all the Upanisads aim at this conclusion, as is evidenced by the texts, 'Thou art That' (Ch. VI. viii-xvi), 'This Self is Brahman' (Br. II. v. 19), 'That which is the Self is Truth' (Ch. VI. viii.7), 'The Brahman that is immediate and direct' (Br. III. iv. 1), 'Since He is coextensive with all that is external and internal and since He is birthless...' (Mu. II. i. 2), 'The Self indeed is all this' (Ch. VI. xxv. 2), and so on.

This very Self, that is the supreme Reality but has false appearances, has been spoken of as possessed of four quarters. Its unreal form has been dealt with, which is a creation of ignorance and which is analogous to a snake superimposed on a rope, and consists of the three quarters that are related (mutually) like the seed and its sprout.¹ Now, in the text beginning with, 'nāntahprajňam, not conscious of the internal world', the Upanişad speaks of the non-causal, supremely real state, comparable to a rope etc., by way of eliminating the aforesaid three states, com-

¹ By way of cause and effect.

parable to the snake etc. (superimposed on the rope etc.).

नान्तःप्रज्ञं न बहिष्प्रज्ञं नोभयतःप्रज्ञं न प्रज्ञानघनं न प्रज्ञं नाप्रज्ञम् । अदृष्टमव्यवहार्यमग्राह्यमलक्षणमचिन्त्यमव्यपदेश्य-मेकात्मप्रत्ययसारं प्रपञ्चोपक्षमं क्षान्तं क्षिवमद्वैतं चतुर्थं मन्यन्ते स आत्मा स विज्ञेयः ॥७॥

7. They consider the Fourth to be that which is not conscious of the internal world, nor conscious of the external world, nor conscious of both the worlds, nor a mass of consciousness, nor conscious, nor unconscious; which is unseen, beyond empirical dealings, beyond the grasp (of the organs of action), uninferable, unthinkable, indescribable; whose valid provconsists in the single belief in the Self; in which all phenomena cease; and which is unchanging, auspicious, and non-dual. That is the Self, and Fast is to be known.

Objection: The start was made with the premise that the Self is possessed of four quarters. Then, after the presentation of the three quarters, it has become evident that the fourth is different from those three that are conscious of the internal world, and so on; and hence the negation through 'not conscious of the internal world' etc. becomes futile.

Answer: Not so; for as the true nature of the rope is realized through the negation of the illusions of a snake etc., so the very Self, subsisting usually in the three states, is sought to be established as Turiya in

the same way as is done in the case of the text, 'That thou art'l (Ch. VI. viii). For if Turiya, whose characteristics are dissimilar to those of the Self in the three states, be really different (from the Self), then owing to the absence of any means for realizing Turiya the scriptural instruction would be useless or Turiya will be reduced to a non-entity. On the view, however, that like the rope, imagined variously as a snake etc., the Self, too, though one, is imagined in the three states to be possessed of such attributes as consciousness of the internal world etc., there follows in the Self the cessation of the phenomenal world of misery simultaneously with the valid knowledge arising from the negation of such attributes as being conscious of he internal world: and therefore there remains no need to search for any other means of knowledge or any other discipline (like constant thinking) for the realization of Turiya. This is similar to what happens in the case of the knowledge of the rope where the elimination of the snake from the rope occurs simultaneously with the discrimination between the rope and the snake.² On the contrary, by those who hold the view that in the act of knowing a pot, for instance,

¹ This positive statement is interpreted not literally, but figuratively to mean that 'Thou', which is the individual soul, is identical with 'That', which is God, when both are bereft of conditioning factors.

² Since along with the discriminating knowledge in the form, 'This is a rope and not a snake', the cessation of the snake comes simultaneously, one need not search for a separate result to issue out of the direct perception of the rope, or for any other means of its knowledge, or any other aid to it. an instrument of knowledge engages in some other activity in addition to the removal of darkness (from the pot etc.), it may as well be held that in the matter of splitting wood, the act of splitting engages in doing something to one of the two parts in addition to removing the adhesion of the two members.1 On the other hand, if it is true that the means of knowledge, engaged in distinguishing a jar from the darkness (covering it), fulfils its goal by merely removing the unwanted darkness, just as the act of cutting, aimed at tearing apart the adhesion of the parts of the wood to be split, fully serves its purpose by separating the parts, then the knowledge of the jar emerges immediately; and it is not achieved by any instrument of knowledge. Just as it is here, so in the case of Turiya the instrument of knowledge-which is nothing but a valid knowledge arising from negation and intended to separate such ideas as being 'conscious of the internal world' that are superimposed on the Self-has no other action on Turiya, apart from eliminating the unwanted attributes like being 'conscious

¹ The objection was: "The result of applying an instrument of knowledge to any object is the revelation of the object and not the mere removal of any illusion created by darkness or "ignorance"." The answer is: 'An instrument of knowledge fulfils its purpose by removing the darkness of ignorance from its object. The revelation comes pari passu, as a matter of course. If the instrument of knowledge is supposed to serve the additional purpose of adding a fresh feature, like revelation, to its object, then one may as well argue that the cutting of wood aims not only at removing the adhesion of the two parts, but also at adding something to either of the two parts.' of the internal world'; ¹ for simultaneously with the cessation of such attributes as being. 'conscious of the internal world', there comes about the eradication of such distinctions as the knower, (the known, and the knowledge). So also it will be said, 'Duality ceases to exist after realization' (*Kānkā*, I. 18), for knowledge (as a mental state) does not continue for a second moment following that of the cessation of duality. Should it, however, continue, it will lead to infinite regress resulting in non-cessation of duality.² Therefore the conclusion arrived at is that all evils, such as being 'conscious of the internal world', superimposed on the Self, cease simultaneously with the application (i.e. birth) of the instrument (of illumination) which is nothing but a valid knowledge arising from negation (of duality).

By the phrase, 'nāntaḥ-prajñam, not conscious of the internal world', is eliminated Taijasa. By 'na bahişprajñam, not conscious of the outside world', is eliminated Viśva. By 'na ubhayataḥ-prajñam, not conscious of either' is ruled out the intermediate state between dream and waking. By 'na prajñānaghanam, not a mass of consciousness' is denied the state of deep sleep, for this consists in a state of latency where every-

¹ Turiya is self-effulgent and does not require to be illumined by any instrument of knowledge.

² If the knowledge calculated to eliminate duality persists after serving its purpose, some other knowledge will be needed to eliminate it. That other knowledge will again require a third for a similar purpose, and so on. To avoid this contingency, the final knowledge must be assumed to be self-immolating. thing becomes indistinguishable. By 'na prajnam, nor conscious' is denied being aware of all objects simultaneously (by a single act of consciousness). By 'na aprajnam, nor unconscious' is negated insentience.

Objection: Since attributes like being 'conscious of the internal world' are perceived as inhering in the Self, how, again, can they be understood to become non-existent, like the snake etc. in the rope etc., by a mere negation?

The answer is: Since like the imaginary diversities —such as a snake, a line of water, etc., superimposed on the rope — the above states (appearing on the Self) mutually rule out each other, though they are in essence one with the witnessing Consciousness, and since the witnessing Consciousness in Its essence is unchanging in all the states, it follows that the witness is true.

Objection: It changes (i.e. disappears) in deep sleep.

Answer: Not so, for one in deep sleep is cognized (as soaked in Consciousness);¹ and this is borne out by the Vedic text, 'for the knower's function of knowing can never be lost' (Br. IV. iii. 30).

Hence, It is *adrstam*, unseen.² Since It is unseen (i.e. unperceived), therefore It is *avyavahāryam*, beyond

¹ One rising from deep sleep says, 'I slept soundly, and I was not aware of anything'. This memory would not have been possible unless the state was witnessed with the help of Consciousness so as to produce the necessary impressions.

² Not the object of any sense of knowledge.

empirical dealings; agrāhyam, beyond the grasp, of the organs of action; alakṣaṇam, without any logical ground of inference, that is to say, uninferable. Therefore It is acintyam, unthinkable. Hence It is avyapadesyam, indescribable, by words. It is eka-ātma-pratyayasāram, to be spotted by the unchanging belief that It is the same Self that subsists in the states of waking and so on. Or, the Turīya that has for Its sāra, valid proof, eka ātmapratyaya, the single belief in the Self, is the eka-ātmapratyaya-sāra. And this is in accord with the Vedic text: 'The Self alone is to be meditated upon' (Br. I. iv. 7).

The attributes, such as being 'conscious of the internal world', belonging to the possessors of the states (viz Viśva, Taijasa, and Prājña), have been negated. In 'prapañcopaśamam, the one in whom all phenomena have ceased', etc. are being denied the attributes of the states of waking etc. Hence It is śāntam, unchanging;¹ śwam, auspicious.² Since It is advaitam, non-dual, free from illusory ideas of difference; therefore manyante, (they) consider It to be; the Turīya, caturtham, the Fourth, being distinct from the three quarters that are mere appearances. 'Sah ātmā, That is the Self; sah vijneyah, That is to be known'— this is said to imply that just as the rope is known to be different from the snake, the crack on the ground, or the stick, superimposed on it, similarly, that Self is to be known (as different from the superimposed states)— the Self that is presented in the sentence 'That thou art' (Ch.

¹ Free from love, hatred, etc.

² Absolutely pure; supreme Bliss and Consciousness in essence.

VI. viii-xvi), and that has been spoken of by such texts as 'He is never seen, but is the witness' (Br. III. vii. 23), 'for the vision of the witness can never be lost' (Br. IV. iii. 23), etc. 'That is to be known'— this is spoken of from the standpoint of the previous state of ignorance,¹ for on the dawn of knowledge, no duality is left.

GAUDAPADA'S KARIKA

Here occur these verses (of Gaudapāda):

निवृत्तेः सर्वदुःखानामीञानः प्रभुरव्ययः। अद्वैतः सर्वभावानां देवस्तुर्यो विभुः स्मृतः॥१०॥

10. The unchanging non-dual One is the ordainer — the Lord — in the matter of eradicating all sorrows. The effulgent Turīya is held to be the all-pervasive source of all objects.

Nivrtteh, in the matter of eradication; sarvaduhkhānām, of all sorrows, represented by Viśva, Taijasa, and Prājňa; the Self that is Turīya is *īsānah*, the ordainer. 'Prabhuh, Lord' is an explanation of the word *īsānah*. The idea is that He is the Lord capable of ordaining the cessation of sorrow; for sorrow ceases as a result of His knowledge. (He is) avyayah, un-

¹ The Self, defying all description, cannot be known objectively. But since in the state of ignorance one understands knowledge as having objective reference, the text follows that trend of thought here as well. changing, that is to say, does not deviate from His nature. Why is this so? Because He is advaitah, nondual, on account of the falsity of all objects, like the snake on a rope. He who is this *devah*, effulgent One, so called because of His self-effulgence; *smrtah*, held to be; *turīyah*, the Fourth; and *vibhuh*, the Omnipresent (source)¹.

For determining the true nature of Turiya, the generic and specific characteristics of Visva and the rest are being ascertained:

कार्यकारणबद्धौ ताविष्येते विक्वतैजसौ । प्राज्ञः कारणबद्धस्तु द्वौ तौ तुर्ये न सिध्यतः ॥११॥

11. Those two, viz Viśva and Taijasa, are held to be conditioned by cause and effect. Prājňa is conditioned by cause. But both these do not exist in Turīya.

Kārya, derived in the sense of anything produced, means the state of being the effect. Kāraņa, derived in the sense of anything that acts, means the causal state. Those two, viz visva-taijasau, Visva and Taijasa, as described earlier; *isyete*, are held to be; (kārya-kāraņabaddhau), bound by, conditioned by, the states of seed and fruit, consisting in the non-apprehension and misapprehension of Reality. But Prājňa is bound by the causal state alone. The non-apprehension of

¹ Turīya is vibku, because the three different (vividha) states issue (bhavanti) from Him—A.G. Reality alone is the cause of bringing about the state of Prājna. Therefore *tau dvau*, both these two—the causal and the resultant conditions, the non-apprehension and misapprehension of Reality, respectively —*na sidhyatah turye*, do not exist, that is to say, are not possible, in Turiya.

नात्मानं न परांइचैव न सत्यं नापि चानृतम् । प्राज्ञः किञ्चन संवेत्ति तुर्यं ततु सर्वदुक् सदा ॥१२॥

12. Prājna does not comprehend anything neither himself nor others, neither truth nor falsehood. But that Turīya is for ever everything and the witness.

How, again, is Prajna conditioned by the causal state, and how are the bondages of non-apprehension and misapprehension impossible in the case of Turīya? Since unlike Visva and Taijasa, Prājňa na samvetti, does not apprehend; kincana, anything, any external duality that is different from the Self and is born of the seed of ignorance, therefore he is conditioned by the darkness of non-perception of Reality, which is the seed of false perception. Since tat, that; Turīya is sadā, for ever; sarva-drk, all (sarva) that there is as well as its witness (drk), there being nothing besides Turiya; therefore the seed consisting in nonperception of Reality does not exist there (in the Turiya). And just because of this there is also the absence in Turiya of false perception resulting from non-perception; for in the sun, which is ever resplendent, there is no possibility of the opposite, darkness,

or shining in any way other than that of the sunin conformity with the Vedic text, 'for the vision of the witness can never be lost' (Br. IV. iii. 23). Or, Turīya is said to be the 'sarva-drk, seer of everything' for ever, because it is but Turīya who, by existing in all beings during the dream and the waking states, seems to be the seer of everything. For the Upanişad says, 'There is no other witness but This' (Br.III. viii. 11).

द्वैतस्याग्रहणं तुल्यमुभयोः प्राज्ञतुर्ययोः । बीजनिब्रायुतः प्राज्ञः सा च तुर्ये न विद्यते ॥१३॥

13. Non-perception of duality is common to both Prājna and Turīya. Prājna is endued with sleep that is a causal state. But in Turīya that sleep does not exist.

This verse is meant to remove the doubt arising from another source. 'The non-perception of duality being similar, why should Prājňa alone be conditioned by causality and not Turīya?' — this doubt that may arise is being refuted. The reason is that Prājňa is bija-nidrā-yutah; nidrā, sleep, consists in the non-perception of Reality, and that itself is the bija, seed of the birth of the cognition of varieties; and Prājňa is yutah, endued by this bijanidrā, sleep that is a causal state. That sleep, consisting in the non-perception of Reality, na vidyate, does not exist; turye, in Turīya, because of His being by nature a constant witness. Therefore in Him there is no bondage of the causal state. This is the purport.

स्वप्ननिद्रायुतावाद्यौ प्राज्ञस्त्वस्वप्ननिद्रया । न निद्रां नैव च स्वप्नं तुर्ये पञ्च्यन्ति निविचताः ।।१४।।

14. The earlier two are endued with dream and sleep, but Prajna is endued with dreamless sleep. People of firm conviction do not see either sleep or dream in Turiya.

Svapna, dream, consists in false perception, like that of a snake on a rope. Nidrā, sleep, has been spoken of as darkness, consisting in non-perception of Reality. By these two—dream and sleep—are endued Visva and Taijasa; and this is why they have been referred to as conditioned by the states of cause and effect (Kārikā, I. 11); whereas Prājna is conditioned by sleep alone, unassociated with dream; and hence he has been referred to as conditioned by the causal state. Nišcitāh, those with firm conviction, the knowers of Brahman; na pašyanti, do not see, both these in Turīya, these being of an opposite nature, like darkness with regard to the sun. Therefore it has been said that Turīya is not conditioned by the states of cause and effect.

It is being shown when one becomes firmly rooted in Turīya:

अन्यथा गृह्णतः स्वप्नो निद्रा तत्त्वमजानतः । विपर्यासे तयोः क्षीणे तुरीयं पदमइनुते ॥११॥

15. Dream belongs to one who sees falsely, and sleep to one who does not know Reality. When the two errors of these two¹ are removed, one attains the state that is Turīya.

Svapnah, dream; comes to one grhnatah, who cognizes Reality; anyathā, falsely, like the cognition of a snake on a rope, in the states of dream and waking. Nidrā, sleep-belonging to one ajānatah tattvam, not cognizing Reality-is equally present in all the three states. Dream and sleep being the common features of both Visva and Taijasa, they are treated as one. Since in these two states sleep is of secondary importance owing to the predominance of false perception, the error (in these states) is equated with dream. But in the third state the error takes the form of sleep alone, consisting in non-perception of Reality. Therefore when tayoh, of these two (Visva-Taijasa and Prajna), existing in the states of effect and cause; viparyase, the two errors, consisting in false perception and nonperception, and constituting the two bondages in the form of effect and cause; ksine, are eradicated on the cognition of the supreme Reality; then one asnute, attains; turiyam padam, the state of Turiya. The idea is that, as he does not perceive both kinds of bondages there, he becomes firmly rooted in Turiva.

अनादिमायया सुप्तो यदा जीवः प्रबुघ्यते । अजमनिद्रमस्वप्नमढ्वैतं बुघ्यते तदा ॥१६॥

16. When the individual, sleeping under the in-

¹ Visva and Taijasa constitute one factor and Prājňa the other. This is why '*tayo*h, of these two' is used in the dual number. fluence of beginningless Māyā, is awakened, then he realizes the birthless, sleepless, dreamless, non-dual (Turīya).

This one, the *jīvah*, the transmigrating individual soul; that is *suptah*, asleep; while seeing in both the (waking and dream) states such dreams as 'This is my father', 'This is my son', 'This is my grandson', 'This is my field', 'These are my animals', 'I am their master', 'I am happy, miserable', 'I am despoiled by this one, and I have gained through this one', and so on, under the influence of dream that is but Māyā whose activity has no beginning and which has the two facets of non-perception of Reality or the causal state, and false perception of Reality. *Yadā*, when by a most gracious teacher, who has realized the Truth that forms the purport of the Upanisads, he (the individual) is awakened through the teaching, "Thou art not a bundle of causes and effects, but "Thou art That"', then that individual understands thus. How? (Thus): (He knows the) ajam, birthless, which is called so since in It there is no external or internal mutation, starting with birth, that positive objects are heir to; the idea is that It is externally and internally devoid of all mutations that phenomenal objects are subject to. (He knows the) anidram, sleepless (Turiya), since in It there is no sleep or the causal state, consisting in the darkness of ignorance that is the cause of birth and so on. Since that Turīya is sleepless, therefore (he realizes) It is *asvapnam*, dreamless, false perception (*svapna*) being based on non-perception (*nidrā*). Since It is sleepless and dreamless, therefore the individual, I. 18]

tadā, then; budhyate, realizes the birthless, non-dual Turīya as his Self.

प्रपञ्चो यदि विद्येत निवर्तेत न संशयः । मायामात्रमिदं द्वैतमद्वैतं परमार्थतः ॥१७॥

17. It is beyond question that the phenomenal world would cease to be if it had any existence. All this duality that is nothing but Māyā, is but nonduality in reality.

If one is to be awakened by negating the phenomenal world, how can there be non-duality so long as the phenomenal world persists? The answer is: Such indeed would be the case yadi prapañcah vidyeta, if the phenomenal world had existence. But being superimposed like a snake on a rope, it does not exist. Na samisayah, there is no doubt; that if it had existed, nivarteta, it would cease to be. Certainly, it is not that the snake, fancied on the rope through an error of observation, exists there in reality and is then removed by correct observation. Verily, it is not that the magic conjured up by a magician exists in reality and is then removed on the removal of the optical illusion of its witness. Similarly, māyāmātram idam dvaitam, this duality that is nothing but Māyā, and is called the phenomenal world; is paramārthatah, in supreme Truth; advaitam, non-dual, just like the rope and the magician. Therefore the purport is that there is no such thing as the world which appears or disappears.

> विकल्पो विनिवर्तेत कल्पितो यदि केनचित्। 'उपदेशादयं वादो ज्ञाते द्वैतं न विद्यते॥१८॥

18. Diversity would disappear if it had been imagined by anyone. This kind of talk is for the sake of (making) instruction (possible). Duality ceases to exist after realization.

How can such fancies as instruction, instructor, and the instructed disappear? To this the answer is: Vikalpah, diversity; vinivarteta, would discontinue; yadi, if; it had been kalpitah, imagined; kenacit, by anybody. Just as this phenomenal world is analogous to magic or a snake superimposed on a rope, so also such fancies as the differences of the instructed and so on are there only before enlightenment, upadesāt, for the sake of instruction; hence ayam vādah, this talk—of instructor, instruction, and instructed—is for the sake of instruction. When the effect of instruction is accomplished, jnāte, on the realization of the supreme Reality; dvaitam na vidyate, duality ceases to exist.

UPANISAD

सोऽयमात्माऽध्यक्षरमोङ्कारोऽधिमात्रं पादा मात्रा मात्राक्च पादा अकार उकारो मकार इति ॥८॥

8. That very Self, considered from the standpoint of the syllable (denoting It) is Om. Considered from the standpoint of the letters (constituting Om), the quarters (of the Self) are the letters (of Om), and the letters are the quarters. (The letters are): a, u, and m.

Sah ayam ātmā, that very Self, which was equated with Om in, 'This Self is possessed of four quarters' (Mā. 2), by giving predominance to the object denoted (by Om) — that very Self; adhyakşaram, from the standpoint of the syllable, (is Om) when explained with emphasis on the syllable. Which again is that syllable? That is being stated: Onkārah, it is the syllable Om. That syllable Om, while being divided into quarters, is adhimātram, exists on letters as its basis. How? Those which constitute the quarters of the Self are the letters of Om. Which are they? They are the letters, a, u, and m.

जागरितस्थानो वैक्वानरोऽकारः प्रथमा मात्राऽऽप्तेरादि-सत्त्वाद्वाऽऽप्नोति ह वै सर्वान् कामानादिक्च मवति य एवं वेद ॥१॥

9. Vaisvānara, having the waking state as his sphere, is the first letter a, because of (the similarity of) pervasiveness or being the first. He who knows thus, does verily attain all desirable things, and becomes the foremost.

With regard to these, specific relations are being established. He who is vaisvānarah, Vaisvānara (Virāt); jāgaritasthānah, with his sphere (of activity) as the waking state;¹ is akārah, a; prathamā mātrā, the first

¹ The Self in the gross individual context (viz Viśva) is identical with the Self in the gross cosmic context (viz Vaiśvānara or Virāţ). Similarly, it is to be understood that Taijasa is identical with Hiraŋyagarbha, and Prājňa with the Unmanifested, the difference lying only in the sphere of manifestation. This identity is suggested by the indiscriminate use of these terms in the present and following texts. letter, of Om. Because of what similarity? That is being said: Apten, because of pervasiveness. Apti means pervasiveness. By the sound a is pervaded all speech, according to the Vedic text, 'The sound a is indeed all speech' (Ai. A. II. iii. 7: 13). Similarly, by Vaiśvanara is pervaded the whole universe, according to the Vedic text, 'Of that very Vaisvanara-Self who is such, heaven indeed is the head' (Ch. V. xviii. 2). And we said that the word and the thing denoted by the word are the same. That which has adi, precedence, is said to be adimat, first. Just as the letter called a is the first, so also is Vaisvānara. Because of this very similarity Vaisvanara is identified with a. The fruit attained by a knower of this identity is stated : Apnoti ha vai sarvan kāmān, he surely attains all desirable things; ca bhavati ādih, and he becomes the foremost, among the great; yah evan veda, who knows thus, i.e. knows the identity as stated. eco .

स्वप्नस्थानस्तैजस उकारो द्वितीया मात्रीत्कर्षादुमयत्वाद्वो-त्कर्षति ह वै ज्ञानसन्तति समानइच भवति नास्याब्रह्मवित् कुले भवति य एवं वेद ।।१०।।

10. He who is Taijasa with the state of dream as his sphere (of activity) is the second letter u (of Om); because of the similarity of excellence and intermediateness. He who knows thus increases the current of knowledge and becomes equal to all. None is born in his line who is not a knower of Brahman.

He who is taijasah; svapnasthānah, with the state of dream as his sphere; is the dvitīyā mātrā, second letter; $uk\bar{a}rah$, u, of Om. Because of what similarity? That is being said: Utkarşāt, because of excellence. The letter u is, as it were, better than the letter a; so also is Taijasa better than Visva. Ubhayatvāt vā, or (this is so) because of intermediate position. The letter u occurs between the letters a and m; and so also is Taijasa intermediate between Visva and Prājña. (Taijasa is u) because of this similarity of being related to both. The result attained by the knower is being stated: Utkarşati ha vai jñānasantatim, he heightens, that is to say, increases, the current of knowledge; ca bhavati samānah, and he becomes equal—he does not become an object of envy to his enemies, as he is not to his friends. Asya kule, in the line of this one; yah evam veda, who knows thus; na bhavati abrahmavit, none is born who is not a knower of Brahman.

सुषुप्तस्थानः प्राज्ञो मकारस्तृतीया मात्रा मितेरपीतेर्वा मिनोति ह वा इदः सर्वमपीतित्त्व भवति य एवं वेद ॥११॥

11. Prājňa with his sphere of activity in the sleep state is m, the third letter of Om, because of measuring or because of absorption. Anyone who knows thus measures all this, and he becomes the place of absorption.

He that is prājnah, Prājna; susuptasthānah, with the state of sleep as his sphere; is makārah, the letter m; which is $t_{fly}\bar{a}$ mātrā, the third letter, of the syllable Om. By what analogy? That is being said: This is the analogy here—mitch, because of measuring. Miti means to measure. As barley is measured by the vessel called Prastha, so are Visva and Taijasa measured, as it were, because of their entry into and coming out of Prājña during dissolution and origination. Similarly, too, at the end of the pronunciation of the syllable Om and at the time of its fresh pronunciation, the letters a and u seem to enter into the last letter m, to come out again from it. Vā apīteh, or because of absorption. Apīti means getting merged or united in. At the time of the pronunciation of Om, a and u verily seem to get merged into the last letter m. Similarly, Visva and Taijasa merge into Prājna at the time of sleep. Because of this analogy also there is the identity of Prajna and the letter m. The result attained by the man of knowledge is stated: Minoti ha vai idam sarvam, he measures all this, that is to say, he knows the reality of the Universe; ca bhavati apītih, and he becomes the place of absorption, that is to say, the Self in Its state as the cause of the world. The mention of subsidiary result here is by way of praising the primary means.

GAUDAPADA'S KARIKA

Here occur these verses (of Gaudapada):

विश्वस्यात्वविवक्षायामादिसामान्यमुत्कटम् । मात्रासंप्रतिपत्तौ स्यादाप्तिसामान्यमेव च ॥१६॥

19. When the identity of Visva with the letter a is intended, (that is to say) when Visva's identity with a letter is apprehended, the similarity of being the first, as well as the similarity of all-pervasiveness, emerges in view.

When the identity visvasya, of Visva; with a, with the mere letter a, is intended; then, according to the reasoning adduced, sāmānyam, the similarity; of being the $\bar{a}di$, first; is seen as ulkaļam, obvious. This is the idea. The clause 'when the identity with a is intended' is explained by mātrāsampratipattau, which means 'when Visva's identity with a alone is apprehended'. After 'āpti-sāmānyam eva ca, the similarity of all-pervasiveness', the word 'utkaṭam, (is seen as) obvious' is understood because of the use of 'ca, and'.

तैजसस्योत्वविज्ञान उत्कर्षो दृृ्यते स्फुटम् । मात्रासंप्रतिपत्तौ स्यादुमयत्वं तथाविधम् ॥२०॥

20. In the matter of comprehending Taijasa as identified with *u*, that is to say, when Taijasa's identity with a letter is apprehended, the similarity of excellence is clearly seen, and intermediacy also is equally . clear.

Taijasasya utva-vijnāne, in the matter of knowing Taijasa as the letter u, when it is intended to be identified with u; utkarşah, excellence; drśyate, is seen; sphuțam, clearly. This is the meaning. Ubhayatvam, intermediacy, is also clear. All this is to be explained as before.

> मकारमावे प्राज्ञस्य मानसामान्यमुत्कटम् । मात्रासंप्रतिपत्तौ तु लयसामान्यमेव च ॥२१॥

21. In the matter of Prajna's identity with the

letter *m*, that is to say, when Prājňa's identity with a letter is apprehended, the similarity of being a measure is seen to emerge plainly, and so also does the similarity of absorption.

The idea is that, in the matter of Prajna's identity with the letter m, measurement and absorption are excellent points of similarity.

त्रिषु घामसु यस्तुल्यं सामान्यं वेत्ति निध्चितः। स पूज्यः सर्वभूतानां वन्द्यश्चैव महामुनिः॥२२॥

22. He, the great sage, who knows with firm conviction the common similarities in the three states is worthy of adoration and salutation by all beings.

Sah, he, the knower of Brahman; who niscitah, with the firm conviction, 'This is certainly so'; vetti, knows; in the three states, mentioned above; tulyam sāmānyam, the common analogies spoken of; is pūjyah, adorable; and vandyah, worthy of salutation, in the world.

अकारो नयते विद्वयुकारद्वापि तैजसम् । मकारद्व पुनः प्राज्ञं नामात्रे विद्यते गतिः ॥२३॥

23. The letter a leads to Visva; so also the letter u leads to Taijasa; and the letter m, again, leads to Prājna. (When Prājna disappears) in that (Om) which is free from the letters, there remains no attainment.

Akārah, the letter a; nayate, carries - him who, after

resorting to Om, meditates on it by identifying the quarters of the self with the letters of Om through the foregoing common features; visvam, to Visva; makes him attain Visva. The idea is that he who meditates on Om with (emphasis on) a, becomes identified with Vaisvānara (Virāt). Similarly, ukārah, the letter u; takes him taijasam, to Taijasa. Ca, and; makārah, the letter m; punah, again; prājňam, to Prājňa. The verb 'leads' is to be understood from the use of the word 'ca, and'. But when m, too, disappears—when the causal state gets destroyed in Om; amātre which is free from the letters (and parts)—then, na vidyate, there does not remain; any gatih, attainment.¹

UPANISAD

अमात्रश्चतुर्थोऽव्यवहार्यः प्रपञ्चोपशमः शिवोऽढैत एवमोङ्कार आत्मैव संविशत्यात्मनाऽऽत्मानं य एवं वेद ॥१२॥ इति माण्डूक्योपनिषत् समाप्ता ॥

12. The partless Om is Turiya-beyond all con-

¹ A represents the gross universe, the waking state, and Viśva; u represents the subtle universe, dream, and Taijasa; and m represents the causal state, sleep, and Prājña. The earlier ones merge into the latter ones. In this way everything is reduced to Om. While engaged in this meditation of Om as all, there flashes in the aspirant's mind the teacher's insturction that everything is but the absolute Brahman. Then all the phenomenal world, merged in Om, disappears in Brahman, and there remains no goal to attain. Though the meditations in the three stages relate to the same Om, the results are different in accordance with the emphasis laid on its constituents. ventional dealings, the limit of the negation of the phenomenal world, the auspicious, and the non-dual. Om is thus the Self to be sure. He who knows thus enters the Self through his self.

Amātraķ, that which has no mātrā, part — the part-less Om; becomes but the caturthaḥ, Fourth, Turīya, merely the absolute Self; which is avyavahāryaḥ, beyond empirical relations, because of the disappearance of names and nameables, that are but forms of speech and mind; prapañcopašamaḥ, the culmination of phe-nomenal existence;¹ sivaḥ, the auspicious; and advaitaḥ, non-dual. Evam, thus; Om, as possessed of the three letters and as applied by a man with the above knowl-edge, is ātmā eva, verily identical with the Self possessed of three quarters. Taḥ evam veda, he who knows thus; samīvišati, enters; ātmānam, into (bis own supreme) of three quarters. Tah evan veda, he who knows thus; samvisati, enters; ātmānam, into (his own supreme) Self; ātmanā, through (his own) self. The knower of Brahman, who has realized the highest Truth, has entered into the Self by burning away the third state of latency; and hence he is not born again, since Turīya has no latency (of creation). For when a snake superimposed on a rope has merged in the rope on the discrimination of the rope and the snake, it does not appear again to those discriminating people, just as before, from the impressions (of the past persisting) in the intellect. To those men of renunciation, however, who are possessed of dull or average intellect, who still consider themselves aspirants, who tread the virtuous path, and who know the common features

¹ The ultimate limit of the negation of the world.

of the letters and the quarters (of Om and the Self) as presented before, (to them) the syllable Om, when meditated on in the proper way, becomes helpful for the realization of Brahman. In support of this it will be said, 'There are three stages of life—inferior,' etc. (Kārikā, III. 16).

GAUDAPÄDA'S KĀRIKĀ

Just as before, here occur these verses:

ओङ्कारं पादशो विद्यात्पादा मात्रा न संशयः। ओङ्कारं पादशो ज्ञात्या न किंचिदपि चिन्तयेत्॥२४॥

24. One should know Om, quarter by quarter; (for) there is no doubt that the quarters (of the Self) are the letters (of Om). Having known Om, quarter by quarter, one should not think of anything whatsoever.

Because of the aforesaid similarity, the quarters are the letters, and the letters are the quarters. Therefore vidyāt, one should know; onkāram, the syllable Om; pādašah, quarter by quarter. This is the meaning. When the syllable Om is known thus, na cintayet, one should not think of; kim cit api, anything whatsoever, serving any seen or unseen purpose; for he has got all his desires fulfilled.

> युञ्जीत प्रणवे चेतः प्रणवो ब्रह्म निर्मयम्। प्रणवे नित्ययुक्तस्य न भयं विद्यते क्वचित्॥२४॥

25. One should concentrate one's mind on Om, (for) Om is Brahman, beyond fear. For a man, ever fixed in Brahman, there can be no fear anywhere.

Yuñjīta, one should concentrate; cetaķ, the mind; praņave, on Om, as explained, which is essentially the supreme Reality; for praņavaķ, Om; is brahma nirbhayam, Brahman beyond fear; because for one who is ever lixed in it, na bhayam vidyate kvacit, there can be no fear anywhere, in accordance with the Vedic text, 'The enlightened man is not afraid of anything' (Tai. II. ix).

प्रणवो ह्यपरं ब्रह्म प्रणवश्च परः स्मृतः । अपूर्वोऽनन्तरोऽबाह्योऽनपरः प्रणवोऽव्ययः ॥२६॥

26. Om is surely the inferior Brahman; and Om is considered to be the superior Brahman. Om is without cause, without inside and outside, and without effect; and it is undecaying.

Pranavah, Om, is both the superior and inferior Brahman. When the quarters and letters disappear, from the highest standpoint, Om becomes verily the supreme Self that is Brahman. Therefore it is apūrvah, without any cause preceding it. There is nothing inside it that is of a different class; therefore it is anantarah, without inside. Similarly, there is nothing existing outside; therefore it is $ab\bar{a}hyah$, without outside. There is no effect (aparam) of it; therefore it is anaparah, without effect. The idea implied (as a whole) is that it is coextensive with all that is inside or outside; it is verily birthless; and it is a mass of Consciousness, homogeneous like a lump of salt.

सर्वस्य प्रणवो ह्यादिर्मध्यमन्तस्तथैव च। एवं हि प्रणवं ज्ञात्वा व्यक्नुते तदनन्तरम् ॥२७॥

27. Om is indeed the beginning, middle, and end of everything. Having known Om in this way indeed one attains immediately (identity with the Self).

Just like the magician and others, (Om is the) beginning $(\bar{a}di)$, middle (madhya), and end (anta)—the origination, continuance, and dissolution; sarvasya, of all—of the whole phenomenal universe, consisting of space and the rest which originate like a magic elephant, a snake superimposed in a rope, a mirage, a dream, etc. (from the magician and the rest). Evam hi, in this way indeed; $j\bar{n}\bar{a}tv\bar{a}$ pranavam, having known Om, which is the Self and comparable to the magician and the rest; vyaśnute, one attains—identity with the Self, at that very moment. This is the idea.

प्रणवं हीक्वरं विद्यात् सर्वस्य हृदि संस्थितम्। सर्वव्यापिनमोङ्कारं मत्वा धीरो न कोचति॥२८॥

28. One should know Om, to be God seated in the hearts of all. Meditating on the all-pervasive Om, the intelligent man grieves no more.

Vidyāt, one should know; praņavam, Om; as īsvaram, God; existing hrdi, in the heart — the seat of memory

I. 28]

and perception — of all living beings. Matvā, having meditated on (i.e. realized); onkāram, Om, which is the Self beyond the worldly state; and sarvavyāpinam, allpervasive, like space; dhīrah, the intelligent man; na šocati, does not grieve; for no cause of grief can be possible (then) — in accordance with such Vedic texts as, 'A knower of the Self transcends sorrow' (Ch. VII, i, 3).

अमात्रोऽनन्तमात्रइच द्वैतस्योपशमः शिवः । ओङ्कारो विदितो येन स मुनिर्नेतरो जनः ॥२९॥

29. The Om, without measures and possessed of infinite dimension, is the auspicious entity where all duality ceases. He by whom Om is known, is the real sage, and not so is any other man.

Amātrah, (Om) beyond measures, is Turīya. Mātrā, derīved in the sense of that by which anything is measured, signifies dimension; that which has infinite (ananta) dimension is anantamātrah; the idea is that its extension cannot be determined. It is sīvah, auspicious, holy, because it is the state of negation of all duality. Sah yena, he by whom; onkārah, Om, as explained; vidītah, is known; is a munih, sage (lit. a meditator), because of his meditating on the supreme Reality. Na itarah janah, not any other man, even though he may be learned in the scriptures. This is the idea.

CHAPTER II

VAITATHYA-PRAKARANA (ON UNREALITY)

In consonance with such Vedic text as, 'One only, without a second' (Ch. VI. ii. 1), it has been said that duality ceases to exist after realization ($K\bar{a}rik\bar{a}$, I. 18): That is, however, only a scriptural assertion. But this falsity can be confirmed even through reasoning. This is why the second chapter (of the $K\bar{a}rik\bar{a}$) commences:

वैतथ्यं सर्वमावानां स्वप्न आहुर्मनीषिणः । अन्तःस्थानात्तु भावानां संवृतत्वेन हेतुना ॥१॥

1. The wise declare the falsity of all objects in a dream because of the location of the objects inside (the body) and by reason of (the space) being small.

The state of the vitatha, unreal, is vaitathyam, unreality, or falsity. Of what? Sarvabhāvānām, of all objects, both external and internal; that are perceived svapne, in dream. (This is what) manīşiṇaḥ, the wise people, adept in the use of the means of knowledge; āhuḥ, say. The ground of falsity is being stated: antaḥsthānāt, because of existence inside; because of those (bhāvāḥ, things) having their sthāna, place; antaḥ, inside the body; for objects (bhāvāḥ) such as elephants or mountains, are perceived there and not outside the body. Therefore they ought to be false. Objection: This ground of inference (viz existence within) is invalidated by the perception of (real) jars etc. within a house etc.¹

In answer to this objection it is said: samortatuena hetunā, by reason of being small, that is to say, because of the small (-ness of the) space confined within (the body). For mountains and elephants cannot possibly exist within the limited space inside the nerves in the (dreamer's) body. A mountain does not surely exist within a body.

Objection: It is not tenable that the things seen in a dream have a limited space inside (the body); for one sleeping in the east is seen as though dreaming in the north.

Apprehending such an objection the text answers:

अदीर्घत्वाच्च कालस्य गत्वा देशान्न पञ्यति। प्रतिबुद्धद्वच वै सर्वस्तस्मिन्देशे न विद्यते ॥२॥

2. Besides, one does not see places by going there, for the time is not long enough. Moreover every dreamer, when awakened, does not continue in that place (of dream).

One does not dream by going anywhere outside the body; for as soon as one goes to sleep, one sees as though one is dreaming in a place eight hundred miles

¹ So, 'existence within' is no valid ground for inferring that a thing is unreal.

away from the body that can be reached in a month only. Neither is there sufficient time to reach there and come back. Hence adīrghatvāt ca kālasya, inasmuch as the time is not long enough, the dreamer does not go to a different place. Moreover, pratibuddhah ca vai sarvah, every dreamer, when awakened; na vidyate, does not stay, in the places dreamt of. Should one go to a different region in dream, one should wake up in the region of one's dream. But this is not a fact. A man sleeping at night, sees things as though in the day time. And when the dreamer comes into contact with many, he should be acknowledged as such by those whom he meets. But he is not apprehended thus; for if they really contacted him, they would say, 'We noticed you there today.' But this is not so. Therefore he does not go to a different place in dream.

Things seen in a dream are unreal because of this further reason:

अमावक्च रथादीनां श्रूयते न्यायपूर्वकम् । वैतथ्यं तेन वै प्राप्तं स्वप्न आहः प्रकाशितम् ॥३॥

3. Besides, the absence of chariot etc. is heard of in the Upanisad from the standpoint of logic. They say that the falsity arrived at thus (by logic) is reiterated by the Upanisad in the context of dream.

Ca, besides; abhāvaḥ, non-existence; rathādīnām, of chariots etc; śrūyate, is heard of in the Upaniṣad, in the text, 'There are no chariots, nor animals to be yoked to them' (Br. IV. iii. 10); nyāyapūrvakam, from the standpoint of logic. They, the knowers of Brahman, āhuh, say; that the vaitathyam, unreality; prāptam, arrived at; through such reasons as existence inside the body, smallness of the space, etc.; is prakāsitam, revealed by the Upanişad, which reiterates that fact while engaged in establishing (the soul's) self-effulgence; svapne, in dream.

अन्तःस्थानात्तु भेदानां तस्माज्जागरिते स्मृतम् । यथा तत्र तथा स्वप्ने संवृतत्वेन भिद्यते ॥४॥

4. As the dream-objects are unreal in a dream, so also, because of that very reason, the objects in the waking state are unreal. But objects (in the dream state) differ because of existence inside (the body) and because of the smallness (of space).

The proposition (major premiss) to be established is the unreality of objects seen in the waking state. 'Being perceived' is the ground of inference (middle term). And the illustration (in confirmation) is 'like an object seen in a dream'. And the assertion of the presence of the middle term in the minor term is made thus: *Tathā tatra svapne*, as (objects 'perceived') there in a dream, are false; so also are they false jāgarite, in the waking state; the fact of 'being perceived' being equally present. And the concluding reiteration is: *Tasmāt jāgarite smṛtam*, therefore falsity is admitted of objects in the waking state as well. The difference of the dream-objects from the objects of the waking state is antalsthānāt, because of the former being confined within; and samwytatvena, because of the smallness II. 6]

(of space). And the common features in both the states are the facts of being perceived and being false.

स्वप्नजागरितस्थाने ह्येकमाहुर्मनीषिणः । मेदानां हि समत्वेन प्रसिद्धेनैव हेतुना ॥४॥

5. Inasmuch as the diverse things are (found to be) similar on the strength of the familiar ground of inference, the wise say that the dream and the waking states are one.

Samatuena, inasmuch as there is similarity; bhedānām, of the diverse things; prasiddhena eva hetunā, on the strength of the familiar ground of inference, viz that things (in dream and waking states) are equally related as the perceiver and the perceived;¹ therefore the discriminating people speak of the sameness of the states of waking and dream. This is only a corollary of what was arrived at through the earlier means of proof.

आदावन्ते च यन्नास्ति वर्तमानेऽपि तत्तया । वितथैः सदृशाः सन्तोऽवितथा इव लक्षिताः ।।६।।

6. That which does not exist in the beginning and the end is equally so in the present (i.e in the middle). Though they are on the same footing with the unreal, yet they are seen as though real.

The different things noticed in the waking state are

1On the logical ground of 'being perceived'.

unreal for this additional reason that they do not exist in the beginning and at the end. A thing, for instance a mirage, yai, which; na asti, does not exist; ādau ante ca, in the beginning and at the end; tat, that; does not exist even in the middle. This is the ascertained truth in the world. So also these different things seen in the waking state are indeed unreal, they being vitathaih sadīšāh, similar to, (on the same footing with), unreal things like the mirage etc., on account of their non-existence in the beginning and at the end. And yet avitathāh iva laksitāh, they are perceived as though real, by the ignorant who do not know the Self.

Objection: The assertion that the things seen in the waking state are unreal like those seen in the dream is wrong, since objects of the waking state, for instance food, drink, vehicles, etc., are seen to fulfil some purpose by assuaging hunger and thirst and by moving to and fro, whereas dream objects have no such utility. Therefore it is a mere figment of the brain to say that the objects of the waking state are illusory like those of dream.

Answer: That is not so.

Objection: Why?

Answer: Because:

सप्रयोजनता तेषां स्वप्ने विप्रतिपद्यते । तस्मादाद्यन्तवत्त्वेन मिथ्यैव खलु ते स्मृताः ॥७॥

7. Their utility is contradicted in dream. There-

II. 7]

fore from the fact of their having a beginning and an end they are rightly held to be unreal.

Saprayojanatā, the utility, which is noticed (in the waking state), of food, drink, etc.; vipratipadyate svapne, is contradicted in dream. For a man who has got his hunger appeased and thirst quenched by eating and drinking in the waking state, as soon as he goes to sleep, feels as though he is afflicted by hunger, thirst, etc. and has been fasting for a whole day and night. This is similar to the case where, after getting full satisfaction in dream from eating and drinking, he wakes up to feel hunger and thirst. Therefore the objects of the waking state are seen to be contradicted in dream. Accordingly, we are of the opinion that their unreality like that of dream-objects is beyond doubt. Hence from the fact that they possess the common feature of having a beginning and an end, they are rightly held to be unreal.

Objection: From the fact of the similarity of the diverse things in the dream and the waking states, it is wrong to assert that the diversities seen in the waking state are illusory.

Counter-objection: Why?

Opponent: Because the illustration is inapplicable. Counter-objection: How?

Opponent: For, these very same objects seen in the waking state are not experienced in dream.

Counter-objection: What are they then?

Opponent: One sees something novel in a dream. One thinks oneself to be possessed of eight arms and sitting astride an elephant with four tusks. Similarly, too, one sees other grotesque things in a dream. That being dissimilar to any other unreal thing must be true. So the analogy is inapt. Hence it is illogical to say that the waking state is false like dream.

Vedantin: That is not so. The uniqueness that is supposed by you to be seen in a dream is not so by its own right.

Opponent: How is it then?

अपूर्वं स्थानिघर्मो हि यथा स्वर्गनिवासिनाम् । तानयं प्रेक्षते गत्वा यथैवेह सुशिक्षितः ॥८॥

8. The unique attribute is a mere attribute of the experiencer in a particular state, as it is in the case of the dwellers in heaven. This he experiences by going there, just as one, well informed, does in this world.

Apūrvam, the novel attribute; hi sthānidharmah, is a mere quality (dharma) of (sthānī) the man in a certain state, viz the experiencer in the state of dream; yathā svarganivāsinām, as it is with the dwellers of heaven, Indra and others, who have such attributes as the possession of a thousand eyes, and so on.¹ Similarly is this a novel attribute of the dreamer; but it is not there by its own right like the real nature of the seer.

¹ Men who become gods, get such experiences.

 $T\bar{a}n$, these, the unique things of this kind that are creations of his mind; *ayam*, this one, the man in that state, the dreamer; *preksate*, sees; *gatvā*, by going, to the dream state. As *iha*, in this world; *sušikşitah*, a man well informed about the way leading to another region, goes along that way to that other region and sees those objects, so is the case here. Hence, just as the appearances of things in certain states, such as a snake on a rope or a mirage in a desert, are unreal, similarly the novelties experienced in a dream are merely attributes of the dreamer in that state; and therefore they are unreal. Accordingly, the analogy of the dream is not inapplicable.

The assumption of uniqueness in the illustration of dream has been demolished. Now the $K\bar{a}rik\bar{a}$ again proceeds by way of dilating on the similarity of objects of the waking and dream states:

स्वप्नवृत्तावपि त्वन्तश्चेतसा कल्पितं त्वसत् । बहिश्चेतोगृहीतं सद्दृष्टं वैतथ्यमेतयोः ।।६।।

9. Even in the dream state itself, anything imagined by the inner consciousness is unreal, while anything experienced by the outer consciousness is real. (But) both these are seen to be false.

Svapnavrttau api, even in the dream state; anything experienced antascetasā, by the internal consciousness, anything called up by our fancy; is asat, unreal, since it ceases to be perceived the very moment after being imagined. In that very dream again, whatever is perceived, for instance a pot, which was (earlier) grhītam, perceived; bahišcetasā, by external consciousness, through the eye etc., is sat, real. Thus, though it is definitely known that dream experiences are false, still a division of true and false is seen there. Nevertheless, vaitathyam dṛṣṭam, unreality is perceived, for both kinds of things, be they imagined by inner or outer consciousness.

> जाग्रद्वृत्तावपि त्यन्तइचेतसा कल्पितं त्यसत् । बहिइचेतोगृहीतं सद्युक्तं वैतथ्यमेतयोः ॥१०॥

10. Even in the waking state, whatever is imagined by the inner consciousness is false and whatever is perceived by the outer consciousness is true. It is reasonable that both these should be unreal.

It is reasonable to say that both the (so-called) true and false are unreal, for they are equally imagined either by the internal or external consciousness. The remaining portion is as already explained.

The opponent says:

उभयोरपि वैतथ्यं भेदानां स्थानयोर्यदि। क एतानु बुघ्यते मेदानु को वै तेषां विकल्पकः ॥११॥

11. If all objects in both the states be unreal, who apprehends these objects and who indeed is their creator?

Yadi, if; there be vaitathyam, unreality; bhedānām,

of the objects; sthānayoh, in the two—waking and dream—states; then kah, who; is it that budhyate, cognizes; etān, these, which are imagined inside and outside the mind; and kah vai tesām vikalpakah, who is indeed their (imaginer,) creator? The idea implied is this: If you do not want to adopt a theory of the non-existence of the Self, (and want to posit something behind phenomena), then who is the support of memory and knowledge?

(The answer is:)

कल्पयत्यात्मनाऽऽत्मानमात्मा देवः स्वमायया। स एव बुध्यते मेदानिति वेदान्तनित्रचयः ॥१२॥

12. The self-effulgent Self imagines Itself through Itself by the power of Its own Māyā. The Self Itself cognizes the objects. Such is the definite conclusion of Vedānta.

Svamāyayā, through Its own Māyā; devah ātmā, the self-effulgent Self Itself; kalpayati, imagines; Its own ātmānam, Self, in the Self Itself, to be possessed of different forms to be spoken of later, just as snakes etc. are imagined on rope etc. And in the very same way It Itself budhyate, cognizes; those bhedān, objects; iti, such; is vedāntaniścayah, the definite conclusion of Vedānta. There is nothing else (but the Self) as the support of cognition and memory; nor are cognition and memory without support as is held by the Nihilists. This is the idea. į

While imagining, in what way does the Self do so? This is being answered:

विकरोत्यपरान्मावानन्तर्श्चित्ते व्यवस्थितान् । नियतांश्च बहिश्चित्त एवं कल्पयते प्रमुः ॥१३॥

13. The Lord manifests diversely the mundane things existing in the mind. Turning the mind outward, He creates the well-defined things (as well as the undefined things). Thus does the Lord imagine.

(Prabhuh, the Lord); vikaroti, manifests diversely; aparān, the non-transcendental, mundane; bhāvān, objects, such as sound and other unmanifested objects; vyavasthitān, existing; antaścitte, inside the mind, in the form of impressions and tendencies. And bahiścittah (san), having the mind turned outward; (the Lord manifests diversely) niyatān, things well-defined, such as the earth etc. — as also those not well-defined, that exist so long as the imagination lasts. Similarly (He manifests diversely) such things as mental desires by making His mind turn inward. Evam, in this way; prabhuh, the Lord, God, that is to say, the Self, imagines.

The assertion that everything is a subjective creation like dream is questioned, for, unlike the subjective creations, to wit, desire etc., that are circumscribed by the mind, the external objects are mutually determined.

चित्तकाला हि येऽन्तस्तु द्वंयकालाश्च ये बहिः। कल्पिता एव ते सर्वे विशेषो नान्यहेतुकः ॥१४॥ II. 15]

14. Things that exist internally as long as the thought lasts and things that are externally related to two points of time, are all imaginations. Their distinction is not caused by anything else.

Cittakālāh hi ye antah tu, things that exist internally as long as the thought lasts: those that are circumscribed by the mind thought and those that have no time for determining them apart from the time for which their thought lasts are *cittakālāh*, existing as long as the thought lasts. The idea is that they are apprehended only during the time of their imagina-tion. Dvayakālāh, those that are possessed of two times, i.e. which are related to different times, which are mutually determined. As for instance, 'He stays during the milking', which means that the cow is milked as long as he stays, and he stays as long as the cow is milked. 'This one lasts for that time'; 'That one lasts for this time' - thus, external factors mutually determine each other. They are thus related to two points of time. Whether they be subjective, lasting for the time of the thought, or objective, related to two points of time, kalpita eva te sarve, they are all but fancies. The fact that external objects have the distinction of being related to two points of time, na anya hetukah, has no other reason but that of being imagined. Here, too, the illustration of dream fits in.

अव्यक्ता एव येऽन्तस्तु स्फुटा एव च ये बहिः। कल्पिता एव ते सर्वे विशेषस्त्विन्द्रियान्तरे॥१४॥

15. Those objects that appear indistinct inside the

mind, and those that appear vivid outside, are all merely created by imagination. Their distinction is to be traced to the difference in the organs of perception.

The fact that things in the mind, called up by mere mental impressions, have an indistinctness, while externally, as objects of the sense of sight etc., they have a vividness, (that fact) is not due to the existence of the objects themselves; for this distinction is noticed even in dream. To what is it due then? This is caused by the difference in the organs of perception. Hence it is proved that the things of the waking state are as much a creation of imagination as the dream objects.

What is the root of imagining that the external and the mental objects are mutually related by way of causation? The answer is:

जीवं कल्पयते पूर्वं ततो मावान् पृथग्विधान् । बाह्यानाध्यात्मिकांश्चैय यथाविद्यस्तथास्मृतिः ॥१६॥

16. First He imagines the individual (soul) and then He imagines the different objects, external and mental. The individual gets his memory in accordance with the kind of thought-impressions he has.

Like the fancying of a snake in a rope, He pūrvam kalpayate, first imagines; jīvam, the individual — who is a bundle of causes and effects expressing themselves through such beliefs as, 'I act; and mine are the (resulting) sorrows and happiness' — on the pure Self

that is devoid of such characteristics. After that, for his sake, He (the Lord) imagines different objects, such as the vital force and so on, bahyan adhyatmikan ca eva, both external and mental, dividing them into action, instruments, and results. As to that, what is the reason for that imagination? That is being stated. The individual that is imagined by (the Lord) Himself and is himself capable of imagination, gets a memory, yathavidyah, in accordance with the kind of thoughtimpressions that he is possessed of; that fact is alluded to by tathāsmrtih, he is possessed of that kind of memory. Hence, from the apprehension of some fancy as the cause, there follows the apprehension of the result;1 from that (awareness of causal relation) follows the memory of the cause and the effect, and from that follows their apprehension, as well as the awareness of the action and accessories that this apprehension of causality leads to, and the awareness of the different results following from those actions etc.² From their awareness arises their memory; and from that memory again arises their awareness. In this way He imagines diversely the things, both external and mental to be mutually the causes and effects.

In the previous verse it has been said that the im-

¹ If there is cating and drinking, there follows satisfaction; if eating and drinking are absent, satisfaction is wanting; from this the fancy follows that eating etc. are the causes of satisfaction.

² From the above awareness follows memory on another occasion; from that arises the awareness of the need of action with regard to similar factors that are supposed to lead to satisfaction; from that follows cooking, getting of rice, and producing the result. agining of individuality is the root of all other imaginations. Through an illustration is being shown what that imagining of an individual soul is due to:

अनिइिचता यथा रज्जुरन्धकारे विकल्पिता। सर्पधारादिमिर्मावैस्तद्वदात्मा विकल्पितः ॥१७॥

17. As a rope whose nature has not been well ascertained is imagined in the dark to be various things like a snake, a line of water, etc., so also is the Self imagined variously.

As it happens in common experience, that a rajjuh, rope; that is aniscitā, not well ascertained, in its true reality as 'This is so indeed'; is vikalpita, imagined variously, in hazy darkness, as a snake, a line of water, or a stick, just because its real nature has not been determined earlier-for if the rope had been ascertained earlier in its own essence, there would not have been such imaginations as of a snake etc., as for instance, there is no such imagination with regard to the fingers in one's own hands; this is the illustration-similarly, the Self is imagined to be such countless diverse objects as an individual creature or the vital force etc., just because It has not been ascertained in Its true nature to be pure intelligence, existence, and non-duality, and different from such evils as cause and effect that are the characteristics of the world. This is the conclusion of all the Upanisads.

> निश्चितायां यथा रज्ज्यां विकल्पो विनिवर्तते । रज्जुरेवेति चाद्वैतं तद्वदात्मविनिश्चयः ।।१८।।

II. 19]

18. As illusion (on the rope) ceases and the rope alone remains when the rope is ascertained to be nothing but the rope, so also is the ascertainment about the Self.

As on the ascertainment that it is rajjuh eva, nothing but a rope, all the imaginations disappear and there remains the rope alone without anything else, so also from the scriptural text, 'Not this, not this' (Br. IV. iv. 22), establishing the Self as devoid of all worldly attributes, there dawns, as a result of the light of the sun of realization, this *ātma-vinišcuyah*, firm conviction about the Self, viz 'the Self indeed is all this' (Ch. VII. xxv. 2), (the Self is) 'without anterior or posterior, without interior or exterior' (Br. II. v. 19), 'since He is coextensive with all that is external and internal and since He is birthless' (Mu. II. i. 2), 'Undecaying, immortal, undying, fearless' (Br. IV. iv. 25), 'One only, without a second' (Ch. VI. ii. 1).

If it be a well ascertained truth that the Self is but one, why is It imagined as so many of these infinite things like the vital force etc. that constitute phenomenal existence? To this hear the answer:

प्राणादिभिरनन्तैञ्च भावैरेतैविकल्पितः । मायैषा तस्य देवस्य यया संमोहितः स्वयम् ।।१६।।

19. (This Self) is imagined to be the infinite objects like Prāna (the vital force) etc. This is the Māyā of that self-effulgent One, by which He Himself is deluded. Esā māyā, this is the Māyā; tasya devasya, of that self-effulgent Self. As the magical spell created by the magician makes the very clear sky appear as though filled with leafy trees in bloom, similar is this Māyā of the self-effulgent One, by which He Himself seems to have become influenced like a man under delusion. It has been said, 'My Māyā is difficult to get over' (G. VII. 14).

प्राण इति प्राणविदो भूतानीति च तद्विवः । गुणा इति गुणविदस्तत्त्वानीति च तद्विवः ॥२०॥

20. Those who know $Prana^1$ consider Prana (to be the reality). The knowers of the elements consider the elements to be so,² the knowers of the qualities (gunas) cling to the qualities,³ and the knowers of the categories swear by them.⁴

पादा इति पादविदो विषया इति तद्विदः । लोका इति लोकविदो देवा इति च तद्विदः ॥२१॥

21. The knowers of the quarters (viz Viśva, Taijasa, and Prājňa) consider the quarters to be the reality.

¹ Hiranyagarbha or the immanent God. This is the view of the worshippers of Hiranyagarbha and of the Vaiseşikas.

2. The Lokayata materialists swear by the four elements -- earth, water, fire, and air.

³ The Sāmkhyas hold to Sattva, Rajas, and Tamas, which are the constituents (gunas, lit. qualities) of Prakrti.

⁴ The Saivas hold that the three categories — Self, ignorance, and Siva — are the source of the world.

II. 23] VAITATHYA-PRAKARAŅA

The knowers of the sense-objects 1 consider the senseobjects to be so. According to the knowers of the worlds, the worlds constitute reality.² And the worshippers of the gods stand by the gods.

वेवा इति वेदविदो यज्ञा इति च तद्विदः। भोक्तेति च भोक्तूविदो मोज्यमिति च तद्विदः॥२२॥

22. The Vedic scholars ascribe reality to the Vedas, while the sacrificers³ ascribe this to the sacrifices. Those acquainted with the enjoyer consider it to be the reality,⁴ whereas those 5 conversant with the enjoyable things consider them to be so.

सूक्ष्म इति सूक्ष्मविवः स्थूल इति च तद्विवः। मूर्त इति मूर्तविदोऽमूर्त इति च तद्विवः॥२३॥

23. People conversant with the subtle consider reality also to be so, while others dealing with the gross consider it to be so. The worshippers of God with forms consider reality as possessed of forms,⁶ whereas those⁷ who swear by formlessness call it a void.

¹ The followers of Vātsyāyana and others.

² The Pauranikas understand the earth, the intermediate world and heaven to be eternal realities.

³ Like Baudhäyana.

⁴ The Sāmkhya view is that the Self is an enjoyer but not an agent of work.

⁵The cooks.

6E.g. Śiva or Vișņu.

7 The Nihilists.

काल इति कालविदो दिश इति च तद्विदः। वादा इति वादविदो मुवनानीति तद्विदः॥२४॥

24. The calculators of time (the astrologers) call it time. The knowers of the directions consider them real. The dabblers in theories 1 accept these to be so. And the knowers of the universe consider the (fourteen) worlds to be so.

मनं इति मनोविवो बुद्विरिति च तद्विदः । चित्तमिति चित्तविदो धर्माधर्मौ च तद्विदः ॥२४॥

25. The knowers² of the mind call it the Self, whereas the knowers³ of intelligence take it for the reality. The knowers⁴ of ideas consider them to be the reality. And the knowers⁵ of virtue and vice attribute reality to them.

पञ्चीवंशक इत्येके षड्विंश इति चापरे। 🚓 एर्कात्रंत्राक इत्याहरनन्त इति चापरे॥२६॥

26. Some6 say that reality is constituted by twenty-

¹ That the metals, *mantras*, etc. hold in them the secret of immortality.

² A class of materialists.

³A class of Buddhists.

⁴ The Buddhists who swear by subjective ideas which have no corresponding external things.

⁵ The Mīmāmsakas.

⁶ The Puruşa (the conscious individual soul), Pradhāna or Prakrti (Nature), Mahat (intelligence), Ahamikāra (egoism), the five subtle elements, five senses of perception, five organs of action, five sense-objects, and mind. This is the Sāmkhya view. II. 28]

five principles, while others 1 speak of twenty-six. Some 2 say that it consists of thirty-one categories, while according to others they are infinite.

लोकाँल्लोकविदः प्राहुराश्रमा इति तद्विदः । स्त्रीपुंनपुंसकं लैङ्गाः परापरमथापरे ॥२७॥

27. Adepts in human dealings say that the people (that is to say, people's pleasures) are the real things. Persons conversant with the stages of life hold those to be the reality. The grammarians hold the view that words belonging to the masculine, feminine, and neuter genders are the reality; while others know reality to be constituted by the higher and lower (Brahmans).

सृष्टिरिति सृष्टिविदो लग इति च चढिदः। स्थितिरिति स्थितिविदः सर्वे चेह तु सर्वदा॥२८॥

28. People conversant with creation call creation to be the reality. The knowers of dissolution call it dissolution. The knowers of subsistence call it subsistence. All these ideas are for ever imagined on the Self.

(20-28.) Prāņa means Prājňa, the Self in the state of latency. Everything else, ending with subsistence,

1 The above 25 and God, according to Patañjali.

² The Pāśupatas add rāga (attachment), avidyā (ignorance), niyati (fate), kālakalā (divisions of time), and Māyā (cosmic illusion) to the above 26. is only His product. And similarly all other popular ideas, conceived by every being, like a snake etc. on a rope, are mere imaginations on the Self that is devoid of all of them; and these are caused by ignorance consisting in the non-determination of the nature of the Self. This is the purport (of these verses) as a whole. No attempt is made to explain each of the words in the verses starting with the word Prāṇa, since this is of little practical value and since the meanings of the terms are clear.

यं भावं दर्शयेद्यस्य तं भावं स तु पञ्चति । तं चावति स भूत्वाऽसौ तद्ग्रहः समुपैति तम् ॥२६॥

29. Anyone to whom a teacher may show a particular object (as the reality) sees that alone. And that thing, too, protects him by becoming identified with him. That absorption leads to his self-identity (with the object of attention).

To be brief, yasya, anyone to whom; a teacher or any other trustworthy person; darsayet, may show; any bhāvam, positive object, enumerated or not, from among such things as Prāṇa and the rest, by saying, 'This is verily the reality'; saḥ, he (that instructed man); pasyati, sees; tam bhāvam, that object, by identifying it with himself as either 'I am this' or 'This is mine'. Ca, and; saḥ, that, that object that was shown; avali, protects; tam, him, that seer; asau bhūtvā, by becoming one with him; that is to say, that object occupies his attention to the exclusion of all others and keeps him confined within itself. Tadgrahaḥ means II. 30]

the state of being taken up with that, absorption in it under the idea, 'This is the reality'. The absorption, (samupaiti) tam, approaches him, viz the one who has accepted (the thing); that is to say, it culminates in identification with him.

एतैरेषोऽपृथग्भावैः पृथगेवेति लक्षितः । एवं यो वेद तत्त्वेन कल्पयेत् सोऽविज्ञङ्कितः ।।३०।।

30. Through these things that are (really) nondifferent (from the Self), this One is presented as though really different. He who truly knows this grasps (the meaning of the Vedas) without any hesitation.

Etaih, through these, viz Prāņa, etc; aprthaghhāvaih, through these things that are non-different from the Self; eşah, this One, the Self; lakşitah, is pointed out, is believed in by the ignorant; prthak eva iti, as though really different, just as a rope is considered to be diverse imaginary things like snake etc. This is the meaning. The idea is this: Just as to the discriminating people, the snake etc. do not exist apart from the rope, so also Prāņa etc. have no existence apart from the Self. And this is in accord with the Vedic text, 'All these are (but) the Self' (Br. II. iv. 6). *Tah veda*, he who knows; evcm thus; tattvena, truly knows from Vedic texts and from reasoning, that all things imagined on the Self are unreal apart from the Self, like the snake imagined in the rope, and knows that the Self is transcendental and untouched by illusion; sah, he; kalpayet, (i.e. kalpayati), grasps, the meanings of the Vedas in their respective contexts; avišankitah, without any hesitation; he understands that a certain passage means this and a certain other means that. None but a knower of the Self can understand truly the purport of the Vedas. Thus indeed is the statement of Manu: '... none but a knower of the Self can derive any benefit from the valid means of knowledge'¹ (M. VI. 82).

It is being stated that this unreality of duality that has been established logically is also derived from the valid evidence of Vedanta:

स्वप्नमाये यथा दृष्टे गन्धर्वनगरं यथा। तथा विश्वमिदं दृष्टं वेदान्तेषु विचक्षणैः ।।३१।।

31. Just as dream and magic are seen to be unreal, or as is a city in the sky, so also is this whole universe known to be unreal from the Upanişads by the wise.

Svapna-māye, dream and magic, though unreal, being constituted by unreal things, are considered by the non-discriminating people to be constituted by real things. Again, just as gandharvanagaram, an illusory city in the sky—appearing to be full of shops replete with vendable articles, houses, palaces, and villages

¹ This is Ananda Giri's interpretation of the word kriyāphala, where kriyā (action) stands for any valid means of knowledge; and its *phala* (result) is the knowledge of Reality; for, even kriyā in the sense of Vedic rites etc. is meant to serve the purpose of Illumination by purifying the aspirant's heart. bustling with men and women-is seen to vanish suddenly before one's very eyes; or just as the svapnamaye, dream and magic; drste, are seen - to be unreal; tatha, similarly; idam visuam, this whole universe, this entire duality; drstam, is viewed, as unreal. Where? That is being stated. Vedānteşu, in the Upanişads, as for instance in, 'There is no difference whatsoever in It' (Br. IV. iv. 19; Ka. II. i. 11), 'The Lord on account of Maya is perceived as manifold' (Br. II. v. 19), 'This was but the Self in the beginning-the only entity' (Br. I. iv. 17), 'In the beginning is the only entry man, one only' (Br. I. iv. 11), 'It is from a second entity that fear comes' (Br. I. iv. 2), 'But there is not that second thing' (Br. IV. iii. 23), 'But when to the knower of Brahman everything has become the Self (Br. IV. v. 15), and so on. (This is known) vicaksanaih, by those who are better acquainted with things, i.e. by the learned. This view is supported by the following Smrti text of Vyāsa: '(This universe) is viewed (by the wise) as (unreal) like a crack on the ground that a rope appears to be in darkness, or as always (unstable) like bubbles created by rain, devoid of bliss and ceasing to exist after dissolution."

न निरोघो न चोत्पत्तिर्न बढ़ो न च साधकः। न मुमुक्षुर्न वै मुक्त इत्येषा परमार्थता।।३२।।

32. There is no dissolution, no origination, none in bondage, none striving or aspiring for salvation, and none liberated. This is the highest truth. This verse is meant to sum up the purport of this chapter. If from the standpoint of the highest Reality, all duality is unreal, and the Self alone exists as the only Reality, then it amounts to this that all our dealings, conventional or scriptural, are surely matters of ignorance, and then there is na nirodhah, no dissolution - nirodha being the same as nirodhana, stoppage-utpattih, origination; baddhah, one under bondage, a transmigrating individual soul; sādhakah, one who strives for liberation; mumuksuh, one who hankers after liberation; muktah, one who is free from bondage. In the absence of origination and dissolution, bondage etc. do not exist. *Iti eşā paramārthatā*, this is the highest Truth. How can there be absence of origina-tion and dissolution? The answer is: Because of the absence of duality. The non-existence of duality is established by various Vedic texts such as, 'Because when there is duality, as it were' (Br. II. iv. 14), '(He goes from death to death) who sees difference, as it goes from death to death) who sees difference, as it were, in It' (Br. IV. iv. 19; Ka. II. i. 10), 'All this is but the Self' (Ch. VII. xxv. 2), 'All this is but Brahman' (Nr. U. 7), 'One only, without a second' (Ch. VI. ii. 1), '(This Brāhmaṇa, ...), and this all are this Self' (Br. II. iv. 6; IV. v. 7). Origination or dissolution can belong only to a thing that has exist-ence, and not to one that is non-existent like the horn of a hare. Nor can the non-dual have either birth or death. For it is a contradiction in terms to say that a thing is non-dual and yet has birth and death. And as for the empirical experience of Prāna etc., it has been already stated that it is all a superimposition on the Self, like a snake on a rope. Indeed, such a mental

illusion¹ as the fancying of a rope for a snake does not either originate from or merge in the rope.² Nor does the rope-snake originate in the mind and merge there,³ nor does it do so from both (the rope and the mind).⁴ Similar is the case with duality which is equally a mental illusion, for duality is not perceived in a state of concentration or deep sleep. Therefore it is established that duality is a mere figment of the brain. And therefore it has been well said that since duality does not exist, the highest Truth consists in the non-existence of dissolution and the rest.

Objection: If such be the case, then the scriptures have for their objective only the proving of the nonexistence of duality, not the proving of the existence of non-duality, the two objectives being contradictory. And as a result, one will be landed into nihilism, inasmuch as non-duality has no evidence in its support and 'duality is non-existent.

Answer: Not so, for why should you revive a point already dismissed with the statement that illusions, like that of a snake on a rope, cannot occur without a substratum?

To this the objection is raised thus: The rope that is

¹A creation of ignorance subsisting in the mind.

² For the birth or death of an illusion is equally illusory. If these be objectively real, the snake should be perceived by all who see the rope.

³ For if birth and death are only subjective, the snake should not be perceived outside.

⁴ For it is not experienced as such.

supposed to be the substratum of the illusion of the snake is itself non-existent, and hence the analogy is irrelevant.

Answer: Not so, for even when the illusion disappears, the non-illusory substratum can continue to exist by the very fact of its being non-illusory.

Objection: The non-dual (substratum), too, is unreal like the snake fancied on a rope.

Answer: It cannot be so, for just as the rope constituting a factor in the illusion (of the snake) exists as an unimagined entity even before the knowledge of the non-existence of the snake, so also the non-dual (Self) eternally exists as a non-imagined entity. Besides, the being who is the agent of the imagination cannot be non-existent, since his existence has to be admitted antecedent to the rise of the illusion.¹

Objection: But if the scriptures do not deal with the Self as such, how can they lead to a cessation of the awareness of duality?

Answer: That is no defect, for duality is superimposed on the Self through ignorance, just as a snake is on a rope.

Objection: How?

¹ The Self has to be assumed as the substratum of the illusory appearance of duality; It survives all illusions as the witness of their disappearance; and as a matter of course It precedes the illusion. Therefore there can be no question of nihilism even on the supposition that the Self is not presented positively by the Upanişads.

Answer: All such conceptions as, 'I am happy, miserable, ignorant, born, dead, worn out, embodied; I see; I am manifest and unmanifest, agent and enjoyer of fruits, related and unrelated, emaciated and old, these are mine,' - are superimposed on the Self. The Self permeates all these ideas, for It is invariably present in all of them, just as a rope is present in all its different (illusory) appearances as a snake, a line of water, etc. Such being the case, the knowledge of the nature of the substantive (Self) has not to be generated by scriptures, since It is self-established. The scriptures are meant for proving something that is not already known, for should they restate something that is already known they will lose their validity¹. Since the Self is not established in Its own nature owing to the obstacle of such attributes as happiness that are superimposed by ignorance, and since remaining established in Its own reality is the highest goal, therefore the scriptures aim at removing from the Self the ideas of Its being happy and the rest by generating with regard to It the ideas of Its not being happy etc. through such texts as 'Not this, not this' (Br. IV. iv. 22), 'Not gross' (Br. III. viii. 8), etc. Unlike the real nature of the Self, the attributes of being unhappy etc., too, are not invariably present in consciousness simultaneously with such attributes as being happy etc.;² for if they were intrinsically

¹ Validity consisting in presenting something not known otherwise and not sublated later.

² If the attribute of 'being not happy' etc. are natural to the Self, why should they not accompany every perception of the latter? The answer is: The Self may reveal Itself, and yet the opposition

[II. 32

present, there can be no such distinguishing attribute as being happy etc. superimposed on It, just as there can be no coldness in fire possessed of the specific characteristic of heat. Therefore, it is in the attributeless Self that the distinct characteristics of being happy etc. are imagined. And as for the scriptural texts speaking of the absence of happiness etc. in the Self, it is proved that they are merely meant to remove the specific ideas of happiness etc. from It. And in support of this is the aphorism of those who are versed in the meaning of scriptures: 'The validity of the scriptures is derived from their negation of positive qualities from the Self.'¹

The reason for the preceding verse is being adduced:

भावैरसद्भिरेवायमद्वयेन च कल्पितः। भावा अप्यद्वयेनैव तस्मादद्वयता क्षिवा॥३३

33. This Self is imagined to be the unreal things and also to be non-dual; and these perceived things are also imagined on the non-dual Self. Therefore non-duality is auspicious.

between Its 'being not happy' etc. and Its empirical modes of 'being happy' etc. may not become patent owing to the influence of human ignorance.

I This is a quotation from Dravidācārya. The idea is this: 'Though words may not have any positive meaning with regard to Brahman, the validity of the scripture is well established; for the words, that are associated with negation and are well known as denoting the absence of qualities, eliminate all duality from the Self.'

In (such illusions as) 'This is a snake', 'This is a stick', 'This is a streak of water', etc. the very thing called rope is imagined to be such unreal things as a snake, a streak of water, etc., and also as the one real thing - the rope; similarly, the Self is imagined to be such multifarious unreal things as Prana etc. which do not exist. But this is not done from the standpoint of reality, for nothing can be pointed out by anybody unless the mind is active, nor can the Self have any movement. And things, perceivable to the unsteady mind alone, cannot be imagined to subsist in reality.¹ Therefore though the Self is ever of the same nature. It alone is imagined to be such unreal things as Prana etc., and again as existing in Its own nature of non-duality and absolute Reality. It is supposed to be the substratum of everything, just as a rope is of the snake etc. And those perceived entities, too, viz Prana and the rest, are imagined by virtue of the existence of the Self that is verily non-dual, for no illusion can be perceived that is without a substratum. Thus since non-duality is the substratum of all illusion, and since this non-duality is ever unchanging in its own nature, advayatā, non-duality; is Sivā, auspicious, even in the state of illusion. But the illusions alone are evil, for they generate fear like that from the snake seen on a rope for instance. Nonduality is free from fear; hence that alone is auspicious.

¹ 'Diversity perceived on the motionless Self cannot be fancied to have real existence' is the interpretation according to Ananda Giri, who takes 'motionless' as the meaning of '*pra-calita*, that in which motion is absent'.

नात्मसावेन नानेदं न स्वेनापि कथंचन।

न पृथङ् नापृथक् किंचिदिति तत्त्वविदो विदुः ॥३४॥

34. This world, when ascertained from the standpoint of its essential nature, does not exist as different. Nor does it exist in its own right. Nor do phenomenal things exist as different or non-different (from one another or from the Self). This is what the knowers of Truth understood.

Why, again, is non-duality auspicious? Inauspiciousness is to be found where there is diversity or, in other words, where there is difference of one thing from another. For idam, this, the manifold phenomenal world, consisting of Prāņa, etc.; when ascertained ātmabhāvena, from the standpoint of its essential nature, from the standpoint of supreme Reality; does not exist as nānā, multifarious, or as a different substance in this non-dual Self which is the absolute Reality, just as an illusory snake has no separate existence when it is found out with the help of a light to be identical with the rope. Besides, this world never exists svena, in its own nature, in the form of Prana etc., verily because of its having been imagined like a snake on a rope. Similarly, the objects, called Prana etc., are not distinct from each other in the sense that a buffalo exists as something different from a horse. Accordingly, just because of the unreality (of duality) there is nothing that can exist as non-separate from one another or from the supreme Self. The Brahmanas, the knowers of the Self, viduh realized, the supreme Reality; iti, thus. Hence non-duality is auspicious, for it is free from the causes of evil. This is the purport.

II. 36]

The perfect realization, as described above, is being extolled:

वीतरागभयक्रोधैर्मुनिभिर्वेदपारगैः । निर्विकल्पो ह्ययं दृष्टः प्रपञ्चोपज्ञमोऽद्वयः ॥३५॥

35. This Self that is beyond all imagination, free from the diversity of this phenomenal world, and non-dual, has been seen by the contemplative people, versed in the Vedas and unafflicted by desire, fear, and anger.

Munibhih, by the constantly contemplative people, by the discriminating ones, from whom have been removed for ever-attachment, fear, envy, anger, and all other faults; vedapāragaih, by those who have understood the secrets of the Vedas, by the enlightened souls; by those who are devoted to the purport of the Upanisads; drstah, has been realized; ayam, this Self; which is nirvikalpah, devoid of all imaginations; and which is prapañcopasamah: prapañca is the vast expanse of the variegated phenomenal world, and the Self in which there is the upasama, total negation, of this, is the prapañcopasama. And therefore It is advayah, without a second. The idea is that the supreme Self is realizable only by the men of renunciation who are free from blemishes, who are learned, and who are devoted to the purport of the Upanisads, but not so by the logicians and others whose hearts are tainted by attachment etc. and whose philosophies are prejudiced by their own outlooks.

> तस्मादेवं विदित्वैनमद्वैते योजयेत् स्मृतिम् । अद्वैतं समनुप्राप्य जडवल्लोकमाचरेत् ॥३६॥

36. Therefore, after knowing it thus, one should fix one's memory on (i.e. continuously think of) nonduality. Having attained the non-dual, one should behave in the world as though one were dull-witted.

Since non-duality is auspicious and free from fear by virtue of its being by nature devoid of all evil, therefore viditoā enam, having known it; evam, thus; yojayet smŗtim, one should fix one's memory; advaite, on nonduality; i.e. one should practise recollection for the realization of non-duality.¹ And having comprehendéd that non-duality etc., having realized directly and immediately that Self that is beyond hunger etc., birthless, and above all conventional dealings after attaining the consciousness, 'I am the supreme Brahman'—lokam ācaret, one should behave in the world; jadavat, like a dull-witted man, that is to say, without advertising oneself as 'I am such and such'.

It is being stated as to what should be the code of conduct according to which he should behave in the world:

निस्तुर्तिनिर्नमस्कारो निःस्वधाफ़ार एव च। चलाचलनिकेतइच यतिर्यादुच्छिको मवेत्।।३७।।

37. The mendicant should have no appreciation or greetings (for others), and he should be free from

¹ Even after knowing the import of the Upanisads, there is need of continuously revolving in one's mind those ideas so that they may become firmly rooted. II. 38]

rituals. He should have the body and soul as his support, and he should be dependent on circumstances.

Giving up all such activities as appreciation or greeting; that is to say, having given up all desire for external objects and having embraced the highest kind of formal renunciation, in accordance with the Vedic text, 'Knowing this very Self, the Brähmanas renounce (... and lead a mendicant life)" (Br. III. v. 1), and the Smrti text, 'With their consciousness in That (Brahman), their Self identified with That, ever intent on That, with That for their supreme goal' (G. V. 17) —. Cala, the changing, is the body, since it gets transformed every moment; and acala, the unchanging, is the reality of the Self. Whenever perchance, impelled by the need of eating etc., one thinks of oneself as 'I' by forgetting the reality of the Self which is one's niketa, support, one's place of abode, and which is by nature unchanging like the sky, then the cala, changing body, becomes his niketa, support. The man of illumination who thus has the changing and the unchanging as his support, but not the man who has external objects as his support, is the calacalaniketa. And he bhavet, should be; yādrcchikah, dependent on circumstances; that is to say, he should merely depend on strips of cloth, coverings and food that come to him by chance for the maintenance of the body.

> तत्त्वमाध्यात्मिकं दृष्ट्वा तत्त्वं दृष्ट्वा तु बाह्यतः । तत्त्वीभूतस्तदारामस्तत्त्वादप्रच्युतो भवेत् ॥३८॥

38. Examining the Reality in the context of the individual and in the external world, one should become identified with Reality, should have his delight in Reality, and should not deviate from Reality.

The external entities such as the earth, and the personal entities such as the body, are unreal like the snake imagined on a rope or like dream, magic, etc., in accordance with the Vedic text, 'All transformation has speech as its basis, and it is name only' (Ch. VI. iv. 1); and the Self is that which exists within and without, that is birthless, without cause and effect, without any inside or outside, full, all-pervasive like space, subtle, motionless, attributeless, partless, and actionless, as is indicated in the Vedic Text, 'That is Truth. That is the Self. That thou art' (Ch. VI. viiixii). Drstvā, having seen — the Reality in this way; tattvībhūtah, (one should) become identified with Reality; tadārāmah, (one should) have one's delight only in the Self, and not in anything external—like one lacking in realization, who accepts the mind as the Self, and thinks the Self to be changing in accordance with the changes of the mind, or at times accepts the body etc. to be the Self and thinks, 'I am now alienated from reality that is the Self'; and who at times when the mind becomes concentrated, thinks himself to be united with Reality and in peace under the belief, 'I am now identified with Reality'. The knower of the Self should not be like that, because the nature of the Self is ever the same, and because it is impossible for It to change Its nature; and one

should be for ever *apracyulak*, unwavering from Reality under the conviction, 'I am Brahman', that is to say, he should ever have the consciousness of the Reality that is the Self, in accordance with such Smrti texts as, '(The enlightened man) views equally a dog or an outcast' (G. V. 18), '(He sees who sees the supreme Lord) existing equally in all beings' (G. XIII. 27), etc.

CHAPTER III

ADVAITA-PRAKARANA (ON NON-DUALITY)

In the course of determining the nature of Om (in Chap. I) it was stated as a mere proposition that the Self is the negation of the phenomenal world, and is auspicious and non-dual. It was further said that 'duality ceases to exist after realization' (Kārikā, I. 18). As to that, the non-existence of duality was established by the chapter 'On Unreality' with the help of such analogies as dream, magic, and a city in space, and through logic on the grounds of 'being perceived', 'having a beginning and an end', and so on. Should non-duality be admitted only on the authority of scripture (and tradition), or should it be accepted on logical grounds, too? In answer to this it is said that it can be known on logical grounds as well. The chapter 'On Non-duality' starts to show how this is possible. It was concluded in the preceding chapter that all diversity, comprising the worshipped, worship, and so on, is unreal and the absolute, non-dual Self is the highest Reality; for-

उपासनाश्रितो धर्मो जाते ब्रह्मणि वर्तते । प्रागुत्पत्तेरजं सर्वं तेनासौ क्रुपणः स्मृतः ॥१॥

1. The aspirant, betaking himself to the devotional exercises, subsists in the conditioned Brahman. All this was but the birthless Brahman before creation.

III. 2]

Hence such a man is considered pitiable (or narrow in his outlook).

Upāsanāsritah is a worshipper who resorts to upāsanā, devotional exercises (like worship and meditation), as the means to his liberation, under the belief, 'I am a worshipper, and Brahman is to be adored by me. Though I now subsist jate brahmani, in the conditioned Brahman; I shall through my devotion to It, attain ajam brahma, the unconditioned Brahman, after the fall of my body. Prak utpatteh ajam sarvam, before the creation all this, including myself, was but the birthless Brahman. Through my devotional exercises I shall regain that which I essentially was prak utpatteh, before my birth, though, after being born, I now subsist jate brahmani, in the conditioned Brahman.' The dharmah, aspirant; upasanasritah, who betakes himself to such devotional exercises; since he is thus cognizant of the partial Brahman, tena, for that very reason; asau, that man; smrtah, is considered; krpanah, pitiable, narrow (Br. III. viii. 10), by those who have seen the eternal and birthless Brahman; this is the idea. And this is in accord with the following text of the Upanisad of the Talavakāra section: 'That which is not uttered by speech, that by which speech is revealed, know that alone to be Brahman, and not what people worship as an object' (Ke. I. 5).

अतो वक्ष्याम्यकार्पण्यमजाति समतां गतम् । यथा न जायते किंचिज्जायमानं समन्ततः ॥२॥

2. Hence I shall speak of that (Brahman) which

is free from limitation, has no birth, and is in a state of homogeneity; and listen how nothing whatsoever is born in any way, though it seems to be born.

Since on account of one's failure to attain the birthless Self existing within and without, one becomes pitiable by thinking oneself through ignorance to be unworthy, and since on that account one comes to believe, 'I am born, I subsist in the conditioned Brahman, and having recourse to Its worship I shall attain (the unconditioned) Brahman', atah, therefore; vaksyāmi, I shall relate; akārpanyam, freedom from misery, limitlessness, the birthless Brahman; for that indeed is a source of limitation, 'where one secs another, hears another, knows another. That is limited, mortal, and unreal' (cf. Ch. VII. xxiv. 1), as is asserted in such Vedic texts as, 'All transformation has speech as its basis, and it is name only' (Ch. VI. iv. 1). Opposed to this is That which has no limitation, which is within and without and is the birthless Brahman, callen the Infinite, on realizing which there is cessation of all misery caused by ignorance. I shall speak of that free-dom from limits. This is the purport. That thing is ajāti, birthless; samatām gatam, established in a state of total homogeneity. Why? Since It has no inequality of parts. Anything that is composite is said to evolve when its parts undergo loss of balance. But since this thing is partless, It is established in homogeneity, and hence It does not evolve through any change in any part. Therefore, It is birthless and free from misery. Hear yatha, how; samantatah, in all respects; kimicit, anything, small though it be; na jāyate, is not

born; though *jāyamānam*, it may (seem to) be born, like a snake from a rope, in consequence of perception under ignorance. Hear how It is not born—how Brahman remains unborn in every way. This is the idea.

The promise was, 'I shall speak of Brahman which has no birth and which is free from limitation.' Now it is said, 'I shall adduce the reason and the analogy for proving this':

आत्मा ह्याकाञवज्जीवैर्घटाकाशैरिवोदितः । घटादिवच्च संघातैर्जातावेतन्निदर्शनम् ॥३॥

3. Since the Self is referred to as existing in the form of individual souls in the same way as space exists in the form of spaces confined within jars, and since the Self exists in the form of the composite things just as space exists as jars etc., therefore in the matter of birth this is the illustration.

Hi, since; $\bar{a}tm\bar{a}$, the (supreme) Self; is subtle, partless, and all-pervasive $\bar{a}k\bar{a}savat$, like space—since that very supreme Self that is comparable to space; uditah, is referred to; $j\bar{v}aih$, as existing in the form of individual souls, the individual knowers of the bodies etc.; *iva*, in the same way; $\bar{a}k\bar{a}savat$ ghat $\bar{a}k\bar{a}saih$, as space is referred to as existing in the form of spaces circumscribed by jars. Or the explanation is: As space (uditah) comes to exist in the form of spaces within the jars, so also has the supreme Self come to exist as the individual souls. The idea implied is that the emergence of individual souls from the supreme Self, that is heard of in the Upanişads, is comparable to the emergence of the spaces in the jars from the supreme space; but this is not so in any real sense of the term. Just as from that very space evolve composite things like jars etc., so also from the supreme Self, which is comparable to space, emerge the composite things like the earth etc., as well as the bodies and senses that constitute the individual, all of them taking birth through imagination like a snake on a rope. This fact is stated in *ghațādivat ca*, and like a jar etc.; It is evolved *sanghātaih*, in the form of composite things. When with a view to make the fact understood by people of poor intellect, the birth of creatures etc. from the Self is referred to by the Vedas, then *jātau*, with regard to birth, when that is taken for granted; *etat nidaršanam*, this is the illustration, as it has been cited in the analogy of space etc.

घटादिषु प्रलीनेषु घटाकाझादयो यथा। आकाक्षे संप्रलीयन्ते तद्वज्जीवा इहात्मनि ॥४॥

4. Just as the space confined within the jars etc. merge completely on the disintegration of the jars etc., so do the individual souls merge here in this Self.

Just as the spaces within a jar etc. emerge into being with the creation of the jar etc., or just as the spaces within the jar etc., disappear with the disintegration of the jar etc., similarly, the individual souls emerge into being along with the creation of the aggregates of bodies etc., and they merge here in the Self on the

III. 5] ADVAITA-PRAKARANA

disintegration of those aggregates. But this is not so from their own standpoint.

The next verse is by way of an answer to those dualists who argue, 'If there be but one Self in all the bodies, then when one of the souls undergoes birth or death or enjoys happiness etc., all souls should share in these; besides there will be a confusion of actions and their results.'

यथैकस्मिन् घटाकाज्ञे रजोधूमादिमिर्युते । न सर्वे संप्रयुज्यन्ते तद्वज्जीवाः सुखादिमिः ॥४॥

5. Just as all the spaces confined within the various jars are not darkened when one of the spaces thus confined becomes contaminated by dust, smoke, etc., so also is the case with all the individuals in the matter of being affected by happiness etc.

Yathā, just as; ekasmin ghajākāse rajodhūmādibhih yute, when one of the spaces confined in a jar is polluted by dust, smoke, etc.; na, not; sarve, all the spaces, confined within the jars etc., are defiled by that dust or smoke etc.; tadvat, just like that; jīvāh, creatures; are not affected sukhādibhih, by happiness etc.

Objection: Is not the Self but one?

Answer: Quite so. Did you not hear that there is but one Self which like space inhabits all the aggregates (of body and senses)?

Objection: If the Self be one, It will experience happiness and sorrow everywhere.

Answer: This objection cannot be raised by the Sāmkhyas. For a follower of the Sāmkhya philosophy cannot posit happiness, sorrow, etc. in the soul, inasmuch as he declares that joy, misery, etc. inhere in the intellect. Moreover, there is no valid ground for imagining that the Self, which is Consciousness by nature, has any multiplicity.

Objection: In the absence of multiplicity, the (Sāmkhya) theory that the Pradhāna (i.e. Primordial Nature) acts for others (viz the Puruşas, the conscious souls) has no leg to stand on.

Answer: No, since whatever is accomplished by the Pradhana cannot get inseparably connected with the Self. If it were a fact that any result in the form of either bondage or freedom brought about by Pradhāna inhered in the souls separately, then the supposition of a single Self would run counter to the (Sāmkhya) theory that the Pradhana acts for others, and therefore it would be logical to assume a multiplicity of souls. But as a matter of fact, it is not admitted by the Sāmkhyas that any result, be it bondage or freedom, which is accomplished by the Pradhana, inheres in the soul; on the contrary, they hold that the souls are attributeless and are pure consciousness. Hence the theory that the Pradhana acts for others, derives its validity from the mere presence of the Self, and not from Its multiplicity. Therefore the fact that the Pradhana acts for others, cannot be a logical ground for inferring the existence of many souls. And the Sāmkhyas have no other proof to validate their theory that each soul is different from all others. If it

be held that the Pradhāna itself undergoes bondage or liberation by virtue of this mere presence of the supreme One (viz God), and that God becomes an occasion for the activity of the Pradhāna by the mere fact of His existence — which is the same as pure Consciousness — and not on account of any specific quality, then the assumption of a multiplicity of souls and the rejection of the meaning of the Vedas are the results of mere stupidity.¹

As for the view of the Vaiścsikas and others who assert that desire and the rest inhere in the soul, that, too, is untenable; for the impressions (of past experiences) that generate memory cannot remain inseparably located in the Self that has no location. And since (according to them) memory arises from a contact of the soul with the mind, there can be no fixed rule regarding the rise of memory; or there will be the possibility of the rise of all kinds of memory simultaneously. Moreover, the souls that are devoid of touch etc. and belong to a different category cannot logically come into contact with mind etc. Furthermore, it is not a fact, though these others believe in it, that qualities like colour or such categories as action, genus, species, or inherence exist independently of the substances. If they were absolutely different from substances, and if desire etc. were so from the soul, those qualities etc. would not have any reasonable relation with substance, (nor would desire etc. have any relation with the soul).

¹ This refutes the view of those Sāmkhyas who believe in one God as well as in a multiplicity of souls. Objection: It involves no contradiction to say that categories which become associated from their very birth can have the relationship of inherence.

Answer: Not so; since the eternal Self exists before the ephemeral moods like desire, no theory of congenital inherence can be logically advanced. If on the contrary, desire and the rest are supposed to have an inseparable relation with the soul from their very birth, then there arises the possibility of their becoming as everlasting as the quality of vastness that the soul possesses (even according to the Vaiseşikas). And that is not a desirable position, for that will lead to the conclusion that the soul has no freedom from the bondage (of desire etc). Besides, if the relationship of inherence be different from a substance, then one has to posit another relationship for its being connected with the substance, just as much as such a relationship (viz conjunction) is assumed in the case of substance and quality (by Vaiseşikas).

Objection: Inherence being verily an eternal, inseparable connection, there is no need of positing another relationship to connect it (with a substance).

Answer: In that case, since entities that are connected through the relation of inherence remain eternally joined, there can be no possibility of their being separate. Alternatively, if the substances and the rest be absolutely disparate, then just as things possessing and not possessing the attribute of touch cannot come in contact, so also those substances etc. cannot become related (with such categories as relation, qualities, etc.) by way of possession that is implied by the sixth case.¹ Besides, if the Self is possessed of such qualities as desire etc. that are subject to increase and decrease, It will be open to the charge of being impermanent like the bodies and the fruits of actions. And the other two faults of Its being possessed of parts and being subject to mutation, just like the bodies etc., will be unavoidable. On the other hand, if on the analogy of the sky, appearing to be blackened by dust and smoke attributed to it through ignorance, it is supposed that the Self appears to be possessed of the defects of happiness and sorrow generated by such limiting adjuncts as the intellect that are superimposed on It through ignorance, there remains no illogicality in Its possessing bondage, freedom etc. in an empirical sense. For all schools of thought, while admitting the empirical reality as originating from ignorance, deny its absolute reality. Therefore the imagination of the multiplicity of souls that the logician resorts to is quite uncalled for.

It is being shown how, through ignorance, there can be the possibility, in the same Self, of that same variety of actions which becomes possible on the assumption of a multiplicity of souls:

रूपकार्यसमाख्याइच मिद्यन्ते तत्र तत्र वै। आकाझस्य न मेदोऽस्ति तद्वज्जीवेषु निर्णयः॥६॥

¹ We cannot say for instance, 'This thing is related to that colour through inherence', which in ordinary parlance is expressed by saying, 'This thing has that colour.' 6. Though forms, actions, and names differ in respect of the difference (in the spaces created by jars etc.), yet there is no multiplicity in space. So also is the definite conclusion with regard to the individual beings.

As in the same space there is a (supposed) difference of dimension such as smallness and bigness in respect of the spaces enclosed by a jar, a water bowl, a house, etc., so also there is a difference of functions such as fetching or holding water, sleeping, etc., and of names such as the space in a jar, the space in a water bowl, the space in a house, etc., which are all created by those jar etc.; but all these differences are not surely real that are implied in conventional dealings involving dimensions etc. created in space; in reality $\bar{a}k\bar{a}saya$ na bhedah asti, space has no difference, nor can there be any empirical dealing based on the multiplicity of space unless there be the instrumentality of the limiting adjuncts. Just as it is the case here, so also *jīveşu*, with regard to the souls, which are created as individual beings by the conditioning factors of the bodies and are comparable to spaces enclosed by jars; this nirnayah, definite conclusion, has been arrived at by the wise after examination. This is the purport.

नाकाशस्य घटाकाशो विकारावयवौ यथा । नैवात्मनः सदा जीवो विकारावयवौ तथा ॥७॥

7. As the space within a jar is neither a transformation nor a part of space (as such), so an individual being is never a transformation nor a part of the supreme Self.

Objection: The experience of difference so far as forms, actions, etc. are concerned with regard to those spaces in a jar etc. follows a real pattern.

Answer: This does not accord with fact, since ghatākāšah, the space within a jar; na vikārah, is not a transformation of the real space, in the sense that a piece of gold ornament is of gold, or foam, bubbles, ice, etc. are of water; nor is it avayavah, a part, as for instance the branches etc. are of a tree. Tathā, as; the space in a jar is not a transformation of space in that sense; tathā, similarly, just as shown in the illustration; jīvah, an individual being, that is comparable to the space within a jar; is na sadā, never; either a transformation or even a part ātmanah, of the supreme Self, that is the highest Reality and is comparable to the infinite space. Therefore the dealings, based on the multiplicity of the Self, must certainly be false. This is the idea.

Inasmuch as the experience of birth, death, etc. follows as a consequence of the differentiation among individuals created by the limiting adjuncts constituted by the bodies, just as the experience of the forms, actions, etc. are the results of the ideas of difference entertained with regard to the spaces within a jar etc., therefore the association of the soul with such impurities as suffering and consequences of actions is caused. by that alone, but not in any real sense. With a view to establishing this fact with the help of an illustration the text goes on:

III. 7]

यथा मवति बालानां गगनं मलिनं मलैः। तथा मवत्यबुद्धानामात्माऽपि मलिनो मलैः॥८॥

8. Just as the sky becomes blackened by dust etc. to the ignorant, so also the Self becomes tarnished by impurities to the unwise.

Yathā, as, in common experience; gaganam, the sky; bhavati, becomes; malinam, blackened; by cloud, dust, smoke, and such other malaih, impurities; bālānām, to the non-discriminating people; but to the truly discriminating people, the sky is not blackened; tathā, so also; abuddhänäm, to the unwise, to those only who cannot distinguish the indwelling Self-but not to those who can distinguish the Self; ātmā, even the supreme Self, the knower and the innermost; bhavati, becomes; malinah, tainted; malaih, with impuritiesthe impurities of mental defects and results of actions. For a desert does not become possessed of water, foam, wave, etc. just because a thirsty creature falsely attributes these to it. Similarly, the Self is not blemished by the impurities of suffering etc. attributed to It by the ignorant. This is the idea.

The same idea is being elaborated again:

मरणे संभवे चैव गत्यागमनयोरपि। स्थितौ सर्वज्ञरीरेषु आकाज्ञेनाविलक्षणः ॥६॥

9. The Self is not dissimilar to space in the matter of Its death and birth, as well as Its going and coming, and existence in all the bodies. The idea implied is that one should realize that in the matter of birth, death, etc., the Self in all the bodies is quite on a par with space in its relation to the space confined in a jar, so far as origination, destruction, coming, going, and motionlessness are concerned.

संघाताः स्वप्नवत्सर्वे आत्ममायाविर्साजताः। आधिक्ये सर्वसाम्ये वा नोपपत्तित्वि विद्यते॥१०॥

10. The aggregates (of bodies and senses) are all projected like dream by the Māyā of the Self. Be it a question of superiority or equality of all, there is no logical ground to prove their existence.

Samghātāh, the aggregates, of bodies etc., that are analogous to the jars etc., are like the bodies etc. seen in a dream and like those conjured up by a magician; and are $\bar{a}tma-m\bar{a}y\bar{a}$ -visarjitāh, projected, conjured up, by the Māyā, ignorance, of the Self; the idea is that they do not exist in reality. Though there may be $\bar{a}dhikya$, superiority, of the aggregates of the bodies and senses of the gods and others in comparison with those of the beasts and others; or there may be sāmya, equality of all; still hi, since; there exists na upapattih, no valid ground, no possibility, for them—there is no reason establishing the existence of these things; therefore they are created by ignorance alone—they do not exist in reality. This is the meaning.

(Upanisadic) texts that go to establish the fact that the reality of the non-dual Self is proved on the evidence of the Vedas, are now being referred to:

रसादयो हि ये कोशा व्याख्यातास्तैत्तिरीयके। तेषामात्मा परो जीवः खं यथा संप्रकाशितः ॥११॥

11. It has been amply elucidated (by us) on the analogy of space, that the individual living being that conforms to the soul of the sheaths, counting from that constituted by the essence of food, which have been fully dealt with in the Taittirīya Upanişad, is none other than the supreme Self.

Rasādayah, the essence of food etc., that is to say, the layers of covering - (so called) since the preceding ones are more and more external in relation to the succeeding ones — constituted by the essence of food, the vital force, etc. which are comparable to the sheaths of swords; have been vyākhyātāh, fully dealt with; taittiriyake, in a part of the Upanisad of the Taittiriyaka branch (Tai. II. i-vi). That which is ātmā, the soul, the inmost entity; tesām, of them, of all the sheaths; because of which (soul) all the five sheaths come to have existence; is jīvah, the living being, since it is the source of animation of all. It is being said as to what it is. It is parah, the supreme Self (Brahman) Itself, that was introduced earlier in the text, 'Brahman is Truth, Knowledge, and Infinite' (Tai. II. i) — the Self from which, it was stated that, through the Maya of the Self, emerged like dream or magic (Kārikā, III. 10) (first) space etc. and then the composite things called the sheaths counting from the one composed of the essence of food (Tai. II. i). That very Self samprakāsitah, has been held forth by us as analogous to space, in the verses beginning with

III. 12] ADVAITA-PRAKARANA

'Since the Self is referred to as existing in the form of individual souls in the same way as space...' ($K\bar{a}rik\bar{a}$, III. 3). The idea implied is that, unlike the self imagined by the logicians, the Self is not to be established by the mere means of the human intellect.

द्वयोर्द्वयोर्मधुज्ञाने परं ब्रह्म प्रकाशितम् । पृथिव्यामुदरे चैव यथाऽऽकाशः प्रकाशितः ॥१२॥

12. As it is demonstrated that space in the earth and the stomach is but the same, similarly in the Madhu-Brāhmaņa the supreme Brahman is revealed as the same with reference to the different dual contexts.

Moreover, prakāsitam, it has been revealed; dvayoh dvayoh, with reference to the different dual contexts — the superhuman and the corporeal — that the 'shining, immortal being' dwelling inside the earth etc. as the knower, is but Brahman, the supreme Self, which is everything (Br. II. v. 1-14). Where (has this been revealed)? That is being stated: The word madhujñāna is used in the sense of that from which is known madhu, nectar, called the knowledge of Brahman — it being ambrosial since it leads to blissfulness; so it means the (chapter called) Madhu-Brāhmaņa (of the Brhadāraŋyaka Upanişad). In that Madhu-Brāhmaṇa. Like what? Tathā, as, in the world; the same ākāšah, space; is prakāšitah, demonstrated to exist, through inference; prthivyām udare ca eva, in the earth and the stomach; similar is the case here. This is the purport.

जीवात्मनोरनन्यत्वममेदेन प्रशस्यते। नानात्वं निन्द्यते यच्च तदेवं हि समञ्जसम्॥१३॥

13. The fact that the non-difference of the individual and the supreme Self is extolled by a statement of their identity, and the fact that diversity is condemned, become easy of comprehension from this point of view alone.

The fact that ananyatvam jīvātmanah, the non-difference of the individual soul and the supreme Self, ascertained through reasoning and the Vedas; is prasasyate, praised, by the scriptures and Vyasa and others; abhedena, by a reference to (the result consisting in) the identity (of the individual and the supreme Self);¹ and the fact that the perception of multiplicity, which is common and natural to all beings and is a view formulated by the sophists standing outside the pale of scriptural import, nindyate, is condemned, by the knowers of Brahman as well by such and other texts as, 'But there is not that second' (Br. IV. iii. 23), 'It is from a second entity that fear comes' (Br. I. iv. 2), 'For, whenever the aspirant creates the slightest difference in It, he is smitten with fear' (Tai. II. vii. 1), ... and this all are this Self' (Br. II. iv. 6; IV. v. 7), 'He who perceives multiplicity here, as it were, goes from death to death' (Ka. II. i. 10); tat yat, all that, which has been said (thus); samañjasam, becomes easy of comprehension, that is to say, becomes logical; evan hi, from this point of view alone; but the per-

¹ 'Anyone who knows that supreme Brahman becomes Brahman indeed' (Mu. III. ii. 9).

III. 14] ADVAITA-PRAKARANA

verted views, cooked up by the logicians, are not easy of comprehension; that is to say, they do not tally with facts when probed into.

115

जीवात्मनोः पृथक्त्वं यत्प्रागुत्पत्तेः प्रकीर्तितम् । भविष्यद्वृत्त्या गौणं तन्मुख्यत्वं हि न युज्यते ॥१४॥

14. The separateness of the individual and the supreme Self that has been declared (in the Vedic texts) earlier than (the talk of)creation (in the Upanişads), is only in a secondary sense that keeps in view a future result (viz unity); for such separateness is out of place in its primary sense.

Objection: Since prāk utpatteh, earlier even than the Upanişadic texts dealing with creation; prthaktoam jīvātmanoh, the separateness of the individual and the supreme Self; prakīrtitam, has been declared; by the Vedas, in the portion dealing with rites and duties, in various ways in conformity with the variety of desires (of individuals), in such words as, 'desirous of this', 'desirous of that', and the supreme Self, too, has been declared in such mantra texts as, 'He held the earth as well as this heaven' (R. X. cxxi. 1), therefore, in case of a contradiction between the sentences of the portions on knowledge (i.e. Upanişads) and rites (i.e. Samhitā and Brāhmaņa), why should unity alone, standing out as the purport of the portion on knowledge, be upheld as the reasonable one?

To this the answer is: Tat pythaktoam, that separateness; is not the highest Truth; yat, which; is prakīrtitam, declared; prāk, earlier in the portion on rites, before

Ø

the Upanisadic texts dealing with creation occur, to wit, 'That from which all these beings take birth' (Tai. III. i), 'As from a fire tiny sparks fly' (Br. II. i. 20), From that Brahman indeed, which is this Self, space was created' (Tai. II. i. 1), 'That (Self) saw (i.e. deliberated)' (Ch. VI. ii. 3), 'That (Self) created fire' (ibid), etc. What is it then? It is gaunam, secondary, like the separateness of the infinite space and the space within a jar. And this statement is made by keeping in view the future result, as in the sentence, 'He cooks food.'1 For the texts speaking of difference can never reasonably uphold it in any literal sense, inasmuch as the texts dealing with the multiplicity of the Self only reiterate the diverse experiences of beings still under natural ignorance. And here in the Upanisads, too, in the texts speaking of creation, dissolution, etc., the one thing sought to be established is the unity of the individual and the supreme Self, as is known from such texts as, 'That thou art' (Ch. VI. viii-xvi), "(While he who worships another god thinking), "He is one, and I am another" does not know' (Br. I. iv. 10), etc. Therefore the reiteration of the perception of multiplicity is made by the Vedas in this world in a secondary sense only, placing their reliance on the future demonstration of unity that is left over as a task to be accomplished in the Upanisads at a later stage. Or the explanation is this: The declaration of unity has been made in, 'One only, without a second' (Ch. VI. ii. 2), earlier than that of creation introduced

¹ Where food stands for the ultimate form that the things being cooked will assume.

in such texts as, 'That (Self) deliberated', 'That created fire' (Ch. VI. ii. 2-3) etc. And that, again, will culminate in unity in the text, 'That is truth, That is the Self, and That thou art' (Ch. VI. viii-xvi). Therefore the separateness of the individual and the supreme Self that is met with (in the Upanisads) anywhere in any sentence must be taken in a secondary sense, as in the sentence, 'He cooks food', for the thing kept in view here is the unity that will be established in future.

Objection: Even though everything be birthless and one without a second before creation, still after creation all these surely have got birth, and individuals, too, are different.

Answer: This is not so, for the Vedic texts dealing with creation have a different object in view. This objection was refuted earlier also by saying that, just like dream, the aggregates are created by the Māyā of the Self, and that birth, difference, etc. of individuals are analogous to birth, difference, etc. of the spaces within jars ($K\bar{a}rik\bar{a}$, III. 9-10). (Since falsity of these have already been dealt with) therefore, taking that very reason for granted, some Vedic texts dealing with creation are being adduced here, from amongst the texts dealing with creation, difference, etc., with a view to showing that they are meant for establishing the oneness of the Self and the individual beings.

> मृल्ल्रोहविस्फुलिङ्गाद्यैः सृष्टिर्या चोदिताऽन्यथा । उपायः सोऽवताराय नास्ति मेदः कथंचन ॥१५॥

MĀŅDŪKYA UPANIŞAD

15. The creation that has been multifariously set forth with the help of the examples of earth, gold, sparks, etc., is merely by way of generating the idea (of oneness); but there is no multiplicity in any way.

Systih, the creation; $y\bar{a}$, which; codit \bar{a} , has been expounded, revealed; anyath \bar{a} , in different ways; mytloha-visphulinga- $\bar{a}dyaih$, with the help of such illustrations as earth, gold, sparks, etc.;¹ sah, that, all that process of creation; is a upāyah, means; avatārāya, for engendering, in us the idea of the oneness of the individual and the supreme Self. It is just like the story of the organs of speech etc. becoming smitten with sin by the devils, that is woven round a conversation with Prāņa, where the intention is to generate the idea of pre-eminence of Prāņa (Ch. I. ii; Br. I. iii., VI. i; Pr. II).

Objection: That, too, is unacceptable.²

Answer: No, since the conversations of Prāņa etc. are related divergently in the different branches of the Vedas. If the colloquies were really true, we should have met with a uniform pattern in all the branches, and not with heterogeneous contradictory presentations. But, as a matter of fact, divergence is met with. Therefore the Vedic texts setting forth the interlogues are not to be taken literally. So also are to be understood the sentences dealing with creation.

Objection: Since the cycles of creation differ, the

¹ Ch. VI. i. 4-6; Mu. II. i. l.

² The anecdotes of Prāņa are real.

III. 15] ADVAITA-PRAKARANA

Vedic texts dealing with the interlogues, as well as with creation, are divergent with relation to the respective cycles.

Answer: Not so, since they serve no useful purpose apart from generating the ideas already mentioned. Not that any other purpose can be imagined for the Vedic texts speaking of colloquies and creation.

Objection: They are meant for meditation with a view to attaining self-identification.

Answer: Not so, for it cannot be a desirable end to be identified with quarrel, creation, or dissolution. Therefore the texts expressing creation etc. are meant simply for generating the idea of the oneness of the Self, and they cannot be fancied to bear other interpretations. Therefore *na asti*, there is not; any *bhedak*, multiplicity, caused by creation etc; *kathamcana*, in any way.

Objection: If in accordance with such Vedic texts as, 'One only, without a second' (Ch. VI. ii. 2), the supreme Self, that is by nature ever pure, intelligent, and free, be the only reality in the highest sense and all else be unreal, then why are there such instructions on meditations in the Vedic texts as, 'The Self, my dear, should be realized'¹ (Br. II. iv. 5), 'The Self that is devoid of sin . . . (is to be sought for)', (Ch. VIII. vii. 1), 'He should shape his conviction' (Ch. III. xiv. 1), 'The Self alone is to be meditated upon' (Br.

¹ The remaining portion is: 'heard of, deliberated on, and meditated on'.

I. iv. 7), etc.; and why are the rites like Agnihotra enjoined?

Answer: Hear the reason for this:

आश्रमास्त्रिविधा हीनमध्यमोत्कृष्टदृष्टयः । उपासनोपदिष्टेयं तदर्थमनुकम्पया ।।१६।।

16. There are three stages of life — inferior, intermediate, and superior. This meditation is enjoined for them out of compassion.

The word asramale meaning stages of life, indicates the people belonging to them - the people competent for scriptural duties, as well as the people of different castes following the righteous path-for the word is used in a suggestive sense. They are trividhah, of three kinds. How? Hina-madhyama-utkrsta-drstayah, people possessing inferior, medium, and superior power of vision; that is to say, they are endued with dull, medium, and fine mental calibre. Iyam upāsanā, this meditation, as well as rites; upadistā, has been instructed; tadartham, for them, for the sake of people of dull and medium intellect who are affiliated to the stages of life etc., and not for the people of superior intellect having the conviction that the Self is but one without a second. (This is done) by the kind Vedas, anukampaya, out of compassion, as to how people, by treading the path of righteousness, may attain this superior vision of unity from such Vedic texts as, 'That which is not thought of by the mind, that by which, they say, the mind is encompassed, know that to be

III. 17] ADVAITA-PRAKARANA

Brahman, and not this that people worship as an object' (Ke. I. 6), 'That thou art' (Ch. VI. vii-xvi), 'The Self indeed is all this' (Ch. VII. xxv. 2), etc.

The perfect knowledge consists in the realization of the non-dual Self, since this is established by scriptures and logic, whereas any other view is false, it being outside the pale of these. A further reason that the theories of the dualists are false is that they are based on such defects as likes and dislikes. How?

स्वसिद्धान्तव्यवस्थासु द्वैतिनो निश्चिता दृढम् । परस्परं विषध्यन्ते तैरयं न विषध्यते ॥१७॥

17. The dualists, confirmed believers in the methodologies establishing their own conclusions, are at loggerheads with one another. But this (non-dual) view has no conflict with them.

Dvaitinah, the dualists — who follow the views of Kapila, Kaṇāda, Buddha, Arhat,¹ and others; niścitäh, are firmly rooted; svasiddhānta-vyavasthāsu, in the methodologies leading to their own conclusions. Thinking, 'The supreme Reality is this alone, and not any other', they remain affiliated to those points of view, and finding anyone opposed to them, they become hateful of him. Thus being swayed by likes and dislikes, consequent on the adherence to their own conclusions, parasparam virudhyante, they stand arrayed against one another. As one is not at conflict with

¹ Viz the Sämkhyas, Nyäya-Vaisesikas, Buddhists, and Jainas.

one's own hands and feet, so also, just because of nondifference from all, *ayam*, this, this Vedic view of ours consisting in seeing the same Self in everyone; *na virudhyate*, is not opposed; *taih*, to them, who are mutually at conflict. Thus the idea sought to be conveyed is that the perfect view consists in realizing the Self as one, for this is not subject to the drawbacks of love and hatred.

It is being pointed out why this view does not conflict with theirs:

अद्वैतं परमार्थो हि द्वैतं तद्भेद उच्यते। तेषामुभयथा द्वैतं तेनायं न विरुघ्यते॥१८॥

18. Non-duality is the highest Reality, since duality is said to be a product of it. But for them there is duality either way. Therefore this view (of ours) does not clash (with theirs).

Advaitam paramārthaḥ, non-duality is the highest Reality; hi, since; dvaitam, duality, heterogeneity; is tad-bhedaḥ, a differentiation, that is to say, a product, of that non-duality, in accordance with the Vedic texts, '(In the beginning there was Existence alone)— One only, without a second.... It created fire' (Ch. VI. ii. 2-3), and in accordance with reason also; for duality ceases to exist in samādhi (God-absorption), unconsciousness, and deep sleep, when one's mind ceases to act. Therefore duality is called a product of non-duality. But teṣām, for those dualists; there is nothing but dvaitam, duality; ubhayathā, from either point of view, from the standpoints of both (absolute) Reality and (empirical) reality. Though those deluded persons have a dualist outlook and we the undeluded ones have a non-dualist outlook in confromity with the Vedic texts, 'The Lord, on account of Maya, is perceived as many' (Br. II. v. 19), 'But there is not that second thing (separate from It which It can see)' (Br. IV. iii. 23); yet tena, because of this reason (because of the falsity of dualism); ayam, this our point of view; na virudhyate, does not clash, with theirs. This point can be illustrated thus: A man sitting astride an elephant in rut does not goad his animal against a madman standing on the ground and challenging him by saying, 'I am also seated on an elephant in opposition; drive your animal against me', just because he has no inimical feelings towards the latter. Thus, since in reality, the knower of Brahman is the very Self of the dualists, tena, hence, because of this reason; ayam, this, this outlook of ours; na virudhyate, does not clash, with them.

When it is asserted that duality is derived from non-duality, someone may entertain the doubt that on that ground duality, too, is real in the highest sense. Therefore it is said:

मायया मिद्यते ह्येतन्नान्यथाऽजं कथञ्चन । तत्त्वतो मिद्यमाने हि मर्त्यताममृतं व्रजेत् ॥१९॥

19. This birthless (Self) becomes differentiated verily through Māyā, and it does so in no other way

than this. For should It become multiple in reality, the immortal will undergo mortality.

The fact that non-duality which is the highest Reality, bhidyate, differentiates; hi, verily; māyayā, through Māyā, is like the moon seen as many by a man with diseased eyes, or like a rope appearing diversely as a snake, a line of water, etc; but it is not so in reality, for the Self has no parts. A composite thing can get transformed through a change in its components, as earth gets modified into jars etc. Therefore the idea conveyed is that the partless ajam, birthless (Self); differentiates, na kathañcana, in no way whatsoever; anyatha, other than this. Hi, for; tattvalah bhidyamāne, should (It) become multiformed in reality; that which is naturally amrtam, immortal; ajam, birthless; and non-dual; vrajet martyatām, will undergo mortality, like fire becoming cold. And this reversal of one's own nature is repugnant, since it is opposed to all valid evidence. The birthless, undecaying Reality that is the Self, becomes multiple through Māyā alone and not in reality. Therefore duality is not the highest Truth.

अजातस्यैव भावस्य जातिमिच्छन्ति वादिनः। अजातो ह्यमृतो मावो मर्त्यतां कथमेष्यति ॥२०॥

20. The talkers vouch indeed for the birth of that very unborn, positive entity. But how can a positive entity that is unborn and immortal undergo mortality?

But those, again, who talk of Brahman, who are

 $v\bar{a}dinah$, garrulous interpreters of the Upanişads; icchanti, they vouch for; the jātim, birth, in a real sense; ajātasya eva, of the One which is verily birthless, which is by nature immortal, the Reality that is the Self. If the Self be born as they hold, It espati martyatām, will undergo mortality, for a certainty. But that Self, being by nature a bhāvah, positive entity; that is ajātah, unborn; and amptuh, deathless; katham, how; can It undergo mortality? The idea is that It will in no way reverse Its nature to embrace mortality (which individuals are subject to).

न मवत्यमृतं मत्यं न मर्त्यममृतं तथा । प्रकृतेरन्यथाभावो न कथव्त्विद्धविष्यति ॥२१॥

21. The immortal cannot become mortal. Similarly the mortal cannot become immortal. The mutation of one's nature will take place in no way whatsoever.

Because, in this world, the *amrtam*, immortal; *na bhavati*, does not become; *martyam*, mortal; and similarly, the mortal also does not become immortal; therefore, *anyathābhāvah prakrteh*, the mutation of one's nature, becoming anything other than what one is; *na katham cit bhavisyati*, will not take place in any way whatsoever, just as fire cannot change its heat.

स्वमावेनामृतो यस्य मावो गच्छति मर्त्यताम् । क्रुतकेनामृतस्तस्य कथं स्थास्यति निृ्चचलः ॥२२॥

22. How can an immortal entity continue to be changeless from the standpoint of one according to whom a positive object which is immortal by nature can pass into birth, it being a product (according to him)?

As for the disputant, yasya, according to whom; bhāvah, a positive object; which is svabhāvena amŗtah, immortal by nature; gacchati martyatām, attains transmigratoriness, takes birth in reality; tasya, for him, it is a meaningless proposition to hold that entity to be naturally immortal before creation. Katham, how, can that entity; be amŗtah, immortal; tasya, for him; krtakena, inasmuch as it is a product? Being an effect, how will that immortal sthāsyati, continue to be; miscalah, unchanging, immortal by nature? It cannot remain so by any means. At no time can there exist anything called an 'unborn' for one who holds the view that the Self has birth; for him all this is mortal. Hence (from this standpoint) we are faced with the negation of freedom. This is the idea.

Objection: For one who holds the view that the Self does not undergo birth, the Vedic passages speaking of creation can have no validity.

Answer: It is true that there are Vedic texts supporting creation, but such passages have some other point in view; and we said that it 'is merely by way of generating the idea' of unity (Kārikā, III. 15). Though the objection was disposed of, the contention and its refutation are adverted to here again merely with a view to allaying the doubts as to whether the passages dealing with creation are favourable or opposed to the subject matter that is going to be dealt with:

भूततोऽभूततो वाऽपि सृज्यमाने समा श्रुतिः। निक्चितं युक्तियुक्तं च यत्तद्भवति नेतरत्॥२३॥

23. Vedic texts are equally in evidence with regard to creation in reality and through Māyā. That which is ascertained (by the Vedas) and is supported by reasoning can be the meaning, and nothing else.

Samā śrutih, Vedic texts (speaking of creation) are equally in evidence; sījyamāne, with regard to a thing being created; bhūtatah, in reality; vā, or; abhūtatah, through Māyā, as is done by a magician.

Objection: Of the two possible meanings — primary and secondary — it is reasonable to understand a word in its primary sense.

Answer: Not so, for we said earlier that creation in any other sense is not recognized (in our philosophy), and it serves no purpose. All talks of creation, in the primary or secondary sense, relate only to creation through ignorance, and not to creation in reality, as is denied in the Vedic text, 'since He is co-extensive with all that is within and without, and since He has no birth' (Mu. II. i. 2). Therefore that which is niscitam, determined, by the Vedas, to be one without a second, birthless, and immortal; ca, and; is yuktiyuktam, supported by reasoning; tat, that, alone; bhavati, becomes, the meaning of the Vedic text, and never anything else. This is what we said in the earlier verses. It is being shown as to what kind of Vedic categorical statements are met with:

नेह नानेति चाम्नायादिन्द्रो मायाभिरित्यपि। अजायमानो बहुषा मायया जायते तु सः ॥२४॥

24. Since it is stated (in the Vedas), 'There is no diversity here', and 'The Lord, on account of Māyā, (is perceived as manifold)', '(the Self) without being born (appears to be born in various ways)', it follows that He is born on account of Māyā alone.

If creation had taken place in reality, the diverse things should have been real, and there should not have been any scriptural text showing their unreality. But, as a matter of fact, there are such texts as, 'There is no diversity here whatsoever' (Kā. II. i. 11), which purport to deny the existence of duality. Therefore creation, which has been imagined as a help to the comprehension of non-duality of the Self, is as unreal as the interlogue of Prāņa (vide Kārikā, III. 15); for this creation is referred to by the word Māyā, indicative of unreal things, in the passage, 'The Lord, on account of Māyā (is perceived as manifold)' (Br. II. v. 19).

Objection: The word Māyā implies knowledge.

Answer: True. But even so it is nothing damaging, since sense-knowledge is accepted as a kind of Māyā, it being a product of ignorance. So *māyābhih* (in Br. II. v. 19) méans 'through different kinds of senseknowledge', which are but forms of ignorance, as is proved by the Vedic text, 'Though unborn, It appears to be born in diverse ways' (Y. XXXI. 19). Therefore sah, He (the Self); jāyate māyayā tu, takes birth through Māyā alone, the word tu being used to add emphasis thus-'through Māyā to be sure'; for (otherwise) birthlessness and birth in various ways cannot be reconciled in the same thing like heat and cold in fire. Besides, from the fact that realization of unity is a fruitful thing as mentioned in the Vedic text, 'what delusion and what sorrow can there be for that seer of oneness?' (\overline{Is} . 7), it follows that the unitive outlook is the definite conclusion of the Upanisads, and this view is supported by the fact that in such texts as, 'He goes from death to death who sees as though there is difference here' (Ka. II. i. 11), the idea of heterogeneity, implied by creation etc., is condemned.

संमूतेरपवादाच्च संमवः प्रतिषिघ्यते । को न्वेनं जनयेदिति कारणं प्रतिषिघ्यते ॥२५॥

25. From the refutation of (the worship of) Hiranyagarbha, it follows that creation is negated. By the text, 'who should bring him forth?', is ruled out any cause.

Sambhavah pratisidhyate, creation (i.e. the created things), is negated; sambhūteh apavādāt, because of the denial of the worship of the Majestic One¹ (Hiranya-

1 The Deity that is possessed of full majesty (sam-bhūti).

garbha), in the text, 'They enter into blinding darkness who worship the Unmanifested' (\overline{Is} . 12). For if Hiraŋyagarbha were absolutely real, there would not have been any denunciation of His (worship).

Objection: The denunciation of (the worship of) Hiranyagarbha is meant for bringing about the combination of worship with rites ($vin\bar{a}sa$), as is known from the text, 'They enter into blinding darkness who are engaged in (mere) rites' ($\bar{1}s$. 9).

Answer: It is true that the condemnation of the meditation on (or worship of) Hiranyagarbha is meant for enjoining a combination of the meditation on the Deity, viz Hiranyagarbha, with rites, referred to by the word vināša (lit. the destructible). Still, just as rites, called vināša, are meant for transcending death consisting in the natural tendencies engendered by ignorance, so also the combination of the meditation on gods with the rites - which is enjoined for the purification of the human heart - is calculated to lead one beyond death that consists in the twofold hankering for ends and means, into which the impulsion, engendered by the craving for the results of works, transforms itself. For thus alone will a man be sanctified by becoming free from the impurity that is the death characterized by the twofold hankering. Therefore this avidyā (lit. ignorance), characterized by a combination of the meditation on gods with the rites, aims at leading one beyond death. Thus indeed does the knowledge of the oneness of the supreme Self arise inevitably in one who becomes disgusted with the world, who is ever engaged in the discussion of the Upanisadic truths, and who goes beyond death that is but (a form of) avidya (or ignorance) characterized by the dual desire (for ends and means). Thus, in relation to the pre-existing ignorance, the knowledge of Brahman, leading to immortality, comes as a successor to be related with the same person; and therefore (in this sense) the latter is said to be combined with the former. Accordingly, since the worship of Hiranyagarbha is meant to serve a purpose different from that of the knowledge of Brahman leading to immortality, the refutation of the worship of Hiranyagarbha is tantamount to its denunciation, and this is so because it has no direct bearing on emancipation, though it is a means of purification. Thus from the condemnation of the worship of Hiranyagarbha it follows that He has got only a relative existence; and hence creation, (as symbolized by Hiranyagarbha and) called immortality, stands negated from the standpoint of the absolutely real oneness of the Self.

So, since it is the individual soul itself, created by ignorance and existing through ignorance alone, that attains its natural stature on the eradication of ignorance, therefore, in the highest sense, 'Kah nu enam janayel, who should again bring him forth?' (Br. III. ix. 28.7). For none indeed creates again a snake, superimposed on a rope through ignorance, once it is removed through discrimination. Similarly none will create this individual. By the words, 'kah nu, who indeed', used with the force of a covert denial; kāraņam pratișidhyate, is ruled out any cause. The idea is that a thing that was created by ignorance and (later)

MĀŅ**DŪKYA UPANI**ŞAD

disappeared has no source of birth, in accordance with the Vedic text, 'It did not originate from anything, nor did anything originate from It' (Ka. I. ii. 18).

स एष नेति नेतीति व्याख्यातं निह्नुते यतः । सर्वमग्राह्यभावेन हेतुनाऽजं प्रकाशते ॥२६॥

26. Since by taking the help of incomprehensibility (of Brahman) as a reason, all that was explained earlier (as a means for the knowledge of Brahman) is negated by the text, 'This Self is that which has been described as "Not this, not this"', therefore the birthless Self becomes self-revealed.

The Upanisad thinks that the Self, presented through a negation of all attributes in the text, 'Now, therefore, the description (of Brahman): "Not this, not this"' (Br. II. iii. 6), is very difficult to understand; so, whatever was *uyākhyātam*, explained through various ways for the sake of establishing that very Self again and again; *nihnute*, it negates all that.¹ By

¹ Vide Br. II. iii. 6, III. ix. 26, IV. ii. 4, IV. iv. 22, and IV. v. 15. Br. II. iii, starts with, 'Brahman has but two forms—gross and subtle,' etc. And at the end of the section it is stated, 'Now, therefore, the description (of Brahman): "Not this, not this"... But though explained once, the Self is very difficult to comprehend. Hence the Upanisad adopts other helps to present the same entity and then negates them with 'not this, not this', so that the absolute Brahman alone may be comprehended as the only Reality.

132

showing in the text, 'This Self is that which has been described as "not this, not this"' (Br. III. ix. 26), that the Self is imperceptible, the Upanisad negates, by implication, all that is perceptible, has origination, and is comprehended by the intellect.¹ Being afraid lest people, not cognizant of the fact that anything presented as a means for establishing something else has only that other thing as its goal, should jump to the conclusion that one must cling as firmly to the means as to the end itself, the Upanisad nihnute, refutes (the idea of the reality of the means); agrāhyabhāvena hetuna, by taking the help of the incomprehensibility (of the Self) as a reason. This is the purport. As a result of this, the reality of the Self that is co-extensive with all that is within and without and is ajam, birthless; prakāsate, gets revealed, by Itself, to one who knows that the means only serves the purpose of the end and that the end has ever the same changeless nature.2

Thus the definite conclusion arrived at by hundreds of Vedic texts is that the reality of the Self that is coextensive with all that exists within and without, and is birthless, is one without a second, and there is

¹ The imperceptible Brahman cannot be the supreme Reality if perceptible things, too, are equally real. Therefore the truth of Brahman implies the unreality of duality.

² A superimposed thing has no reality of its own just like a snake imagined on a rope. Similarly, all phenomenal things like specific attributes that are denied in Brahman, have no existence by the very fact of being negated. It is a mistake to think that the negated counterpart of this negation must also be true. nothing besides. It is now said that this very fact is established by reason as well:

सतो हि मायया जन्म युज्यते न तु तत्त्वतः। तत्त्वतो जायते यस्य जातं तस्य हि जायते॥२७॥

27. Birth of a thing that (already) exists can reasonably be possible only through Māyā and not in reality. For one who holds that things take birth in a real sense, there can only be the birth of what is already born.

With regard to the Reality that is the Self, the apprehension may arise that, if it be incomprehensible for ever, It may as well be non-existent. But that is not correct, for Its effect is perceptible. As the effect consisting in janma, birth (of things); māyayā, through magic; follows satah, from (the magician) who exists; so the perceptible effect in the form of the birth of the world leads one to assume a Self existing in the highest sense, which like the magician is the basis for the Māyā consisting in the origination of the world; for it is but reasonable to think that like such effects as elephants etc., produced with the help of magic, the creation of the universe proceeds satah, from some cause that has existence, and not from an unreal one. But it is not reasonable to say that from the birthless Self there can be any birth tattoatah, in reality. Or the meaning is this: As the janma, birth, in the form of a snake etc.; satah, of an existing thing, a rope for instance; yujyate, can reasonably be; māyayā, through Māyā, but not tattvatah, in reality; similarly, though the Self that exists is incomprehensible, It can reasonably have birth in the form of the universe through Māyā like the illusion of a snake on a rope; but the birthless Self cannot have any birth in the real sense. *Tasya*, as for the disputant, again, who holds that the unborn Self, the supreme Reality; *jāyate*, undergoes birth, as the universe, he cannot make such an absurd assertion that the birthless passes into birth since this involves a contradiction. Hence he has to admit perforce that *jātam*, what is already born; *jāyate*, takes birth, again; and from this predication of birth from what is born will follow an infinite regress. Therefore it is established that the Reality that is the Self, is birthless and one.

असतो मायया जन्म तत्त्वतो नैव युज्यते। बन्ध्यापुत्रो न तत्त्वेन मायया वाऽपि जायते।।२८।।

28. There can be no birth for a non-existent object either through Māyā or in reality, for the son of a barren woman is born neither through Māyā nor in reality.

For those who think everything to be unreal, janma na yujyate, there can be no possibility of birth, in any way; asatah, of a non-existent object; māyayā tattvatah vā, either through Māyā or in reality, for such is never our experience. For bandhyāputrah, the son of a barren woman; na jāyate, never takes birth; either through Māyā or in reality. Hence the theory of nihilism is entirely out of place in the present context. This is the idea. How, again, can there be birth for the existent through Māyā alone? That is being explained:

यथा स्वप्ने द्वयामासं स्पन्दते मायया मनः। तथा जाग्रद्द्वयामासं स्पन्दते मायया मनः॥२१॥

29. As in dream the mind vibrates, as though having dual aspects, so in the waking state the mind vibrates as though with two facets.

As the snake imagined on a rope is true when seen as the rope, so manah, the mind, is true when seen as the Self, the supreme Consciousness. As like a snake appearing on a rope, the mind spandate, vibrates; svapne, in dream; māyayā, through Māyā; dvayābhāsam, as if possessed of two facets—the cognizer and the thing cognized; tathā, just like that; jāgrat, in the waking state; manah, the mind; spandate, vibrates, as it were; māyayā, through Māyā.

अद्वयं च द्वयाभासं मनः स्वप्ने न संशयः। अद्वयं च द्वयामासं तथा जाग्रज्ञ संशयः॥३०॥

30. There is no doubt that in dream, the mind, though one, appears in dual aspects; so also in the waking state, the mind, though one, appears to have two aspects.

Na samisayah, there is no doubt; that just as the snake is true in its aspect of the rope, so the manas, mind; that is but advayam, non-dual, in its aspect of the Self

III. 31] ADVAITA-PRAKARAŅA

from the highest standpoint; dvayābhāsam, appears to have two aspects; svapne, in dream. For apart from Consciousness, there do not exist two things in dream — elephants and so on that are perceived and eyes and the rest that perceive them. The idea is that the case is similar in the waking state also; for in either state there exists only the supremely real Consciousness.¹

It has been said that it is the mind alone which, like a snake on a rope, appears as an illusion, in dual roles. What proof is there as to that? The text advances (inferential) proof on the basis of agreement and difference. How?

मनोदृझ्यमिबं द्वैतं यर्त्किचित्सचराचरम् । मनसो ह्यमनीभादे द्वैतं नैवोपलभ्यते ॥३१॥

31. All this that there is — together with all that moves or does not move — is perceived by the mind (and therefore all this is but the mind); for when the mind ceases to be the mind, duality is no longer perceived.

'Idam dvaitam, this duality, as a whole; that is manodrsyam, perceived by the mind; is nothing but the mind, which is itself imagined (on the Self)' — this is the proposition. For duality endures so long as the mind does, and disappears with the disappearance of

¹ The mind fancied on Consciousness through ignorance, vibrates on the supremely real and constant Consciousness in either state. the mind. *Hi*, for; manasah amanibhäve, when the mind ceases to be the mind, when, like the illusory snake disappearing in the rope, the mind's activity stops through the practice of discriminating insight and detachment, or when the mind gets absorbed in the state of sleep; dvaitam na upalabhyate, duality is not perceived. From this non-existence is proved the unreality of duality. This is the purport.

How does the mind cease to be the mind? This is being answered:

आत्मसत्यानुबोघेन न सङ्कल्पयते यदा। अमनस्तां तदा याति ग्राह्यामावे तदग्रहम् ॥३२॥

32. When following the instruction of scriptures and the teacher, the mind ceases to think as a consequence of the realization of the Truth that is the Self, then the mind attains the state of not being the mind; in the absence of things to be perceived, it becomes a non-perceiver.

Atmasatya: the Truth that is Self, which is comparable to the reality of earth as stated in the Vedic text, 'All transformation has speech as its basis, and it is name only. Earth as such is the reality' (Ch. VI. i. 4). Atmasatya-anubodha is the realization of that Truth of the Self which follows from the instruction of scriptures and the teacher. Yadā, when, as a consequence of that, there remains nothing to be thought of; and the mind na sankalpayate, does not think—as fire does not burn in the absence of combustible things;

III. 33] ADVAITA-PRAKARAŅA

tadā, then, at that time; yāti amanastām, it attains the state of ceasing to be the mind. Grāhyābhāve, in the absence of things to be perceived; tat, that mind; agraham, becomes free from all illusion of perceptions. This is the idea.

If this duality be false, how is the truth of one's own Self realized? The answer is:

अकल्पकमजं ज्ञानं ज्ञेयामिन्नं प्रचक्षते । ब्रह्मज्ञेयमजं नित्यमजेनाजं विबुध्यते ॥३३॥

33. They say that the non-conceptual knowledge, which is birthless, is non-different from the knowable (Brahman). The knowledge that has Brahman for its content is birthless and everlasting. The birthless (Self) is known by the birthless (knowledge).

The knowers of Brahman pracaksate, say; that absolute jñānam, knowledge; which is akalpakam, devoid of all imagination (non-conceptual); and is therefore ajam, birthless; is jñeyābhinnam, non-different from the knowable, identified with Brahman, the absolute Reality. And this is supported by such Vedic texts as, 'for the knower's function of knowing can never be lost' (Br. IV. iii. 30), like the heat of fire; 'Knowledge, Bliss, Brahman' (Br. III. ix. 28. 7); 'Brahman is truth, knowledge, infinite' (Tai. II. i. 1). The phrase brahma-jñeyam, is an attribute of that very knowledge, and means that very knowledge of which Brahman Itself is the content and which is nondifferent from Brahman, as heat is from fire. By that ajena, unborn, knowledge, which is the very nature of the Self; vibudhyate, is known—It knows by Itself; the ajam, birthless Reality, which is the Self. The idea conveyed is that the Self being ever a homogeneous mass of Consciousness, like the sun that is by nature a constant light, does not depend on any other knowledge (for Its revelation).

It has been said that when the mind is divested of ideation by virtue of the realization of the Truth that is Brahman, and when there is an absence of external objects (of perception), it becomes tranquil, controlled, and withdrawn like fire that has no fuel. And it has further been said that when the mind thus ceases to be the mind, duality also disappears.

निगृहीतस्य मनसो निर्विकल्पस्य धीमतः । प्रचारः स तु विज्ञेयः सुषुप्तेऽन्यो न तत्समः ॥३४॥

34. The behaviour that the mind has when it is under control, free from all ideation, and full of discrimination, should be particularly noted. The behaviour of the mind in deep sleep is different and is not similar to that (of the controlled mind).

Pracārah, the behaviour, that there is; manasah, of the mind; nigrhītasya, which is (thus) under control; nirvikalpasya, which is free from all ideation; dhīmatah, which is full of discrimination; sah that behaviour; vijneyah, is to be particularly noted, by the Yogis.

Objection: In the absence of all kinds of awareness, the mind under control behaves in the same way as

III. 35]

the mind in sleep. Hence the absence of awareness being the same, what is there to be particularly noted?

With regard to this the answer is: The objection is untenable, since the behaviour of the mind susuple, in deep sleep; is anyah, different; the mind being then under the cover of the darkness of delusion arising from ignorance, and it being still possessed of the latent tendencies that are the seeds of many evil actions. And the behaviour of the mind under control is surely different, since ignorance, the seed of evil activities, has been burnt away from that mind by the fire of the realization of the Truth that is the Self, and since from that mind has been removed the blemish of all afflictions. Hence (the sleeping mind's behaviour) na tatsamah, is not like that behaviour (in the controlled state). Therefore it is fit to be known. This is the meaning.

The reason for the difference of behaviour is being stated:

लीयते हि सुषुप्ते तन्निगृहीतं न लीयते। तदेव निर्भयं ब्रह्म ज्ञानालोकं समन्ततः ॥३४॥

35. For that mind loses itself in sleep, but does not lose itself when under control. That very mind becomes the fearless Brahman, possessed of the light of Consciousness all around.

Hi, since; susupte,1 in deep sleep; tat, that, the mind

1 A different reading is susuptau.

together with all its tendencies and impressions that are the seeds of all such mental modes as ignorance (egoism, attachment) etc.; liyate, loses itself, attains a seed-state of potentiality which is a kind of darkness and non-differentiation; but when that mind is nigrhitam, withdrawn, through knowledge arising from discrimination; na liyate, it does not lose itself, it does not attain the seed-state of darkness; therefore it is reasonable that the behaviours of the sleeping and controlled minds should be different. Tat eva, that very mind; becomes the supreme non-dual brahma, Brahman Itself; when (in its absorption in Brahman) it is freed from the dual taint of being the subject and the object which are the creations of ignorance. Since this is the case, therefore that very mind becomes nirbhayam, fearless; for then there is no perception of duality that causes fear (cf. Br. I. iv. 2). Brahman is that quiescent and fearless entity, by knowing which one has no fear from anywhere (cf. Tai. II. ix). That Brahman is being further distinguished: Jnana means Knowledge, Consciousness, which is the very nature of the Self; and Brahman which has that Knowledge as Its ālokaķ, light (expression) is jnānālokam, possessed of the light of Knowledge. The meaning is that It is a homogeneous mass of Consciousness, samantatah, all around; i.e. like space. It is all-pervasive without a break.

अजमनिद्रमस्वप्नमनासकमरूपकम् । सक्वद्विमातं सर्वज्ञं नोपद्पारः कथञ्चन ।।३६।।

36. Brahman is birthless, sleepless, dreamless,

111. 36] ADVAITA-PRAKARAŅA

nameless, formless, ever effulgent, everything, and a knower. (With regard to It) there is not the least possibility of ceremony.

Brahman which coexists with all that is inside and outside, is ajam, unborn, since It has no source of birth. We said that birth is verily caused by ignorance as in the case of a snake on a rope; and that ignorance is nullified on the realization of the truth of the Self according to instruction. As It is birthless, so It is anidram, sleepless. Sleep is the beginningless Māyā characterized by ignorance. Since he (man) has awakened into his own real, non-dual nature that is the Self, therefore he is asvapnam, dreamless. And since his name and form are creations of the state of nonwaking, and they are destroyed on waking up like the illusion of a snake on a rope, therefore Brahman cannot be named by any word, nor can It be described as having any form in any way; thus It is also anamakam arupakam, without name and form, as is stated by the Vedic text, 'From which words turn back' (Tai. II. iv, II. ix). Moreover, It is sakrt vibhatam, ever illumined, constant effulgence by nature, since It is devoid of non-manifestation that is consequent on non-perception, and devoid of manifestation that is contingent on wrong perception (as in the case of an individual¹). Realization and non-realization (of

¹ In an individual, Brahman is said to be hidden when it is not perceived as '1'. And when a false perception arises in the form 'I am an agent' etc., Brahman is said to be manifest. When these two ideas are absent, Brahman remains as the Self-effulgent Reality. Brahman) are as day and night (of the sun¹), and the darkness of nescience is ever the cause of nonmanifestation. Since this is absent from Brahman, and since Brahman is by nature the light that is eternal Consciousness, it is but reasonable that It should be constantly effulgent. Hence, too, It is sarvajñam: sarva, all, as well as, jña, a knower, by nature. With regard to this Brahman of such characteristics there can be na upacārah, no ceremony (practice) as others have, e.g. concentration of mind etc. that are different from the nature of the Self. The idea is this: As Brahman is by nature eternally pure, intelligent, and free, there can be no possibility of anything to be done (by the enlightened person) kathañcana, in any way whatsoever, after the destruction of ignorance.

The reason is being adduced for establishing namelessness etc. mentioned above:

सर्वाभिलापविगतः सर्वचिन्तासमुत्थितः । सुप्रशान्तः सकृज्ज्योतिः समाधिरचलोऽमयः ॥३७॥

37. The Self is free of all sense-organs, and is above all internal organs. It is supremely tranquil, eternal effulgence, divine absorption, immutable, and fearless.

The word abhilāpah, derived in the sense of that by

¹ True it is that non-realization precedes and realization succeeds instruction. But they do not belong to Brahman. The sun is supposed to be subject to day and night, because people fancy the sun to rise and set. But in reality the sun has no night or day. Similarly, Brahman has no realization or non-realization. which utterance is made, refers to the organ of speech, the means of expressing all kinds of words. It is (vigatah) free from that (organ of speech). Speech is here used suggestively. So the meaning implied is that It is free of all external organs. Similarly, It is sarva-cintāsamutthitah: The word cinta, derived in the sense of that by which things are thought of, means the intellect; samutthitah means risen above that; that is to say, It is devoid of the internal organ, which accords with the Vedic text, '... therefore He is without vital force and without mind; He is pure and superior to the (other) superior imperishable' (Mu. II. i. 2). Being devoid of all objects. It is suprasantah, absolutely tranquil; sakrijyotih, everlasting light, by virtue of being by nature the Consciousness that is the Self; samādhih, divine absorption - so called since It is realizable through the insight arising out of the deepest concentration (samādhi). Or It is called samādhi, because It is the object of concentration. It is acalah, immutable; and therefore abhayah, fearless, since there is no mutation.

Since Brahman Itself has been described as divine absorption, immutable, and fearless, therefore —

ग्रहो न तत्र नोत्सर्गदिचन्ता यत्र न विद्यते। आत्मसंस्थं तदा ज्ञानमजाति समतां गतम्॥३८॥

38. There can be no acceptance or rejection where all mentation stops. Then knowledge is established in the Self and is unborn, and it becomes homogeneous.

Tatra, there, in that Brahman; vidyate, there exists;

[III. 38

na grahah, no acceptance; na utsargah, no rejection or loss; for acceptance or rejection is possible where mutability or the possibility of it exists. These two are incompatible here with Brahman, for nothing else exists in It to cause a change, and It is without parts. Therefore there is no rejection or acceptance in It; yatra, where; cinta, thought (mentation); na vidyate, does not exist. This is the idea. That is to say, how can there be rejection or acceptance where no mentation is possible in the absence of the mind? As soon as there comes the realization of the Truth that is the Self, tada, then, in the absence of any object (to be known); jnanam, knowledge; is atmasamstham, established in the Self, like the heat of fire in fire (when there is no fuel). It is then ajāti, birthless; and gatam samatām, becomes homogeneous.

The promise which was made earlier, 'Hence I shall speak of Brahman which is free from limitation, is without birth, and is in the state of homogeneity' ($K\bar{a}rik\bar{a}$, III. 2), and which has been fulfilled with the help of scripture and reasoning, is concluded here by saying, 'unborn, and it becomes homogeneous'. Everything else, apart from this realization of the Self, is within the sphere of misery, as is declared by the Vedic text, 'O Gārgī, he, who departs from this world without knowing this Immutable, is miserable' (Br. III. viii. 10). The meaning sought to be conveyed is that by knowing this, one becomes a Brāhmaņa (knower of Brahman) and has one's duties fulfilled.

Though this supreme Reality is such, yet --

अस्पर्धयोगो वै नाम दुर्दर्धः सर्वयोगिभिः । योगिनो बिभ्यति ह्यस्मादभये भयदर्घिानः ॥३९॥

39. The Yoga that is familiarly referred to as 'contactless' is difficult to be comprehended by anyone of the Yogis. For those Yogis, who apprehend fear where there is no fear, are afraid of it.

Asparsa-yogah nāma, this is familiar as the Yoga which is contactless, since it has no relation, indicated by the word contact, with anything; vai, (this is how it is) referred to, well known in all the Upanisads. It is durdarsah, hard to be seen; sarvayogibhih, by all the Yogis, who are devoid of the knowledge imparted in the Upanisads. The idea is that it is attainable only through the effort involved in the realization of the Self in accordance with instruction. Hi, for; yoginah, the Yogis; who are bhayadarsinah abhaye, perceivers of fear in this fearless (Brahman), the non-discriminating ones who apprehend the destruction of their personality, which fact becomes the cause of their fear; (they) asmāt bibhyati, are afraid of it, thinking this Yoga to be the same as the disintegration of their own individuality, though in fact it is beyond all fear.

But for those to whom the mind and the senseorgans etc., which are imagined like a snake on a rope, have no existence in reality when considered apart from their essence that is Brahman—for those who have become identified with Brahman—comes fearlessness; and for them naturally is accomplished the everlasting peace called emancipation which is not dependent on any other factor, as we declared earlier in, 'there is not the least possibility of ceremony' (Kārikā, III. 36). But, for the Yogis who are other than these, who are still treading the path, who have inferior or medium outlook and think of the mind as something different from the Self, though associated with It — for those who are not possessed of the realization of the Self that is the Truth —

मनसो निग्रहायत्तममयं सर्वयोगिनाम् । दुःखक्षयः प्रबोधक्चाप्यक्षया ज्ञान्तिरेव च ॥४०॥

40. For all these Yogis, fearlessness, the removal of misery, knowledge (of the Self), and everlasting peace are dependent on the control of the mind.

Sarvayoginām, for all Yogis; abhayam, fearlessness; is manasaḥ nigrahāyattam, contingent on the control of the mind; and so also is duḥkhakṣayaḥ, the removal of misery. For there can be no extinction of sorrow for the non-discriminating people so long as the mind, which has association with the Self, continues to be disturbed. Moreover, (for them) the knowledge of the Self, too, is contingent on the control of the mind. Similarly, akṣayā šāntiḥ, the everlasting peace, called Liberation, is also certainly dependent on the control of the mind.

उत्सेक उदघेर्यद्वत्कुशाग्रेणैकविन्दुना । मनसो निग्रहस्तद्वद्भवेदपरिखेदतः ॥४१॥

41. Just as an ocean can be emptied with the help

III. 42] ADVAITA-PRAKARANA

of the tip of a blade of Kusa grass that can hold just a drop, so also can the control of the mind be brought about by absence of depression.

Even the control of the mind comes about aparikhedatah, from the want of depression; for those Yogis whose minds are free from mental depression, and who are as relentless as in trying to empty an ocean; kusāgreņa ekabindunā, with the help of the tip of a blade of Kusa grass that can hold only a drop. This is the idea.

Is diligence alone, that knows no depression, the means for controlling the mind? The answer is being given negatively:

उपायेन निगृह्णीयाद्विक्षिप्तं कामभोगयोः । सुप्रसन्नं ऌये चैव यथा कामो ऌयस्तथा ॥४२॥

42. With the help of that proper process one should bring under discipline the mind that remains dispersed amidst objects of desire and enjoyment; and one should bring it under control even when it is in full peace in sleep, for sleep is as bad as desire.

Being armed with untiring effort, and taking for aid the means to be stated, *nigrhņīyāt*, one should bring under discipline, i.e. concentrate on the Self Itself; the mind that remains *vikşiptam*, dispersed, amidst objects of desire and their enjoyment. Moreover, *laya* means that in which anything gets merged, i.e. sleep. Though the mind be *suprasannam*, very peaceful, i.e. free from effort; *laye*, in that sleep; still 'it should be brought under discipline' — this much has to be supplied. Should it be asked, 'If it is fully at peace, why should it be disciplined?' the answer is: 'Since *layah tathā*, sleep is as much a source of evil; *yathā* $k\bar{a}mah$, as desire is.' So the idea implied is this: As the mind engaged in objects of desire is to be controlled, so also is the mind in sleep to be disciplined.

Which is that process? That is being stated:

दुःखं सर्वमनुस्मृत्य कामभोगान्निवर्तयेत् । अजं सर्वमनुस्मृत्य जातं नैव तु पत्र्यति ।।४३।।

43. Constantly remembering that everything is full of misery, one should withdraw the mind from the enjoyment arising out of desire. Remembering ever the fact that the birthless Brahman is everything, one does not surely perceive the born (viz the host of duality).

Anusmrtya, remembering, the fact that; sarvam, everything, all duality that is created by ignorance; is duhkham, full of sorrow; nivartayet, one should withdraw, the mind; kāmabhogāt, from enjoyment prompted by desire, from the objects of desire; one should withdraw with the help of ideas of detachment—this is the meaning. Anusmrtya, remembering the fact, from the instruction of scriptures and the teacher; that ajam, the birthless, Brahman; is sarvam, everything; na eva tu paiyati, one does not certainly perceive, the host of duality that is opposed to Brahman; for duality ceases then.

लये संबोधयेच्चित्तं विक्षिप्तं शमयेत्पुनः । सकषायं विजानीयात्समप्राप्तं न चालयेत् ।।४४॥

44. One should wake up the mind merged in deep sleep; one should bring the dispersed mind into tranquillity again; one should know when the mind is tinged with desire (and is in a state of latency). One should not disturb the mind established in equipoise.

Thus with the help of the dual process of detachment and practice of knowledge, sambodhayet, one should wake up; the mind merged laye, in deep sleep; one should engage it in the realization of the transcendence of the Self. The word citta has the same meaning as manas, mind. Samayet punah, one should again make tranquil; the mind that is viksiptam, dispersed, amidst desire and enjoyment. When the mind of a man, who is practising again and again, is awakened from deep sleep and is withdrawn from objects, but is not established in equipoise and continues in an intermediate state, then vijaniyat, one should know; that mind to be sakasāyam, tinged with desire, in a state of latency. From that state, too, it should be diligently led to equipoise. But" when the mind becomes samaprāptam, equipoised, that is to say, when it begins to move toward that goal; na vicalayet, one should not disturb it from that course; or in other words, one should not turn it back toward objects.

> नास्वादयेत्सुखं तत्र निःसङ्गः प्रज्ञया भवेत् । निश्चलं निश्चरच्चित्तमेकीकुर्यात्प्रयत्नतः ॥४५॥

45. One should not enjoy happiness in that state; but one should become unattached through the use of discrimination. When the mind, established in steadiness, wants to issue out, one should concentrate it with diligence.

The sukham, happiness, which a Yogi gets while trying to concentrate his mind; na asvadayet, he should not enjoy; that is to say, he should not get attached tatra, there, to that state. How should he behave there? He should become nihsangah, unattached; prajnayā, through the discriminating intellect. He should think, Whatever happiness is perceived is a creation of ignorance, and it is false.' He should also withdraw his mind from that kind of attraction for joy-this is the purport. When having been withdrawn from the attraction for happiness, and having attained the state of steadiness, the mind becomes niscarat, intent on going out; then withdrawing it from those objects with the help of the above-mentioned process, one ekīkuryāt, should diligently concentrate it — in the Self itself; prayatnatah, with diligence. The idea is that it should be made to attain its true nature of Consciousness alone.

यदा न लीयते चित्तं न च विक्षिप्यते पुनः। अनिङ्गनमनामासं निष्पन्नं ब्रह्म तत्तदा ॥४६॥

46. When the mind does not become lost nor is scattered, when it is motionless and does not appear in the form of objects, then it becomes Brahman.

III. 47]

Yadā, when; the cittam, mind; brought under control through the aforesaid process, na līyate, does not become lost, in sleep; and also na ca punaķ viksipyate, does not, again, become dispersed, amidst objects; and when the mind becomes aninganam, motionless, like a lamp in a windless place; and anābhāsam, does not appear in the form of any fancied object; when the mind assumes such characteristics, then it nispannam brahma, becomes Brahman; or in other words, the mind then becomes identified with Brahman.

47. That highest Bliss is located in one's own Self. It is quiescent, coexistent with liberation, beyond description, and birthless. And since It is identical with the unborn knowable (Brahman), they call It the Omniscient (Brahman).

•The above-mentioned Bliss, which is the highest Reality, and which consists in the realization of the Truth that is the Self, is svastham, located in one's own Self; sāntam, quiescent, characterized by the absence of all evil; sanirvāņam, coexistent with cessation, i.e. liberation; and it is akathyam, indescribable, as it relates to an absolutely unique entity; it is uttamam. sukham, the highest happiness. it being unsurpassable and open to the vision of the Yogis alone. It is ajam, unborn, unlike objective happiness. And since this happiness, in its true nature of omniscience, is identical ajena, with the unborn; jneyena, (with the) thing to be known; therefore the knowers of Brahman paricaksate, call it; sarvajñam, the omniscient one, Brahman Itself.

All such ideas — e.g. the control of the mind and so on, creation resembling the evolution of forms from earth and gold, and meditation — have been spoken of as the means leading to the realization of the supreme Reality as It is in Itself; but these have not been spoken of as supremely true in themselves. The absolutely highest Truth, however, is:

न कश्चिज्जायते जीवः संभवोऽस्य न विद्यते। एतत्तदुत्तमं सत्यं यत्र किञ्चिन्न जायते॥४८॥

48. No individual being, whichsoever, takes birth. It has no source (of birth). This (Brahman) is that highest Truth where nothing whatsoever takes birth.

Na jīvah kah cit, no individual being whichsoever, who is a doer or an enjoyer; jāyate, is born, by any means whatsoever. Hence for the Self that is naturally unborn and non-dual, na vidyate, there does not exist; any sambhavah, source, cause (for undergoing birth). Since there does not exist for It any cause, therefore no individual being, whichsoever, undergoes birth. This is the meaning. As compared with the truths mentioned earlier as the means, etat, this one; is uttamam satyam, the highest Truth; (yatra) where, in which Brahman that is Truth by nature, na kincit jāyate, nothing whatsoever, not even a jot or tittle, is born.

CHAPTER IV

ALATASANTI-PRAKARANA (ON QUENCHING THE FIREBRAND)

In the course of determining the meaning of Om, nonduality was advanced as a premiss on the basis of the scriptures; it was proved to be true on the basis of the fact that the differences found in things external are unreal; it was again directly determined with the help of scriptures and reason in the chapter on nonduality; and that non-duality was summed up in the concluding remark, 'This is that highest Truth' (Kārikā, III. 48). The dualists and the nihilists are opposed to that unitive outlook that is the import of the scriptures. And it has been hinted that their philosophy is false, since their outlook is affected by such vitiating factors as attachment and aversion arising from mutual opposition. And the philosophy of non-duality is extolled inasmuch as it is not subject to such mental perversion. Now begins the chapter on quenching the firebrand, in order to show in detail how those are partial philosophies owing to their mutual contradiction, and then, after rejecting them, to sum up by proving the truth of the philosophy of non-duality with the help of the method of difference (consisting in their rejection¹). Now while on

¹ Instances of the application of the methods of agreement and difference are: 'Whatever is a product is impermanent', and

this subject, this first verse is meant as a salutation to the promulgator of the school of non-duality by identifying him with non-duality itself. For it is desirable to worship one's teacher at the commencement of a scripture so that the result aimed at may be achieved.

ज्ञानेनाकाझकल्पेन धर्मान्यो गगनोपमान् । ज्ञेयामिन्नेन संबुद्धस्तं वन्दे द्विपदां वरम् ॥१॥

1. I bow down to the One who is the chief among all persons, who has known fully the souls resembling (infinite) sky, through his knowledge that is comparable to space and is non-different from the object of knowledge.

 $\bar{A}k\bar{a}sakalpa$ is that which is slightly different from space, that is to say, resembling space. So, $j\bar{n}\bar{a}nena$ $\bar{a}k\bar{a}sakalpena$ means 'by a knowledge that is comparable to (infinite) space'. What purpose is served by it? (He knows) dharmān, the souls. Souls of what kind? The souls that are gagana-upamān, comparable to the sky. There is another qualification of that very knowledge: The knowledge that is *jneyābhinna*, nondifferent from the objects of knowledge, viz the souls — just as heat is from fire, or light is from the sun.

[&]quot;Whatever is not impermanent is not a product'. When both the methods can be applied to a case, all doubts about the truth of the general proposition is set at rest. In the present case, nonduality, presented by the scripture and proved to be a possibility by logic, is confirmed by showing the hollowness of others' views.

IV. 2] ALÄTASÄNTI-PRAKARANA

He who sambuddhah, has completely realized; dharmān gaganopamān, the entities that are comparable to the sky; jneyābhinnena jnānena, through the knowledge — which is non-different from the object of knowledge — which is comparable to space and is non-different from the true nature of the Self that is to be known; He indeed is the Lord called Nārāyaņa. Tam vande, Him I salute; dvipadām varam, the greatest among the bipeds, that is to say, the supreme Person among all persons who are suggested by the word 'biped'. Under the garb of this salutation to the teacher, it is suggested that the purpose of this chapter is to establish, through a refutation of the opposite views, the philosophy of the supreme Reality that is devoid of the distinctions of knowledge, knowable, and knower.

Now for extolling the Yoga taught in the philosophy of non-dualism comes a salutation to it:

अस्पर्शयोगो वै नाम सर्वसत्त्वसुखो हितः । अविवादोऽविरुद्धत्र्च देशितस्तं नमाम्यहम् ।।२।।

2. I bow down to that Yoga that is well known as free from relationships, joyful to all beings, beneficial, free from dispute, non-contradictory, and set forth in the scriptures.

Asparša-yogah is that Yoga which has no sparša, touch, relationship, with anything at any time; it is of the very nature of Brahman. To the knowers of Brahman it is vai nāma, indeed so named; that is to say, it is well known as the Yoga free from all relationships. And it becomes sarva-sattva-sukhah, a bliss to all beings. Some Yoga, as for instance austerity, may itself be sorrowful, though it is distinguished as a means leading to extreme happiness. But this one is not of that sort. What then? It is joyful to all beings. Similarly, in this world, a particular kind of enjoyment of objects may be joyful but not beneficial. But this one is joyful as well as *hitah*, beneficial, since its nature is ever unchanging. Moreover, it is avivādah: that in which there is no dispute (vivāda) by embracing two sides, for and against, is avivādah, free from dispute. Why? Because it is, in addition, aviruddhah, non-contradictory. The Yoga of this kind that has been dešitah, instructed, by the scripture; tam, to that; aham namāmi, I make my salutation, i.e. I bow down.

How the dualists contradict each other is being stated:

भूतस्य जातिमिच्छन्ति वादिनः केचिदेव हि। अभूतस्यापरे धीरा विवदन्तः परस्परम् ।।३।।

3. Only some disputants postulate the birth of 'a (pre-) existing thing. Other wise ones, while disputing among themselves, postulate the birth of what does not pre-exist.

Hi kecit eva vādinah, only some disputants, viz the Sāmikhyas; icchanti, postulate; jātim, the birth; bhūtasya, of an existing thing; but not so do all the dualists, for there are apare, others, viz the Vaisesikas

IV. 4] ΑΙ.ΑΤΑΘΑΝΤΙ-ΡΚΑΚΑRANA

and the Naiyāyikas; who are *dhīrāḥ*, wise, that is to say, proud of their wisdom; and who while *vivadantaḥ*, talking contrariwise; postulate the birth *abhūtasya*, of a non-existing thing. The idea is that they want to conquer each other through disputation.

Now is being shown what is virtually asserted by them as they refute each other's point of view by talking contrariwise:

भूतं न जायते किंचिदभूतं नैव जायते । विवदन्तोऽद्वया ह्येवमर्जाात ख्यापयन्ति ते ॥४॥

4. A thing that already exists does not pass into birth; and a thing that does not pre-exist cannot pass into birth. These people, while disputing thus, are really non-dualists, and they thus reveal the absence of birth.

'Kim cit, anything; that is $bh\bar{u}tam$, pre-existing; na jāyate, does not pass into birth, just because it exists, as it is in the case of the Self' — while speaking thus, the holder¹ of the view that the effect does not exist before its birth, refutes the view of the Sāmikhya who says that the effect, pre-existing in the cause,² takes birth. Similarly, the Sāmikhya, too, while speaking thus, 'Abhūtam, a non-existing—like the horns of a hare; na eva jāyate, can never be born, because of the

¹ The Naiyāyika, who virtually subscribes to the view that something comes out of nothing.

² The effect remaining involved in the cause.

very fact that it does not exist' — refutes the birth of a non-existing thing as held by those who believe in the non-existence of the effect before production. While *vivadantah*, talking contrariwise; these *advayāh*,¹ non-dualists — for these really walk into the camp of the non-dualists by refuting each other's view about the birth of the pre-existing or the non-pre-existing; *khyāpayanti*, reveal, by implication; *ajātim*, the absence of birth itself.

ख्याप्यमानामजाति तैरनुमोदामहे वयम् । विवदामो न तैः सार्धमविवादं निबोधत ॥१॥

5. We approve the birthlessness that is revealed by them; we do not quarrel with them. (O disciples), understand this (philosophy) that is free from dispute.

By saying, 'Let this be so', we simply anumodāmahe, approve; the ajātim, birthlessness; taih khyāp amānām, thus revealed by them; we na vivadāmah, do not quarrel; taih sārdham, with them, by taking any side for or against, as they do in regard to each other. This is the idea. Therefore, O disciples, nibodhata, understand; that philosophy of the highest Reality that is avivādam, beyond dispute, and is approved by us.

अजातस्यैव धर्मस्य जातिमिच्छन्ति वादिनः। अजातो ह्यमृतो धर्मो मर्त्यतां कथमेष्यति ।।६॥

Another reading is 'dvayah, dualists'.

IV. 8] ALĀTAŠĀNTI-PRAKARAŅA

6. The talkers verily vouch for the birth of an unborn positive entity. But how can a positive entity that is unborn and immortal undergo mortality?

Vādinah, the disputants—all of them, whether holding the view of the prior existence or non-existence of the effect. This verse was commented on earlier $(K\bar{a}rik\bar{a}, III. 20)$.

न भवत्यमृतं मत्यं न मर्त्यममृतं तथा। प्रकृतेरन्यथाभावो न कथंचिद्धविष्यति॥७॥

7. The immortal can not become mortal. Similarly the mortal cannot become immortal. The mutation of one's nature will take place in no way whatsoever.

स्वमावेनामृतो यस्य धर्मो गच्छति मर्त्यताम् । क्वतकेनामृतस्तस्य कथं स्थास्यति निक्चलः ॥८॥

8. How can an immortal entity continue to be changeless from the standpoint of one according to whom a positive entity which is immortal by nature can pass into birth, it being a product (according to him)?

The verses already explained earlier ($K\bar{a}rik\bar{a}$, III. 21-22) are quoted here in order to show the confirmation of birthlessness that is revealed through the mutual dispute of other schools of thought.

Inasmuch as one's nature, even in the ordinary

MÄNDŪKYA UPANIŞAD

sense of the term, does not change, (far less can the supreme nature change itself). It is being shown what the nature is:

सांसिद्धिकी स्वाभाविकी सहजा अकृता च या। प्रकृतिः सेति विज्ञेया स्वभावं न जहाति या।। १।।

9. By the word 'nature' is to be understood that which is permanently acquired, or is intrinsic, instinctive, non-produced, or unchanging in its character.

Samisiddhih means complete attainment, and anything resulting from that is sāmsiddikī, as is the nature of the successful Yogis who are endowed with such occult powers of becoming at will subtle like atom and so on. In the case of the Yogis, that nature does not change either in the past or in the future; it remains as it is. So also svābhāvikī, intrinsic — that which follows from the very nature of things, as for instance, such characteristics as heat or light in the case of fire etc. That nature also does not change according to place or time. Similarly, sahajā, instinctive, born with oneself, as for instance such activities of birds as flying in the sky. Any other behaviour, too, is natural, ya akytā, that is not produced by anything else, as for instance the tendency of water to flow down. And anything else, yā na jahāti svabhāvam, that does not change its character; sā, all that; vijneyā, is to be known, in this world; as prakrtih, nature. The idea sought to be conveyed is this: When the nature of empirical things, that are falsely imagined, does not change itself, what need can there be to point out

IV. 10] ALĀTAŠĀNTI-PRAKARAŅA

that the natural immortality of the intrinsically birthless ultimate realities, is not subject to mutation?

What constitutes that nature, whose change is assumed by the disputants? And what is the defect in such an assumption? The answer is this:

जरामरणनिर्मुक्ताः सर्वे धर्माः स्वभावतः । जरामरणमिच्छन्तश्च्यवन्ते तन्मनीषया ॥१०॥

10. All souls are intrinsically free from old age and death. But by imagining senility and death, and being engrossed in that thought, they deviate (from their nature).

Jarā-maraņa-nirmuktāḥ, free from old age and death, i.e. free from all (physical) changes — jarā, old age, and (ending with) maraṇa, death, etc. Who are they? Sarve dharmāḥ all entities, i.e. all the souls; svabhāvataḥ, by nature. Although the souls are intrinsically so, yet icchantaḥ, thinking, as though thinking, imagining; jarāmaraṇam, old age and death, for the Self, like the imagining of a snake on a rope; they cyavante, fall, that is so say, deviate, from their own nature; tanmanīṣayā, because of that thought — thought of senility and death, that is to say, because of the defect of being engrossed in that kind of thought.

The Vaiseşika points out how the Sāmkhyas, holding the view of the pre-existence of the effect in the cause, talk illogically:

163

कारणं यस्य वै कार्यं कारणं तस्य जायते । जायमानं कथमजं भिन्नं नित्यं कथं च तत् ॥११॥

11. The cause must undergo birth according to one who holds that the cause itself is the effect. How can a thing be birthless that takes birth, and how can it be eternal when it can be subject to (partial) disintegration?

The disputant, yasya, according to whom; kāranam, the cause itself (existing) in the form of materials like carth; is the kāryam, effect, that is to say, evolves into the effect; tasya, from his point of view; kāraņam, the cause, e.g. the Pradhana (or Primordial Nature), though itself unborn; jāyate, undergoes birth, as the effects like Mahat and the rest. This is the idea. If Pradhana is jāvamānam, born, as Mahat and the rest; katham, how, is it said by them; to be ajam, birthless? For it is a contradiction in terms to say that a thing is unborn and yet has birth. Moreover, they say that the Pradhana is eternal. How can it be eternal if it is bhinnam, split up, disintegrated (transformed), partially? For a composite thing, a jar for instance, which is subject to partial disintegration, is not seen to be eternal in this world. This is the idea. The meaning sought to be imparted is that it involves a contradiction on their part to say that a thing may be broken up partially and yet be birthless and eternal.

For elucidating the same idea it is said:

कारणाद्यद्यनन्यत्वमतः कार्यमजं यदि । जायमानाद्धि वै कार्यात्कारणं ते कथं ध्रुवम् ॥१२॥

12. If (according to you) the effect be non-different from the cause, then on that account the effect, too, is birthless. And if that be so, how can your cause be still eternal, it being non-different from its effect which is subject to birth?

Yadi, if; it is your intention to hold that there is ananyatvam, non-difference, of the effect; $k\bar{a}ran\bar{a}t$, from the cause, which is birthless; then from that it follows that $k\bar{a}ryam$ ajam, the effect is birthless. This is a fresh contradiction in your view that a thing is a product and yet birthless. Besides, there is this additional contradiction: If the effect and the cause are non-different, katham, how; can te, your; $k\bar{a}ranam$, cause; which is non-different $k\bar{a}ry\bar{a}t$ jāyamānāt, from the effect that is subject to birth; be yet dhruvam, eternal? For one half of a hen cannot be cooked, while the other half is reserved for laying eggs.

There is this further consideration:

अजाह्रै जायते यस्य दृष्टान्तस्तस्य नास्ति वै। जाताच्च जायमानस्य न व्यवस्था प्रसज्यते॥१३॥

13. That disputant has certainly no supporting illustration who holds that the effect is produced out of an unborn cause. If the produced effect is held to

165

be born out of another born thing, that, too, leads to no solution.

That disputant, yasya, according to whom; the effect jāyate, is produced; ajāt, from an unborn thing; tasya, for him; na asti vai dṛṣṭāntaḥ, there is absolutely no illustration (in support). The idea is that, in the absence of any supporting illustration, it stands proved by implication that nothing is born of the unborn. On the other hand, if it is held jāyamānasya, with regard to the produced effect; that it comes jātāt, from a born thing; then since the latter must come out of another born thing, na vyavasthā prasajyate, there will be no solution at all; or in other words it will lead to an infinite regress.

By the Vedic text, 'But when to the knower of Brahman everything has become the Self (then what should one know and throught what?)' (Br. II. iv. 14), it has been said that from the highest standpoint there is no duality. Taking its stand on this, the (next) verse says:

हेतोरादिः फलं येषामादिर्हेतुः फलस्य च। हेतोः फलस्य चानादिः कथं तैरुपवर्ण्यते ॥१४॥

14. How can beginninglessness be declared for cause and effect by those (disputants) according to whom the effect is the origin of the cause and the cause the origin of the effect?

IV. 15]

ALĀTASĀNTI-PRAKARANA

The disputants, yesām, according to whom; the phalam, effect, the aggregate of body and senses; is the $\bar{a}dih$, source; hetoh, of the cause, of merit etc.; and similarly, the hetuh, cause — merit etc.; is the $\bar{a}dih$, source; phalasya, of the effect, of the aggregate of body and senses — while thus positing a beginning for the cause and the effect by the very assertion that these are mutually the sources and products of each other¹ — katham taih upavanyate, how can it be asserted by them; that the cause and effect are beginningless? In other words, this is self-contradictory, for the Self that is eternal and unchanging can neither become the cause nor the effect.

How do they make a contradictory assertion? That is being shown:

हेतोरादिः फलं येषामादिर्हेतुः फलस्य च । तथा जन्म भवेत्तेषां पुत्राज्जन्म पितुर्यथा ॥१४॥

15. Just as a father may be born of a son, so also may birth be a possibility according to those (disputants) who admit that the effect is the source of the cause and the cause is the source of the effect.

Those who assert that the cause originates from the effect, which is itself produced by the cause, get involved in a contradiction that is on a par with that

¹ Merit and demerit result from embodiment; and embodiment results from merit and demerit. implied in *pituh janma putrāt*, the birth of the father from a son.

If it be contended that the contradiction pointed out above cannot be reasonably advanced, we say,

संमवे हेतुफलयोरेषितव्यः क्रमस्त्वया । युगपत्संभवे यस्मादसंबन्धो विषाणवत् ।।१६।।

16. A sequence has to be found out by you in the births of cause and effect. For should they originate together, there can be no causal relation, as between the two horns of a cow.

Kramah, a sequence — viz that the cause precedes and the effect succeeds; esitavyah, has to be found out; tvayā, by you; sambhave, in the births; hetuphalayoh, of cause and effect. This is necessary for this further reason: Yasmāt, since; yugapat sambhave, should there be a simultaneous origin, of the cause and effect; there will be asambandhah, want of relationship, through causality, as in the case of the two horns of a cow growing together on the left and the right.

How will they be unrelated? That is being stated:

फलादुत्पद्यमानः सन्न ते हेतुः प्रसिध्यति । अप्रसिद्धः कथं हेतुः फलमुत्पादयिष्यति ।।१७।।

17. If your cause has to come out of an effect, it can have no right to recognition. How will a cause,

IV. 18]

which is not established as such, produce a result?

Utpadyamānah san, if it has to originate; phalāt, from an effect, which is still to be born, which is itself yet without any existence — which is non-existent like the horn of a hare; hetuh, the cause; na prasidhyati, has no right to recognition; it does not have any birth. Katham, how; your hetuh, cause; which is yet to be endued with substance; and aprasiddhah, is not established as such, like the horn of a hare; utpādayisyati phalam, will produce a result? For it is not seen anywhere that two things that depend for existence on each other, and are analogous to the horns of a hare, are connected causally or in any other way. This is the idea.

यदि हेतोः फलात्सिद्धिः फलसिद्धित्रच हेतुतः । कतरत् पूर्वनिष्पन्नं यस्य सिद्धिरपेक्षया ॥१८॥

18. If the subsistence of the cause is dependent on the effect, and the subsistence of the effect is dependent on the cause, then which of the two has existence earlier, with relation to which the other may emerge?

If, even after the dismissal of any causal relation between the (so-called) cause and the (so-called) effect by pointing out the defect that they cannot be interrelated, it is still contended by you that the cause and the effect subsist by mutual interdependence, then tell me which one among the cause and the effect pre-exists, depending on the pre-existence of which the succeeding one may emerge into being. This is the idea.

अर्वाक्तिरपरिज्ञानं क्रमकोपोऽयवा पुनः । एवं हि सर्वभा बुढैरजातिः परिदीपिता ।।१९।।

19. Your inability to answer this will amount to your ignorance, or there will be falsification of the sequence (asserted by you). Thus indeed is highlighted in every way the absence of birth by the learned ones.

On the other hand, if you think that you have no answer, then this asaktih, inability, of yours; will amount to (the fallacy of) aparijnanam, want of knowledge of reality, i.e. ignorance; athava, or there will be; kramakopah — kopa, reversal, falsification, of the krama, sequence, spoken of by you, consisting in mutual succession in the sense that the effect derives its subsistence from the cause, and the cause derives its subsistence from the effect. This is the meaning. Evam, thus, from the fact that any causal relation between the cause and the effect cannot be substantiated; ajālih, the absence of birth, the non-origination of everything; paridīpitā, has been highlighted; buddhaih. by the learned people, the disputants who speak of the defects of each other's point of view. This is the purport.

 \cdot Objection: We spoke of the causal relation existing between the cause and the effect, whereas, playing merely on the words, you resorted to trickery saying that it is like the birth of the father from a son, that there is no such connection between the two like the two horns of a cow, and so on. Not that we asserted the production of an effect from a cause that did not exist, or the derivation of a cause from a nonIV. 20]

existing effect. What did we say then? It was admitted by us that causality is the kind of relation existing between the seed and the sprout.

With regard to this the answer is:

बीजाङ्कुराख्यो दृष्टान्तः सदा साध्यसमो हि सः । न हि साध्यसमो हेतुः सिद्धौ साध्यस्य युज्यते॥२०॥

20. What is known as the illustration of the seed and the sprout is ever on an equal footing with the (unproved) major term. For an illustration that is as unproved as the major term is not applied for establishing the relation of the major term with the minor term.

(This is but begging the question, because the supporting) drstantah, illustration; that is bijankurakhyah, known as that of the seed and the sprout; is sādhyasamah, on an equal footing with my major term (that has still to be proved). This is the idea.

Objection: Is it not a matter of experience that the causal relation between the seed and the sprout is without a beginning?

Answer: Not so, for it is admitted that the earlier ones have their beginning like the succeeding ones. Just as a separate sprout that has originated now from a seed has a beginning and another seed born out of a separate sprout has also a beginning by the very fact of succession in birth, similarly the antecedent sprouts as well as the antecedent seeds must have a beginning. And thus since each one of the whole chain of seeds and sprouts has a beginning, it is illogical to assert eternality for any one of them. So also is the case with regard to causes and effects. If now it is argued that the chain of causes and effects is without a beginning, we say, no; for any unity of such a series cannot be upheld. Indeed, apart from the causes and effects, even those who talk of the beginninglessness of such a series do not certainly vouch for a unitary entity called either a chain of seeds and sprouts or a procession of causes and effects. Therefore it has been well said, 'How can beginninglessness be declared by them for cause and effect?' (Kārikā, IV. 14). Thus since your view involves an illogicality from a fresh point of view, we are not really avoiding the point at issue. This is the idea. Moreover, hetuh, an illustration; that is sādhyasamah, as unproved

an illustration; that is sādhyasamaļe, as unproved as the major term; is not applied by those who are adepts in the use of the valid means of proof (i.e. inference); sādhyasiddhau, in the matter of establishing a relation between the major term and the minor term (in a syllogism). This is the meaning. The 'illustration' is to be understood here by the term hetuļe (lit. middle term), for an illustration substantiates the ground of inference; and what is under discussion is the illustration, and not the middle term.

It is being shown how birthlessness is highlighted by the wise:

> पूर्वापरापरिज्ञानमजातेः परिदीपकम् । जायमानाद्धि वै धर्मात् कथं पूर्वं न गृह्यते ।।२१।।

IV. 22]

21. The ignorance of the precedence and succession is a pointer to beginninglessness itself. For if it be a fact that a thing takes birth, why is not its cause apprehended?

And the fact that there is pūrvāparāparijnānam, ignorance of the precedence and succession, of the cause and the effect; that is paridīpakam, a pointer to, i.e. an indication of; ajāteh, birthlessness. If an entity takes birth, katham, why; is its pūrvam, antecedent cause; na grhyate, not grasped? By one who perceived a thing undergoing birth must also be perceived, as a matter of necessity, the originator of that thing; for the begetter and the begotten are inevitably inter-related. Therefore that is a pointer to birthlessness.

स्वतो वा परतो वाऽपि न किचिद्वस्तु जायते। सदसत् सदसद्वाऽपि न किंचिद्रस्तु जायते॥२२॥

22. A thing, whatsoever it may be, is born neither of itself, nor of something else, (nor of both together). Nothing whatsoever is born that (already) exists, does not exist, or both exists and does not exist.

For this further reason also nothing whatsoever that is sat, existing; asat, non-existing; or sat-asat, existing and non-existing, takes birth; since a thing that (supposedly) undergoes birth, na jāyate, is not born; svatah, of itself; paratah, of another; $v\bar{a}$, or, of both. There is no possibility of birth for it in any way. To illustrate: As a jar does not come out of that very jar, so nothing, that has not itself come into existence, can be born *svatah*, out of its own form by itself. Nor does it take birth *paratah*, from another, as something different from that another, just as a cloth is not born of a pot or a cloth from another cloth. Similarly a thing is not born both out of itself and another, just as a jar or a cloth is not born out of a jar and a cloth, for this involves a contradiction.

Objection: Is not a jar produced from earth and a son born of a father?

Answer: True, the ignorant have such notions and use such words as 'It exists', 'It takes birth'. Those very words and notions are examined by the discriminating people as to whether they are true or false, inasmuch as things called a jar, a son, and so on, which are contents of words and notions, are found on examination to be reduced to mere words, as is declared in the Vedic text, '(All modification) has speech as its basis . . .' (Ch. VI. i. 4). If a thing already exists, then just because it exists, it does not pass into birth like earth or a father. If a thing does not exist, then by the very fact of non-existence it does not undergo birth like the horn of a hare etc. If it is both existent and non-existent, then also it does not take birth, as it is impossible to have a thing that is selfcontradictory. Hence it is established that nothing whatsoever is born. As for those (Buddhists) who assert that a product is nothing more than the mere act of birth, and by whom it is held accordingly that actions, accessories, and results are but the same identical entity and that things are momentary, they are far out of the reaches of reasonableness, because

IV. 23] ALĀTAŠĀNTI-PRAKARAŅA

(according to this theory) a thing cannot be apprehended as 'This is so', since it ceases to exist for a second moment immediately after being perceived, and because memory of a thing not perceived carlier becomes impossible.

Besides, by asserting that the cause and the effect are without beginning, you admit perforce that the cause and the effect are without birth. If you ask, 'How is it?', the answer is:

हेतुर्न जायतेऽनादेः फलं चापि स्वभावतः । आदिर्न विद्यते यस्य तस्य ह्यादिर्न विद्यते ॥२३॥

23. A cause is not born of a beginningless effect; nor does an effect naturally come out (of a beginningless cause). (Cause and effect are thus birthless) for a thing that has no cause, has certainly no birth.

Anādeh, from a beginningless, effect; hetuh na jāyate, the cause is not born. For you do not certainly mean that from a beginningless effect, which is not born, the cause derives its birth. Nor do you mean that the phalam, effect; also gets its birth svabhāvatah, naturally, without any reason; anādeh, from an unborn cause that is beginningless. Accordingly, you virtually admit the birthlessness of cause and effect by asserting that they have no beginning. Hi, for; in this world, yasya, anything for which; ādih, a cause; na vidyate, does not exist; tasya, for that thing; na vidyate, cannot exist; ādih, a beginning, the birth, mentioned earlier; because birth is admitted for a thing that has a cause, and not for a causeless one.

An objection is being raised again in order to emphasize what has already been said:

प्रज्ञप्तेः सनिमित्तत्वमन्यथा द्वयनाशतः । संक्लेशस्योपलब्धेश्च परतन्त्रास्तिता मता॥२४॥

24. (We have to admit) that knowledge has its objects, since a contrary supposition leads to an annihilation of duality. And the existence of objects, as. supported by the opposite systems of thought, is also admitted from the fact of the experience of pain.

Prajnapti means knowledge, perception of sound etc. That knowledge is possessed of a nimitta, cause, i.e. an object. So sanimittatvam means the fact that it has an object-it has objective reference apart from its own subjective existence. This is what we admit. Perception of sound and the rest cannot be contentless, for it is related to objects. Anyatha, otherwise (in the absence of objects); there would result a void, dvayanāšatah, as a consequence of the annihilation of duality-consisting in a variety of experiences of sound, touch, blueness, yellowness, redness, etc. This is the meaning. Nor can it be said that duality, consisting in a variety of experiences, does not exist, for this is a matter of direct perception. Accordingly, from the fact that duality-variety of experiencesis perceived, paratantrāstitā, existence as held by the scriptures of other schools, that is to say, existence of

external objects, apart from their knowledge, as held by the books of opposite schools; mata, is admitted. For knowledge, which is of the nature of mere illumination, cannot have any variety amounting to a mere natural diversification within itself unless there is that variety in the corresponding objects, e.g. blueness, yellowness, etc., just as a crystal can have no variety unless it comes into relation with such limiting adjuncts as blueness etc. This is the idea. The external objects, as held by the opposite systems, have existence because of the further reason of samklesa, lit. suffering, which is the same as samklesana, causing of suffering; so it means pain. Pain arising from a burn etc. is a matter of experience. If, apart from knowledge, there were nothing externally present to cause a burn for instance, pain would not have been experienced. Therefore, from this fact, we admit that there is an external object. For there can be no pain in knowledge as such, since this is not the case elsewhere.¹

As to this the reply (of the subjective-idealist) is:

प्रज्ञप्तेः सनिमित्तत्वमिष्यते युक्तिदर्शनात् । निमित्तस्यानिमित्तत्वमिष्यते भूतदर्शनात् ॥२४॥

25. In accord with the perception of its cause, knowledge is supposed to be based on external objects. But from the standpoint of reality, it is held that the external cause is no cause.

¹ E.g. where the body is not in actual contact with fire.

It is true that *yuktidaršanāt*, in compliance with the logic of the experience of duality and pain; *isyate*, it is thus posited, by you; that *sanimittatvam prajňapteh*, there is an external object for knowledge. Now hold fast to your logic that external objects are the basis of experience.

Opponent: Tell me what follows from that.

The answer is: By us isyate, it is held; that nimittasya animittatoam, the cause — a jar or anything else that is assumed to be the basis of experience — is no cause; it is not the basis, the cause, of variety.

Objection: Why?

Answer: Bhūtadaršanāt, from the standpoint of reality, that is to say, of the ultimate Reality. For, unlike the existence of a buffalo independently of a horse, a jar does not exist apart from clay after being recognized as clay that it really is, nor does a cloth exist apart from the yarns, nor the yarns apart from the fibres. Thus if the reality is pursued successively till words and notions cease, we do not perceive any external cause of knowledge at all. This is the meaning.

Or the phrase may be abhūtadaršanāt (and not bhūtadaršanāt) in which case the meaning is: Abhūtadaršanāt, on account of finding the external object to be unreal; animittatvam isyate, it is not admitted to be the cause (of knowledge), just as a snake seen on a rope is not. Besides, the cause is not a cause, since it is the content of an erroneous perception; and as such, it ceases to be so when the error is removed. For to the

IV. 26] ALĀTAŠĀNTI-PRAKARAŅA

people in deep sleep, divine absorption (samādhi), or Liberation, where there is no erroneous perception, there is no knowledge of any external object, except (the consciousness of) the Self. Nor is a thing perceived by a madman perceived to be such by others who are in their senses. Hereby is demolished the arguments based on perception of duality and experience of pain.

चित्तं न संस्पृशत्यर्थं नार्थामासं तथैव च । अमूतो हि यतश्चार्थो नार्थामासस्ततः पृथक् ॥२६॥

26. Consciousness has no contact with objects; so also it has certainly no contact with appearances of objects. For according to the reasons adduced, an object has no existence, and an illusory object is not separate from the awareness.¹

As there is no external objects, therefore the *cittam*, consciousness; *na spṛśati*, does not come in contact with; *artham*, an object, anything acting externally as a support; nor does it come in contact with *arthābhāsam*, any appearance of an object, for it is as much a form of consciousness as the consciousness in dream; *hi*, for; *yatah*, in accordance with the above reasoning; *arthah*, an object; is *abhūtah*, non-existent, even in the

¹ We are dealing here with the Buddhist view. A.G. explains citta as sphurana, Self-emanation, shining. The act of knowing implies an object to be known, but consciousness, thought of as shining like the sun, needs no object. Besides, the sun and its shining are the same, though in common parlance a distinction is made between them.

179

waking state, just as a dream object is. Na, nor even is; arthābhāsah, an illusory object; prthak, different, from consciousness; it is consciousness alone that appears as objects like the jar etc. as it does in a dream.

Objection: In that case, the appearance of consciousness, in the form of a jar for instance even when there is no jar etc., must be a false perception. And if this be the conclusion, you should point out the (corresponding) right knowledge somewhere (so as to call this an error).

With regard to this, the answer (of the subjectivist) is:

निमित्तं न सदा चित्तं संस्पृशत्यध्वसु त्रिषु । अनिमित्तो विपर्यासः कथं तस्य भविष्यति ॥२७॥

27. Consciousness does not ever come in contact with external objects in all the three states. There being no external objects, how can there be any baseless, false apprehension of it?

Cittam, consciousness; na sadā samspršati, does not ever touch; any nimittam, cause, external object; trișu adhvasu, in all the three states (of past, present, and future). Should it come in contact with any object at any time, that will be non-erroneous, i.e. the highest reality, and in relation to that true perception, the illusive perception of a jar, where there is no jar, will be a false perception. But there is no contact of consciousness with any object at any time. Therefore katham, how; bhavisyati, will there be; tasya, for that consciousness; viparyāsah animittah, any false apprehension that has no object to support it? The idea implied is that there is no such thing as false knowledge at all. Rather it is the nature of consciousness that even in the absence of jar etc. it appears like those things.¹

The text starting with, 'In accord with the perception of its cause, knowledge ...' (IV. 25) and ending with the previous verse, which represents the view of the subjective-idealists among the Buddhists, is approved by the teacher (Gaudapāda) in so far as it refutes the view of those who believe in external objects. Now he makes use of that very argument (of the idealists) as a ground of inference for demolishing their own points of view:

तस्मान्न जायते चित्तं चित्तदृश्यं न जायते। तस्य पश्यन्ति ये जाति खे वै पश्यन्ति ते पदम्॥२८॥

28. Hence consciousness has no birth, and things perceived by it do not pass into birth. Those who perceive the birth of that consciousness, may as well see footmarks in space itself.

¹ Those who in a case of illusion, hold the theory of anyathäkhyäti, appearance of a real thing in a wrong way, believe that an illusion presupposes a true perception somewhere. But the subjective-idealists say that an error does not imply an earlier true knowledge, for an illusion and the objects in an illusion are all appearances of consciousness.

Since from the standpoint of reality, we also approve the view of the subjective-idealists that consciousness appears as a jar even though there is no such jar etc., therefore it also stands to reason that consciousness also appears to be born even though there is no such thing as birth. And therefore the cittam, consciousness; na jäyate, does not pass into birth; just as much as cittadrsyam na jāyate, the things perceived by consciousness have no birth. Therefore ye, those, the idealists, who; pasyanti, perceive; the jatim, birth; tasya, of that consciousness, along with its momentariness, sorrowfulness, voidness, non-selfhood, etc. - thereby presuming to perceive through that very consciousness the nature of consciousness which defies all perception; te, they, those idealists; pasyanti, see; padam, the footprint, of birds etc.; khe vai, in space itself. That is to say, they are bolder even than the other dualists. As for the nihilists, who, while perceiving the non-existence of everything, assert thereby the voidness of their own philosophy, they are even bolder than the idealist,¹ inasmuch as they want to have the sky itself in their grasp.

Through the above reasons it is established that Brahman is one and has no birth. Now the present verse is meant for summing up, in the form of a result

¹ It is through perception that the all-round voidness is proved. But how will perception itself be annulled? Not that perception can annihilate itself, for the simple reason that perception and its negation cannot coexist. Besides, if you talk of absolute nihilism, you affirm the non-existence of your own view as well. IV. 30]

(of the discussion), what was presented in the beginning as a proposition:

अजातं जायते यस्मादजातिः प्रकृतिस्ततः । प्रकृतेरन्यथामावो न कथंचिद्मविष्यति ॥२१॥

29. It is the birthless that (according to the disputants) takes birth. Since birthlessness is its very nature, therefore, the transmutation of (this) nature can take place in no way whatsoever.

Since it is imagined by the disputants that the unborn consciousness, which is nothing but Brahman, takes birth; therefore it is the *ajātam*, unborn; that *jāyate*, takes birth. *Yasmāt*, since; *ajātiķ*, birthlessness; is its *prakrtiķ*, nature; *tataķ*, therefore; *anyathābhāvaķ*, transmutation, birth; *prakrteķ*, of that nature, which is essentially unborn; *na katham cit bhavisyati*, will not take place in any way.

Here is another loophole discovered in the view of those who hold that the worldly state (i.e. bondage) and Liberation of the soul are real:

अनादेरन्तवत्त्वं च ंसंसारस्य न सेत्स्यति। अनन्तता चादिमतो मोक्षस्य न मविष्यति॥३०॥

30. Moreover, if the world be beginningless, its termination will not be achieved. And there will be no eternality for Liberation that has a beginning.

Samsārasya anādeķ, of the world (i.e. of bondage)

[IV. 30

which has no beginning, no definite non-existence in the past; antavattvam, termination; na setsyati, cannot be established, on the basis of reasoning; for, in common experience, nothing is seen to have an end that has no beginning.

Objection: It is seen that the continuity of the serial relation between the seed and the sprout breaks (though it has no beginning).

Answer: Not so, for this was refuted by pointing out that a series does not constitute a single substance ($K\bar{a}rik\bar{a}$, IV. 20).

Similarly, *na bhavisyati*, there will be no; *anantatā*, everlastingness; even *moksasya*, of Liberation, that has a beginning, that originates at the time of attainment of illumination; for this is not seen in the case of jars etc.

Objection: Since like non-existence brought about by the destruction of a jar etc., Liberation, too, is not a substance, therefore our point of view is free from defect.¹

Answer: On that assumption² your proposition that Liberation has existence from the standpoint of ultimate Reality will fall through. Besides, it will have no beginning just because it will be non-existent like the horn of a hare.

¹ Non-existence brought about by destruction has a beginning but no end, and non-existence is not a substance just as much as Liberation is not.

²·If Liberation is non-existence.

आदावन्ते च यन्नास्ति वर्तमानेऽपि तत्तथा । वितथैः सदृशाः सन्तोऽवितथा इव लक्षिताः ।।३१।।

31. That which does not exist in the beginning and the end, is equally so in the middle. Though they are similar to the unreal, yet they are seen as though real.

सप्रयोजनता तेषां स्वप्ने विप्रतिपद्यते। तस्मादाद्यन्तवत्त्वेन मिथ्यैव खलु ते स्मृताः ॥३२॥

32. Their utility is contradicted in dream. Therefore from the fact of their having a beginning and an end, they are rightly held to be unreal.

These two verses, which were explained in the chapter 'On Unreality' ($K\bar{a}rik\bar{a}$, II. 6-7), are quoted here in connection with the non-existence of bondage and Liberation.

सर्वे धर्मा मृषा स्वप्ने कायस्यार्न्तानदर्शनात् । संवृतेऽस्मिन् प्रदेशे वै भूतानां दर्शनं कुतः ॥३३॥

33. All entities are unreal in dream, since they are seen within the body. How can there be the vision of creatures within this narrow space here?¹

¹ In this way the verse indirectly aims at proving the falsity of all. If falsity in dream follows from the fact that things are seen inside the body, then all things even in the waking state must be false, since they are seen within the body of Virāţ. And if falsity

[IV. 34

The topic raised in, 'But from the standpoint of reality, it is held that the external cause is no cause' ($K\bar{a}rik\bar{a}$, IV. 25), is being elaborated by these verses.

न युक्तं दर्शनं गत्वा कालस्यानियमाद्गतौ । प्रतिबुद्धृृ्ञ्च वै सर्वस्तस्मिन् देशे न विद्यते ।।३४।।

34. It is not proper to hold that dream objects are experienced by reaching them, since the requisite time involved in the journey is lacking. Moreover, nobody, on waking up, continues in the place of dream.

The idea implied is that there is no going over to any other place in dream, for the time required for and the distance involved in coming and going, as validly settled in the waking state, *aniyamāt*, have no corresponding fixity, in the dream state.

मित्राद्धैः सह संसन्त्र्य संबुद्धो न प्रपद्यते । गृहीतं चापि यॉत्कचित्प्रतिबुद्धो न पक्यति ।।३४।।

35. Having conferred with friends and others (in dream) one does not get confirmation when awake. And whatever one acquired in dream, one does not see it after waking up.

of dream objects follows from the fact of their being seen within a place that is not adequate for them, then things of the waking state must be false since they, though naturally associated with space and time, are still seen in Brahman that has no space and time — A.G.

Sammantrya, having deliberated; mitrādyaih saha, with friends and others (in dream); one na prapadyate, does not get confirmation, of that very deliberation; when pratibuddhah, up from dream. And yat kim cit, whatever, gold etc.; grhītam, was acquired; he does not get after waking.¹ For this reason, too, one does not go to a different place in dream.

स्वप्ने चावस्तुकः कायः पृथगन्यस्य दर्शनात् । यथा कायस्तथा सर्वं चित्तदृत्र्यमवस्तुकम् ।।३६॥

36. Moreover the body (seen) in a dream is unsubstantial, since another body is seen (to exist). As it is the case with the body, so is everything perceived through consciousness and is (therefore) unsubstantial.

And the kāyah, body; that is seen svapne, in dream, to be walking about; is avastukah, unsubstantial; anyasya pythak daršanāt, since another (sleeping) body, as distinguished from the one in the state of dream, is seen separately. The idea is this: As the body seen in dream is unreal, so all things seen through consciousness even in the waking state are unreal, for they are all equally perceived through consciousness. The significance of the topic under discussion is that the waking state also is unreal, since it is similar to the dream state.

¹ An alternative meaning is: To the man of illumination (pratibuddhah) there is no consciousness of anything except Brahman. So what may appear to others as his eating, drinking, etc., does not appear to himself to be so, for he thinks, 'I do not do anything' (G. V. 8)—A.G.

Things of the waking state are unreal because of this further reason:

ग्रहणाज्जागरितवत्तद्वेतुः स्वप्न इष्यते । तद्वेतुत्वात्तु तस्यैव सज्जागरितमिष्यते ॥३७॥

37. Since a dream is experienced like the waking state, the former is held to be the result of the latter. In reality, however, the waking state is admitted to be true for that dreamer alone, it being the cause of his dream.

Grahanāt, since dream is experienced; jāgaritavat, like the waking state, as characterized by the subjectobject relationship; therefore dream isyate, is held; taddhetuh, as having that waking state as its source; that is to say, dream is a product of the waking state. Taddhetutvāt, since dream has that waking state as its cause; that jāgaritam, waking state; is sat, true; tasya eva, for that dreamer alone; but not so for the others, just like the dream itself. This is the implication. As a dream is true to a dreamer alone, so far as it appears like objects of common experience having existence. similarly the waking things that appear like existing objects of common experience are true to the dreamer alone, since (according to him) they are the cause of his dream. In reality, however, just like dream objects, the things of the waking state, too, are not objects of common experience to all, (nor have they existence). This is the purport.

Objection: Even though the objects of the waking

IV. 38]

state be the prototypes of those of the dream state, they are not unsubstantial like dream; for dream is extremely changeful, whereas the waking state is seen to be steady.

Answer: This is truly so to the non-discriminating people, but to the man of discrimination nothing whatsoever is known to have origination. Therefore—

उत्पादस्याप्रसिद्धत्वादजं सर्वमुदाहृतम् । न च भूतादभूतस्य संभवोऽस्ति कथंचन ॥३८॥

38. Since origination is not a well-established fact, it is declared (by the Upanisads) that everything is birthless. Moreover, there is no origination, in any way whatsoever, of any non-existing thing from an existing one.

Utpādasya aprasiddhatvāt, as origination is not a wellestablished fact; so in the text, 'co-extensive with everything within and without, and since He is birthless' (Mu. II. i. 2), it has been udāhrtam, declared, by the Upanişad in effect; that sarvam ajam, everything is birthless; or in other words, the (birthless) Self is everything. And your further conjecture that the unreal dream originates from the real waking state is also untenable. For in this world na asti sambhavah abhūtasya, there is no origination of a nonentity; bhūtāt, from a real thing; for a nonentity, like the horn of a hare, is not seen to originate in any way whatsoever.

Objection: Has it not been said by yourself that

dream is a product of the waking state? So how is it said that origination is not a well-recognized fact?

Answer: As to that, listen to what we mean by the causal relation (between them):

असज्जागरिते दृष्ट्वा स्वप्ने पश्यति तन्मयः । असत्स्वप्नेऽपि दृष्ट्वा च प्रतिबुद्धो न पश्यति ॥३६॥

39. Having seen some unreal thing in the waking state and being emotionally affected, one sees it in dream also. And having even seen some unreal thing in dream, one does not see it in the waking state.

Drstvā, having seen; jāgarite, in the waking state; asat, an unreal, illusory thing, like a snake imagined on a rope; and becoming tanmayah, emotionally affected by its thoughts; one pasyati, sees; svapne, in dream, also, by imagining the duality of subject and object as in the waking state. Similarly, unless one resorts to imagination, one, drstvā, after having seen; asat, an unreal thing; svapne api, even in dream; na pasyati, does not see (it); pratibuddhah, when he is awake. From the use of the word 'ca, and', it follows that, in a similar way, one does not sometimes see in dream something that one had seen in the waking state. In this sense the waking state is said to be the cause of dream, but thereby it is not implied that the former is real.

In reality, however, it cannot be established that anything has any causal relationship with something in any way whatsoever. How?

नास्त्यसद्वेतुकमसत्सदसद्वेतुकं तथा । सच्च सद्वेतुकं नास्ति सद्वेतुकमसत्कुतः ॥४०॥

40. There is no unreal thing that has an unreality as its cause; similarly there is no unreal thing that has a reality as its cause. Moreover, there is no existing thing that has another existing thing as its cause. How can there be an unreal thing that is produced out of something real?

Na asti asat, there is no unreal thing; asaddhetukam, that has an unreal thing for its cause—e.g. an unreal thing like a flower in the air that has an unreal thing like a hare's horn as its cause. Similarly, na asti sat, there is no such existing entity, a jar for instance; that is asaddhetukam, the product of an unreality—a hare's horn for instance. Tathā, so also; na asti sat, there is no existing thing, a pot for instance, that is a product of another existing thing, a jar for instance. How can there be any possibility of an unreality being produced out of a reality? Besides, there is no other kind of causal relationship possible or imaginable. So the idea implied is that, to the discriminating people, causal relationship of anything whatsoever is really an unestablished fact.

Again, by way of removing any surmise about the causal relationship between the unreal waking and dream states, it is said:

विपर्यासाद्यथा जाग्नदचिन्त्यान् मूतवत् स्पृशेत्। तथा स्वप्ने विपर्यासाद्धर्मांस्तत्रैव पश्यति॥४१॥ 41. As some one, owing to lack of discrimination, may in the waking state, be in contact with unthinkable objects, fancying them to be real, so also in dream, one sees the objects in that dream alone, owing to want of discrimination.

Yathā, as; some one, viparyāsāt, owing to want of discrimination; may imagine jāgrat, in the waking state; as though one is in touch with acintyān, unthinkable objects, like a snake etc. imagined on a rope etc.; bhūtavat, as if they were real; tathā, so also; svapne, in dream; viparyāsāt, owing to want of discrimination; he fancies as though visualizing dharmān, objects, like elephants etc., that is to say, he sees them there in the dream alone, and not as the products of the waking state.

उपलम्मात्समाचारादस्तिवस्तुत्ववादिनाम् । जातिस्तु देशिता बुद्धैरजातेस्त्रसतां सदा ॥४२॥

42. Instruction about creation has been imparted by the wise for the sake of those who, from the facts of experience and adequate behaviour, vouch for the existence of substantiality, and who are ever afraid of the birthless entity.

For those who upalambhāt, because of perception; and samācārāt, adequate behaviour, e.g. proper observance of duties pertaining to castes and stages of life -(i.e.) for those who, because of these two reasons, astivastutvavādinām, resort to the declaration of existence of substantiality — for the sake of those who are

earnest in their effort, who are faithful, but who are possessed of an inferior kind of discrimination; that jātih, birth (creation); desitā, has been inculcated -as a means to the attainment of the Reality; buddhaih, by the wise, by the non-dualists, with the idea: 'Let them accept it for the time being. But in the case of those practising Vedanta, the discriminating knowledge about the birthless and non-dual Self will arise in them spontaneously.' But they have not done so from the standpoint of the ultimate Truth. And this is so because those non-discriminating people (for whom such instruction is meant) are devoted to Vedic conduct, while, owing to their dull intellect, they are sada, ever; afraid, ajāteh, of the birthless entity; apprchending that this will lead to their annihilation. This is the idea. It was said earlier, 'that is merely by way of generating the idea (of oneness)' (Kārikā, III. 15).

अजातेस्त्रसतां तेषामुपलम्माद्वियन्ति ये। जातिदोषा न सेत्स्यन्ति दोषोऽप्यल्पो भविष्यति॥४३॥

43. For those who, being afraid of the Unborn, deviate from the true path by relying on their experience of duality, the faults arising from acceptance of creation will not bear fruit; and the fault, too, will be insignificant.

And ye, those who; thus, upalambhāt, relying on perception, as well as adequate behaviour; and ajāteh trasatām, being afraid of the unborn entity (i.e. the Self); and declaring that duality exists, viyanti, deviate, from the non-dual Self, that is to say, accept duality—

fIV.43

(i.e.) in the case of the people who are afraid of the Unborn, but are faithful, and tread the righteous path, *jātidosāh*, the faults arising from the perception of origination; *na setsyanti*, will not attain fruition, for they are treading the path of discrimination. *Dosāh api*, should there be any *dosāh*, defect, caused by nonattainment of full enlightenment; that *api*, too; *alpah bhavisyati*, will be insignificant.

Objection: As perception and adequate behaviour are valid proofs, things comprised in duality do exist.

Answer: Not so, for perception and adequate behaviour are not universally true. How they are not universally true is being shown:

उपलम्मात्समाचारान्मायाहस्ती यथोच्यते। उपलम्मात्समाचारादस्ति वस्तु तथोच्यते॥४४॥

44. As an elephant conjured up by magic is called an elephant by depending on perception and adequate behaviour, so from the facts of perception and adequate behaviour a thing is said to be existing.

As māyāhastī, an illusory elephant conjured up by magic, though non-existent in reality, is yet certainly perceived, just like a real elephant—people behave towards it in this world just as with a real elephant, and call it an elephant because of such characteristics of an elephant as being capable of being bound, ridden upon, etc.; similarly upalambhāt samācārāt, because of perception and appropriate conduct (with regard to them); ucyate vastu asti, it is said that duality, consisting of diversity, does exist. Therefore the purport is that the facts of being perceived and dealt with appropriately cannot be the tests establishing the existence of a thing.

What, again, is the absolutely real thing which is the substratum of all unreal ideas of creation and the rest? The answer is:

जात्यामासं चलामासं वस्त्वामासं तथैव च। अजाचलमवस्तुत्वं विज्ञानं शान्तमद्वयम् ॥४४॥

45. It is Consciousness — birthless, motionless and non-material, as well as tranquil and non-dual which has the semblance of birth, appears to move, and simulates a substance (possessed of qualities).

That which being birthless has the semblance of birth is jātyābhāsam, as for instance in the illustration, 'Devadatta has birth'. That which appears as though moving is calābhāsam, as in the case, 'That very Devadatta goes'. Vastu is a substance that can have attributes; that which simulates that is vastvābhāsam, as for instance in the illustration, 'That very Devadatta is fair or tall'. Devadatta appears as though taking birth, as though he moves, and as if he is fair or tall, though in reality he is birthless, changeless, and non-material. What is it that answers to these characteristics? It is vijnānam, Consciousness. It is sāntam, quiescent, being devoid of birth etc. And therefore It is also advayam, without a second. This is the meaning.

एवं न जायते चित्तमेवं धर्मा अजाः स्मृताः । एवमेव विजानन्तो न पतन्ति विपर्यये ॥४६॥

46. Thus Consciousness has no birth; thus are the souls considered to be birthless. Those who know thus indeed, do not fall into calamity.

Evam, thus, in accordance with the reasons adduced; cittam na jāyate, Consciousness¹ does not undergo birth; evam, thus; are dharmāh, the souls; smṛtāh, considered — by the knowers of Brahman; to be ajāh, birthless. The plural in dharmāh (souls) is used metaphorically, since the non-dual Self Itself appears to be different in accordance with the multiplicity of bodies. Those who, after renouncing all cravings for external things, vijānantah evam eva, know this indeed, that the aforesaid Consciousness, free from birth etc., is the non-dual reality which is the Self; na patanti, do not fall again; viparyaye, into calamity, into the sea of the darkness of ignorance, as is confirmed by the text of the Vedic verse, 'what delusion and what sorrow can there be for that seer of oneness?' (\overline{I} \$, 7).

In order to dilate upon the above-mentioned realization of the Self, the text goes on:

ऋजुवकादिकाभासमलातस्पन्दितं यथा । ग्रहणप्राहकामासं विज्ञानस्पन्दितं तथा ॥४७॥

47. As the movement of a firebrand appears to

¹ 'Cilla means Consciousness, i.e. Brahman.' - A.G.

IV. 48]

be straight or crooked, so is it the vibration of Consciousness that appears to be the knower and the known.

Yathā, as; in common experience, it is seen that alātaspanditam, the movement of a firebrand; *rju*vakrādikābhāsam, appears to be straight, curved and so on; tathā, similar; is grahaņagrāhakābhāsam, the appearance as the perception and the perceiver, that is to say, as the object and the subject. What is it that appears? Vijnānaspanditam, the vibration of Consciousness, as it were, it being set in motion by ignorance, for the unmoving Consciousness can have no vibration, as it was indeed said earlier, 'birthless, motionless' (Kārikā, IV. 45).

अस्पन्दमानमलातमनामासमजं यथा । अस्पन्दमानं विज्ञानमनाभासमजं तथा ॥४८॥

48. As the firebrand, when not in motion, becomes free from appearances and birth, so Consciousness, when not in vibration, will be free from appearances and birth.

Yathā, as; that very alātam, firebrand; aspandamānam, when not in motion, when it does not undergo birth to become straight etc. in shape; it remains anābhāsam ajam, free from appearances and birth; tathā, so; Consciousness, which vibrates through ignorance, will, on the cessation of ignorance, become aspandamānam, free from vibration, consisting in birth etc. — will remain free from appearances, birth, and vibration. This is the meaning. Moreover,

अलाते स्पन्दमाने वै नामासा अन्यतोमुवः । न ततोऽन्यत्र निस्पन्दान्नालातं प्रविशन्ति ते ॥४६॥

49. When the firebrand is in motion, the appearances do not come to it from anywhere else. Neither do they go anywhere else from the firebrand when it is at rest, nor do they (then) enter into it.

Alāte spandamāne, when that very firebrand is in motion; the appearances of straightness, crookedness, etc. do not come to be in it, anyatah, from anywhere outside the firebrand; this is what is meant by na anyatobhuvah, non-adventitious. Na, nor; do they go out anywhere else, tatah nispandāt, from that firebrand, when it is at rest. Na te alātam pravišanti, nor do they enter into the motionless firebrand itself.

Furthermore,

न निर्गता अलातात्ते द्रव्यत्वामावयोगतः । विज्ञानेऽपि तथैव स्युरामासस्याविशेषतः ॥५०॥

50. They did not issue out of the firebrand, by reason of their unsubstantiality. With regard to Consciousness also the appearances must be of a similar kind, for as an appearance there is no distinction.

Te, they, the appearances; na nirgatā h alātāt, do not issue out of the firebrand, like something out of a house; dravyatva-abhāva-yogata h, because of their being. devoid of substantiality, that is to say, because of unsubstantiality, the phrase being construed thus: The quality of a dravya, substance, is dravyatva; the absence of that is dravyatvābhāva; and yogatah means by reason of. Entry is possible for things and not for those that are not so. The appearances of birth etc., vijnāne api tathaiva syuh, in Consciousness also must be thus alone; ābhāsasya avišesatah, for as an appearance there is no distinction.

It is being shown how they are similar:

विज्ञाने स्पन्दमाने वै नाभासा अन्यतोभुवः । न ततोऽन्यत्र निस्पन्दान्न विज्ञानं विशक्ति ते ॥११॥ न निर्गतास्ते विज्ञानाद् द्रव्यत्वाभावयोगतः । कार्यकारणताऽभावाद्यतोऽचिन्त्याः सदैव ते ॥१२॥

51. When Consciousness is in vibration, the appearances do not come to It from anywhere else. Neither do they go anywhere else from Consciousness when It is at rest, nor do they (then) enter into It.

52. They did not issue out of Consciousness, by reason of their unsubstantiality; for they are ever beyond comprehension, being without any relation of cause and effect (with Consciousness).

Everything with regard to Consciousness is similar to that of the firebrand; Consciousness has this one distinction that It is ever unmoving. It is being pointed out as to what causes the appearances of creation etc. in the motionless Consciousness: *Yatah*, for; *te*, they; are sadā eva acintyāh, ever beyond comprehension; kāryakāraņatā-abhāvāt, in consequence of the absence of any logical connection of cause and effect (between the appearances and Consciousness), they being of the nature of non-existence. Just as the ideas of straightness etc. are perceived in the firebrand itself, although the appearances of straightness etc. are unreal, similarly the ideas of creation etc. in the absolute Self, which appear even though there are no creation etc., must be false. This is the purport as a whole (of the two verses).

It has been established that the Reality which is the Self, is one and unborn. Now, according to those who imagine causality,

10 8

द्रव्यं द्रव्यस्य हेतुः स्यादन्यदन्यस्य चैव हि। द्रव्यत्वमन्यभावो वा धर्माणां नोपपद्यते ॥५३॥

53. A substance can be the cause of a substance, and one thing can be the cause of another different from itself. But the souls can be considered neither as substances nor as something different from other things.

Dravyam, a substance; syāt hetuh, can be the cause; dravyasya, of a substance; anyat anyasya, one thing can be the cause of another; but a thing cannot be its own cause. Nor is a non-substance seen in common experience to be independently a cause of anything.1 Na upapadyate, nor is it logical, in anyway whatsoever; that dharmanam dravyatvam anyabhavah va, the souls should be considered either as substances or as something different from other things, under which possibility alone could the Self become either a cause or an effect.² Thus since the Self is neither a substance nor different from anything,³ It is neither the cause nor the effect of anything. This is the meaning.

एवं न चित्तजा धर्माश्चित्तं वाऽपि न धर्मजम्। एवं हेतुफलाजाति प्रविधन्ति मनीषिणः ॥ १४॥

54. In this way the external entities are not the products of Consciousness; nor is Consciousness a product of external entities. Thus the wise confirm the birthlessness of cause and effect.

Evam, thus, according to the reasons adduced; Consciousness is the very essence of the Self that is identical with Consciousness. Hence dharmah, external entities; na cittajah, are not the products of Consciousness; 4 na cittam dharmajam, nor is Consciousness a product of external entities. For all entities are the mere appearances of that which is essentially Consciousness. Consequently, an effect is not produced

1 Quality, action, genus, etc. can be causes through the substances in which they inhere.

- ² For causality presupposes difference. ³ I.e. the Self being all-pervasive and homogeneous.
- 4 A.G. equates citta with the supreme Self.

from a cause, nor is a cause from an effect. In this way the knowers of Brahman, *pravisanti*, enter into, affirm; *hetuphalājātim*, the birthlessness of cause and effect. The idea is that they arrive at the non-existence of cause and effect.

It is being pointed out as to what will happen to those, again, who cling to cause and effect:

यावढेतुफलावेशस्तावढेतुफलोद्भवः । क्षीणे हेतुफलावेशे नास्ति हेतुफलोद्भवः ॥४४॥

55. Cause and effect spring into being so long as there is mental preoccupation with cause and effect. There is no origination of cause and effect when the engrossment with cause and effect becomes attenuated.

Yāvat, as long as; hetuphalāvešah, attention is riveted on cause and effect, under the idea, 'I am the producer of the causes called virtue and vice; merit and demerit belong to me; and I shall enjoy their fruit by being born sometime and somewhere among the host of creatures'—as long as causality is superimposed on the Self, as long as the mind is preoccupied with it; tāvat hetuphalodbhavah, so long do cause and effect, merit and demerit and their effect, arise, i.e. are active without a break. When the engrossment with cause and effect, which springs from ignorance, is removed through the realization of non-duality as stated before, like the removal of the possession by evil spirit through the power of incantation and

IV. 57] ALĀTAŠĀNTI-PRAKARANA

medicines, then that engrossment ksine, being attenuated; na asti hetuphalodbhavah, there is no origination of cause and effect.

What is the harm even if there is the origin of cause and effect? The answer is:

यावद्वेतुफलावेशः संसारस्तावदायतः। क्षीणे हेतुफलावेशे संसारं न प्रपद्यते॥४्६॥

56. As long as there is mental preoccupation with causality, so long does the worldly state continue. When engrossment with causality is exhausted, one does not attain the worldly state.

Yāvat, as long as, mental preoccupation with causality is not removed through perfect illumination; tāvat, so long; samsārah, the worldly state; persisting unimpaired, remains āyatah, outstretched, that is to say, continues for long. But, again, hetuphalāveše ksīņe, when engrossment with causality is attenuated; na prapadyate samsāram, one does not attain the worldly state; for then there is no cause for it.

Objection: As there is nothing else apart from the unborn Self, how can it be said by you that there are such phenomena as the origin and destruction of cause and effect as well as of the world?

Answer: Listen:

संवृत्या जायते सर्वं शाक्ष्वतं नास्ति तेन वै। सद्भावेन ह्यजं सर्वमुच्छेदस्तेन नास्ति वै॥४७॥ 57. Everything seems to be born because of the empirical outlook; therefore there is nothing that is eternal. From the standpoint of Reality, everything is the birthless Self; therefore there is no such thing as annihilation.

Sarvam jāyate, everything is produced; sanivņtyā, by sanivaraņa, concealment, consisting in the empirical outlook within the domain of ignorance. Tena, therefore; within the range of ignorance, na asti vai sāsvatam, there is surely nothing that is eternal. Hence it has been said that the world, characterized by origin and destruction, remains outstretched. But, sadbhāvena, from the standpoint of the highest Reality; since sarvam ajam, everything is the birthless Self; tena, therefore; in the absence of birth, na asti vai, there is surely no; ucchedah, annihilation, of any cause, effect, etc. This is the meaning.

धर्मा य इति जायन्ते जायन्ते ते न तत्त्वतः । जन्म मायोपमं तेषां सा च माया न विद्यते ॥ १८॥

58. The entities that are born thus are not born in reality. Their birth is as that of a thing through Māyā (magic). And that Māyā again has no reality.

Ye dharmāh, the entities, souls and other things, which; jāyante, are born, are imagined to be born; te, they; that are *iti*, of this kind—the word '*iti*, of this kind' indicates the empirical outlook mentioned earlier (IV. 57); so the meaning is, 'The entities, that are of this kind, are born thus owing to (concealment IV. 59]

through) the empirical outlook'; *te*, they; *na jāyante*, are not born; *tattvatah*, in reality. And as for the *janma*, creation—owing to the concealment (the empirical outlook); *tesām*, of those—of those entities mentioned above; that birth is to be understood *māyopamam*, like what occurs through Māyā (magic). It is to be understood as similar to magic.

Objection: Then there is an entity called Māyā.

Answer: Not so. Sā ca māyā na vidyate, and that Māyā does not exist; the idea being that the term Māyā relates to something non-existing.

It is being shown how their birth can be compared to magical birth:

यथा मायामयाद् बीजाज्जायते तन्मयोऽङ्करः। नासौ नित्यो न चोच्छेदी तद्वद्वर्मेषु योजना ॥४१॥

59. As from a magical seed grows a sprout equally illusory—it being neither eternal nor destructible just so is the logic (of birth or death) applicable in the case of objects.

Yathā, as; māyāmayāt bījāt, from a magical seed, of a mango for instance; jāyate, grows; ankurah tanmayah, a sprout (of equal substance), equally illusory; asau, that one, the sprout; being na nityah, neither eternal; na ca ucchedī, nor destructible—simply because it has no existence; tadvat, just so; is the yojanā, reasoning; about birth and death, dharmeşu, in the case of the objects. The idea is that, from the standpoint of Reality, there can be no real birth or death for the objects.

नाजेषु सर्वधर्मेषु शाक्ष्वताशाक्ष्वताभिधा। यत्र वर्णा न वर्तन्ते विवेकस्तत्र नोच्यते॥६०॥

60. With regard to all the birthless entities there can be no application of the words 'eternal' and 'noneternal'. No categorical statement can be made with regard to an entity where words do not apply.

But from the standpoint of absolute Truth, sāsnatāsāsatābhidhā, the terms 'eternal' or 'non-eternal'; na ajeşu dharmeşu, do not apply to the birthless entities, the souls, whose essence consists in a mere eternal and homogeneous Consciousness. This is the meaning. The term varņāh derivatively signifies those by which things are described and it means words. Yatra, where, with regard to which (souls), words do not apply, so far as their description or revelation is concerned; tatra, there; na ucyate, is not uttered; any vivekah, categorical statement, that 'This is so indeed', or in other words that 'It is either eternal or non-eternal', as is declared in the Vedic text, 'From where speech returns' (Tai. II. iv. 1).

यथा स्वप्ने ढयामासं चित्तं चलति मायया। तथा जाग्रद्ढयामासं चित्तं चलति मायया॥६१॥ अढ्वयं च ढ्वयामासं चित्तं स्वप्ने न संशयः। अढ्वयं च ढ्वयामासं तथा जाग्रज्ञ संशयः॥६२॥ IV. 64]

61. As in dream Consciousness (cittam) vibrates as though having dual functions, so in the waking state Consciousness vibrates as though with two facets.

62. There is no doubt that Consciousness, though one, appears in dream in dual aspects; so also in the waking state, Consciousness, though one, appears to have two aspects.

That the absolute Consciousness, which is really non-dual, becomes an object of speech, is due only to the activities of mind, but not so in reality. The verses were explained earlier¹ (*Kārikā*, III. 29-30).

For this further reason, duality, describable by words, does not exist:

स्वप्नदृक्प्रचरन् स्वप्ने दिक्षु वै दशसु स्थितान् । अण्डजान् स्वेदजान् वाऽपि जीवान्पक्यति यान् सदा ॥६३॥ स्वप्नदृक्वित्तदृक्यास्ते न विद्यन्ते ततः पृथक् । तथा तद्दृक्यमेवेदं स्वप्नदृक्वित्तमिष्यते ॥६४॥

63-64. The creatures — be they born from eggs or from moisture — which the experiencer of dream ever sees as existing in all the ten directions, while he is roaming in the dreamland, are but objects of perception to the consciousness of the dreamer, and

¹ The word manah occurring in Kārikā, III.29-30, is substituted here by cittam (meaning Consciousness in the Vedāntic, and not in the Buddhistic sense). In verses 64-67, citta means empirical consciousness. they do not exist apart from that consciousness. Similarly, this consciousness of the dreamer, is admitted to be only an object of perception to that dreamer.

Yān jīvān, the creatures which; the svapnadrk, seer of a dream; sadā pašyati, ever sees; svapne caran, while moving in dream, in the place seen in a dream; dikşu vai dašasu sthitān, as existing in all the ten directions; be they andajān, those born from eggs; or svedajān, those born from moisture.

Objection: If that be so, what follows therefrom?

The answer is: Te, those creatures; are the svapnadykcittadysyāh, objects of perception to the consciousness of the experiencer of dream. Therefore na vidyante, they do not exist; tatah pythak, separately from the consciousness of the dreamer. This is the idea. It is consciousness alone that is imagined in the forms of diverse objects like creatures etc. Tathā, similarly; even idam, this; which is svapnadykcittam, the consciousness of the experiencer of dream; is idam taddysyam eva; merely an object of perception to that dreamer. Tad-dysyam means the experience (dysyam) of that (tat) dreamer. Therefore, such a thing as consciousness has no existence apart from the dreamer. This is the idea.

चरञ्जागरिते जाग्रद्दिक्षु वै दशसु स्थितान् । अण्डजान् स्वेदजान् वाऽपि जीवान्पक्ष्यति यान्सदा ॥६१॥ जाग्रज्वित्तेक्षणीयास्ते न विद्यन्ते ततः पृथक् । तथां तद्दृक्यमेवेदं जाग्रतक्षित्तत्तमिष्यते ॥६६॥ 65-66. The creatures — be they born from eggs or from moisture — which the experiencer of the waking state ever sees as existing in all the ten directions, while he is roaming in the places of the waking state, are but objects of perception to the consciousness of the man in the waking state, and they do not exist separately from that consciousness. Similarly, this consciousness of the waking man is admitted to be only an object of perception to the waking man.

The creatures visible to a waking man are nondifferent from his consciousness, since they are perceived through consciousness, just like the creatures perceived by the consciousness of a dreamer. And that consciousness, again, engaged in the perception of creatures, is non-different from the experiencer, since it is perceived by the experiencer, like the consciousness in the dream state. The remaining portion has already been explained.

उमे ह्यन्योन्यवृत्र्ये ते कि तदस्तीति नोच्यते। लक्षणाशून्यमुभयं तन्मतेनैव गृह्यते॥६७॥

67. They are both perceptible to each other. (If the question arises), 'Does it exist?' the answer given is, 'No'. Both of them lack valid proof, and each is perceived merely because of a prepossession with the other.

Te ubhe, both of them — consciousness and the creatures — knowledge and its modifications — these two; are anyonyadrise, objects of perception to each

other. For the thing that is called knowledge is what it is in relation to its objects such as the creatures; and the objects of perception, such as the creatures, are so in relation to knowledge; consequently, their awareness is mutually determined. Hence, when it is asked, 'Kim tat asti iti, does it exist?'; ucyate, the answer made, by the discriminating man is, 'na, no' - nothing whatsoever, be it knowledge or the things perceived through knowledge, exists. For in dream neither an elephant nor a knowledge having an elephant as its content exists. So also, in the waking state, these do not exist according to the discriminating people. This is the idea implied. How? Since ubhayam, both, knowledge and the objects of knowledge; are laksanāšūnyam, devoid of laksana, anything whereby they can be established; that is to say, they are both without valid proof. Either is grhyate, perceived; tanmatena eva, merely because of a prepossession with the other. There can be no knowledge of the pot by setting aside the idea of the pot, nor can there be any comprehension of the idea of the pot by discarding the pot. The meaning implied is that in the case under discussion no distinction, of one being the knowledge and the other its object, can be made between the two.

यथा स्वप्नमयो जीवो जायते म्रियतेऽपि च। तथा जीवा अमी सर्वे मवन्ति न मवन्ति च॥६८॥

68. As a creature seen in a dream undergoes birth and death, so also do all these creatures appear and disappear.

यथा मायामयो जीवो जायते म्रियतेऽपि च। तथा जीवा अमी सर्वे मवन्ति न मवन्ति च॥६९॥

69. As a creature conjured up by magic undergoes birth and death, so also do all these creatures appear and disappear.

यथा निर्मितको जीवो जायते म्रियतेऽपि वा। तथा जीवा अमी सर्वे मवन्ति न मवन्ति च॥७०॥

70. As a creature produced through medicines and charms undergoes birth and death, so also do all these creatures appear and disappear.

Māyāmayah means one that is created by a magician; and nirmitakah means created by medicines, charms, etc. As egg-born creatures and others, created in dreams or by magic and incantation, take birth and die, so also do such creatures as human beings who are verily non-existent and are merely imagined on Consciousness. This is the idea.

न कश्चिज्जायते जीवः संमवोऽस्य न विद्यते। एतत्तदुत्तमं सत्यं यत्र किंचिन्न जायते॥७१॥

71. No creature whichsoever has birth, there is no source for it. This is that highest truth where nothing whatsoever is born.

It has been said that birth, death, etc. of creatures within the range of empirical existence are like those of the creatures in dream etc.; but the highest truth is that where no creature undergoes birth. The remaining portion was explained before (Kärikä, III. 48).

चित्तस्पन्दितमेवेदं ग्राह्मग्राहकवद्द्वयम् । चित्तं निर्विषयं नित्यमसङ्गं तेन कीर्तितम् ॥७२॥

72. This duality, possessed of subject and object, is a mere vibration of Consciousness. And Consciousness is objectless; hence It is declared to be eternally without relations.

All dvayam, duality; grāhya-grāhakavat, possessed of subject and object; is cittaspanditam eva, surely a vibration of Consciousness. But from the ultimate standpoint, cittam, Consciousness, is nothing but the Self; and accordingly it is nirvişayam, without objects. Tena, as a consequence of that, because of Its being without objects; It is kīrtitam, declared; to be nityam asangam, ever without relations, as is known from the Vedic text, 'For this infinite being is unattached' (Br. IV. iii. 15-16). Anything that has its objects becomes connected with those objects. As Consciousness is objectless, It is unrelated. This is the purport.

Objection: If the unrelatedness of Consciousness follows from the fact of Its being without objects, then there can be no freedom from relation, since there exist such objects as the teacher, the scripture, and the taught.

Answer: That is no defect.

Objection: Why?

The answer is:

योऽस्ति कल्पितसंवृत्या परमार्थेन नास्त्यसौ । परतन्त्रामिसंवृत्या स्यान्नास्ति परमार्थतः ॥७३॥

73. That which exists because of a fancied empirical outlook, does not do so from the standpoint of absolute Reality. Anything that may exist on the strength of the empirical outlook, engendered by other systems of thought, does not really exist.

An object, a scripture for instance, yak, which; exists kalpitasamortya, because of a fancied empirical outlook (i.e. on the strength of empirical experience) -- it being called so because it is an empirical outlook (samorti) that is imagined (kalpita) as a means for the attainment of the highest object; anything that exists by virtue of this, asau na asti, that has no existence; paramārthena, from the standpoint of the absolute Reality. It was said earlier, 'Duality ceases to exist after realization' (Kārikā, I. 18). And anything that syāt, may exist; paratantrābhisamvrtyā, on the strength of the empirical outlook engendered by other systems of thought; that thing paramarthatah, when considered from the standpoint of the highest Reality; na asti, does not exist, to be sure. Therefore it has been well said, 'Hence it is declared to be without relations' (Kārikā, IV. 72).

Objection: On the assumption that scriptures etc.

[IV.73

thing is birthless will be equally empirical.

Answer: Truly so.

अजः कल्पितसंवृत्या परमार्थेन नाप्यजः। परतन्त्रामिनिष्पत्त्या संवृत्या जायते तु सः॥७४॥

74. Since in accordance with the conclusion arrived at in the scriptures of the other schools, the soul undergoes birth from the empirical point of view, therefore in pursuance of that fancied empirical view (it is said by the non-dualists that) the soul is birthless; but from the standpoint of absolute Reality, it is not even birthless.

Kalpitasamortyā, in accordance with the empirical outlook, fostered with the help of scriptures etc.; the Self is said to be ajah, unborn. But paramārthena, from the standpoint of the highest Reality; na api ajah, It is not even unborn. For what is birthless paratantrābhinispattyā, from the standpoint of the conclusions arrived at by other schools of thought; (is said to be so because) sah, that thing; jāyate, undergoes birth; samortyā, as a matter of empirical experience. Therefore, even the imagination that the Self is birthless does not pertain to the absolutely real Entity. This is the idea.

अमूतामिनिवेशोऽस्ति द्वयं तत्र न विद्यते। द्वयामावं स बुद्ध्वैव निर्निमित्तो न जायते॥७१॥

214

IV. 76]

75. There is in evidence a (mere) craving for false objects, (though) no duality is in existence there. Realizing the non-existence of duality, one becomes free from craving for false things, and one does not undergo birth.

Abhinivešah means mere strong attachment. Since no object exists, therefore there is in evidence a mere persistent infatuation for a non-existent duality. Dvayam na vidyate tatra, duality does not exist there. Since fondness for the unreal is alone the cause of birth, therefore sah, he; na jāyate, does not undergo birth; who buddhvā, having realized; dvayābhāvam, the nonexistence of duality; has become nirnimittah, free from cause, divested of the craving for the unreal duality.

यदा न लमते हेतूनुत्तमाधममध्यमान् । तदा न जायते चित्तं हेत्वमावे फलं कुतः ॥७६॥

76. When one does not perceive the superior, medium, and inferior causes, then Consciousness ceases to have births. For how can there be any result when there is no cause?

The highest causes are those duties which are enjoined in relation to castes and stages of life, which are performed by people free from hankering for results, which lead to the attainment of the states of gods and others, and which are purely virtuous. Those that are mixed with irreligious practices and lead to birth among men etc., are the middling ones. And the inferior causes are those particular tendencies that are known as irreligious and lead to birth among animals etc.. Yadā, when, after the realization of the reality of the Self which is one without a second and free from all imagination; one na labhate, does not perceive; all those causes — superior, intermediate, or inferior — that are fancied through ignorance, just as the dirt seen in the sky by children is not perceived there by a discriminating man; tadā, then; cittam, Consciousness; na jāyate, is not born, in the shape of gods and others that constitute the superior, medium, and inferior results. For when there is no cause, no effect can be produced just as no corn will grow unless there are seeds.

It has been firmly asserted that Consciousness has no birth in the absence of causes. Now is being stated in what, again, that birthlessness of Consciousness consists:

अनिमित्तस्य चित्तस्य याऽनुत्पत्तिः समाऽद्वया। अजातस्यैव सर्वस्य चित्तवृत्र्यं हि तद्यतः ॥७७॥

77. The birthlessness that Consciousness attains when freed from causes is constant and absolute; for all this (viz duality and birth) was perceptible to Consciousness that had been birthless and non-dual (even before).

Anutpattin, the birthlessness, called Liberation, which comes; cittasya animittasya, to Consciousness that is causeless, that has become free from all the causes of birth called virtue and vice, as a consequence of IV. 78]

the realization of the ultimate Truth — the birthlessness that is of this kind is for ever and under all circumstances samā, constant, without any distinction; and advayā, absolute. And this state ajātasya, belongs to the birthless, to Consciousness that had been birthless even before; (it belongs) sarvasya, (to Consciousness) that had been all, that is to say, to the non-dual Consciousness. Since even before the rise of knowledge, tat, all that — viz duality and birth; was cittadrfsyam, an object of perception to Consciousness; therefore the causelessness of the unborn non-dual Consciousness is ever the same and absolute, not that sometimes it is subject to birth and sometimes not. It is ever of the same nature. This is the meaning.

बुद्ध्वाऽनिमित्ततां सत्यां हेतुं पृथगनाप्नुयन् । वीतशोकं तथाऽकाममभयं पदमश्नुते ।।७८।।

78. After realizing causelessness as the truth, and not accepting any separate cause, one attains the state of fearlessness that is free from sorrow and devoid of desire.

Since duality, the cause of birth, does not exist in accordance with the reasons adduced, one asnute, attains; the abhayam padam, state of fearlessness, which is free from desire; sorrow, etc. and is without ignorance etc.; that is to say, one is never reborn, buddhvā, after having realized; animittatām satyām, causelessness as the truth, of the highest order; and anāpnuvan, (after) not getting, that is to say, not accepting; any prthak, separate; hetum, cause, such as virtue etc., which may lead to birth among the gods and others — (that is to say), after having renounced the desire for all external things.

अभूताभिनिवेशाद्धि सदृशे तत्प्रवर्तते । वस्त्वभावं स बुद्ध्वैव निःसङ्गं विनिवर्तते ॥७१॥

79. Since owing to a belief in the existence of unrealities, Consciousness engages Itself in things that are equally so (i.e. unreal), therefore when one has the realization of the absence of objects, Consciousness becomes unattached and turns back.

Abhūtābhinivešaḥ consists in a conviction that duality does exist, even though there is no such thing. Since from this infatuation, which is a kind of delusion created by ignorance, tat, that Consciousness, which imitates the unreal; pravartate, engages; sadrše, in a similar thing; therefore when saḥ, anyone; realizes the non-existence of objects within duality, his Consciousness becomes niḥsaṅgam, unattached to it; and It vinivartate, turns back, from the objects that are the contents of the belief in the unreal.

निवृत्तस्याप्रवृत्तस्य निक्चला हि तदा स्थितिः । विषयः स हि बुद्धानां तत्साम्यमजमद्वयम् ॥८०॥

80. For then, to the Consciousness which has got detached and does not engage (in duality), there follows the state of inactivity. Since that is the object realized by the wise, therefore that is the real equipoise, and that is birthless and non-dual. Of the Consciousness *ningtlasya*, that has desisted, from objects of duality; and *aprantlasya*, does not engage in any other object because of the realization of the absence of any such thing; there follows *niscalā sthitiķ*, a state of motionlessness, which is the very nature of Brahman. *Hi*, since; *saķ viṣayaķ*, that is the object of vision — this state of continuance of knowledge as Brahman that is a non-dual mass of homogeneous Consciousness; *buddhānām*, to the wise, who realize the supreme Reality; therefore, *tat*, that state; is the highest *sāmyam*, equipoise, without any differentiation; and it is also *ajam advayam*, birthless and nondual.

It is again being shown what is the nature of the object of vision of the wise:

अजमनिद्रमस्वप्नं प्रभातं मंबति स्वयम् । सक्वद्विमातो ह्येवैष धर्मो धातुस्वभावतः ॥८१॥

81. This becomes birthless, sleepless, dreamless, and self-luminous. For this Entity is ever effulgent by Its very nature.

That becomes prabhātam svayam, fully illuminated by Itself, and It does not depend on the sun etc.; in other words, It is by nature self-effulgent. *Esah*, this; *dharmaḥ*, entity, called the Self, that is possessed of such characteristics; is sak₁t-vibhātaḥ, always shining, that is to say, ever effulgent; *dhātusvabhāvataḥ*, by the very nature of the thing (that is the Self). It is being shown why this supreme Reality, though spoken of thus, is not grasped by ordinary people:

मुखमाव्रियते नित्यं दुःखं विव्रियते सदा। यस्य कस्य च धर्मस्य ग्रहेण मगवानसौ ॥८२॥

82. Because of the passion for any object, whatever it be, that Lord becomes ever covered up easily, and He is at all times uncovered with difficulty.

Since asau bhagavān, that Lord, the non-dual Self, that is to say, the Deity; sukham āvriyate, is easily covered; graheņa yasya kasya ca dharmasya, by the eagerness to grasp, because of the false belief in the reality of an object, whatever it be, that lies within duality for the covering follows from the perception of duality, and it does not require any additional effort; and since It is vivriyate, uncovered, revealed; duhkham, with difficulty, the knowledge of the supreme Reality being a rarity; therefore It is not easy to be understood, even though spoken of by the Upanişads and the teachers in various ways, as is pointed out by the Vedic text, 'the teacher is wonderful, and the receiver is wonderful' (Ka. I. ii. 7).

When the passionate attachment of the learned to even such subtle ideas as the existence of the Self or Its non-existence becomes a covering of the Lord, the supreme Self, what wonder is there that the passion in the shape of the intellectual preoccupation of the dull should be much more so? The next verse goes on to show this:

अस्ति नास्त्यस्ति नास्तीति नास्ति नास्तीति वा पुनः। चलस्थिरोभयाभावैरावृणोत्येव बालिज्ञः ॥८३॥

83. By asserting that the Sclf 'exists', 'does not exist', 'exists and does not exist', or again, 'does not exist, does not exist', the non-discriminating man does certainly cover It up through ideas of changeability, unchangeability, both changeability and unchangeability, and non-existence.

Some disputant accepts the idea that the Self asti, exists. Another, viz the believer in momentariness of things, avers na asti, It does not exist. Another halfbeliever in momentariness, the naked one (i.e. Jaina) who speaks of both existence and non-existence, asserts, asti na asti, It exists and does not exist. The absolute nihilist says, na asti, na asti, It does not exist, It does not exist. Of these states, that of existence is calah, changeable, it being different from such impermanent things as a jar;¹ and the state of non-existence is sthirah, changeless, it being ever constant.² The state of both existence and non-existence is ubhayam, of either kind, since it relates to both the changeable and the changeless.³ And abhāvah relates to an absolute

¹ An object of perception is inconstant; the perceiving soul is different from it and reacts to it diversely, being, according to Nyāya-Vaišesika, sometimes happy and sometimes sorry with regard to the same object.

² According to those who deny the existence of a perceiver apart from the intellect etc., the denial remains constant, for nonexistence is changeless.

³ The view of the Jainas.

non-existence.¹ Bālišaļi means a fool, a non-discriminating man. Each one of the fools, whether calling the Self existing or not, eva, surely; āvṛṇoti, covers up, the Lord; calasthira-ubhaya-abhāvaiḥ, by ideas of changeability, unchangeability, both changeability and unchangeability, and non-existence — which all belong to the four alternatives. The idea implied is that when even a learned man who has not realized the supreme Truth is but a fool, nothing need be spoken of one who is naturally stupid.

Of what nature, then, is the supreme Reality, by knowing which one gets rid of stupidity and becomes enlightened? The answer is:

कोटचरुचतस्र एतास्तु ग्रहैर्यासां सवाऽऽवृतः । भगवानाभिरस्पृष्टो येन दृष्टः स सर्वदृक् ॥८४॥

84. These are the four alternative theories, through a passion for which the Lord remains ever hidden. He who sees the Lord as untouched by these is omniscient.

Etāh catasrah kotyah, these are the four alternative theories, viz 'It exists', 'It does not exist', and so on, which have been already mentioned and which are the conclusions arrived at by the scriptures of the dogmatic disputants; grahaih yāsām, through the acceptance, through the conviction arising from the

¹ The view of the nihilistic Buddhists.

realization, of which alternatives; *bhagavān*, the Lord; remains *sadā āvŗtaḥ*, ever covered, to those sophists alone. *Saḥ*, he, the reflective sage; *yena*, by whom; *dṛṣṭaḥ*, has been realized; that Lord who, though remaining covered to the sophists, is really *aspṛṣṭaḥ ābhiḥ*, untouched by these – these four alternative theories of existence, non-existence, etc.; he who has realized the all-pervasive Being found and presented in the Upanişads alone, *saḥ*, that sage; is *sarvadṛk*, omniscient; or to put it otherwise, he is the truly enlightened man.

प्राप्य सर्वज्ञतां क्रुत्स्नां ब्राह्मण्यं पदमद्वयम् । अनापन्नादिमध्यान्तं किमतः परमीहते ॥८४॥

85. Does one make any effort after having attained omniscience in its fullness and having reached the non-dual state of Brähmanahood, which has no beginning, middle, and end?

Prāpya, having attained; sarvajnatām krtsnām, omniscience in its fullness; and having reached the brāhmanyam padam, state of Brāhmaņahood, as indicated in the Vedic texts, 'He (who departs from this world after knowing this immutable Brahman) is a Brāhmaņa (i.e. a knower of Brahman)' (Br. III. viii. 10). 'This is the eternal glory of a Brāhmaņa (i.e. a knower of Brahman): (it neither increases nor decreases through work)' (Br. IV. iv. 23); which non-dual state of Brāhmaņahood, anāpannādimadhyāntam, has no beginning, middle, and end — that is to say, is devoid of origin, continuance, and dissolution; kim īhate, does one make any effort; *atah param*, after this, after this attainment of the Self? The idea is that any effort becomes useless — in accordance with the Smru text, 'He has no end to achieve here either through activity or through inactivity' (G. III. 18).

विप्राणां विनयो ह्येष शमः प्राकृत उच्यते। दमः प्रकृतिदान्तत्वादेवं विद्वाञ्ञामं वजेत ॥८६॥

86. This is the modesty of the Brähmanas, this is called their natural tranquillity, and this is their natural self-restraint resulting from spontaneous poise. Having known thus, one gets established in tranquillity.

This continuance in the state of identity with the Self is the natural vinayah, modesty; viprāņām, of the Brāhmaņas. This is their humility, and this is also ucyate, called; their prākrtah śamah, natural mental tranquillity. Damah, self-restraint, too. is this only; prakrtidāntatvāt, because of (their) spontaneous poise, and because Brahman, too, is by nature quiescent. Evam vidvān, having known thus, having known the aforesaid Brahman as naturally tranquil; vrajet, one should attain; śamam, tranquillity, which is spontaneous and which is the very nature of Brahman that is to say one remains established in identification with Brahman.

Thus since the philosophies of the sophists are at conflict with one another they lead to the worldly state, and they are the hot-houses for such drawbacks

IV. 87] ALĀTAŠĀNTI-PRAKARAŅA

as attraction and repulsion. Accordingly, they are false philosophies. After having proved this fact by their own logic, the conclusion arrived at was that, being free from all the four alternatives, the most perfect philosophy is the naturally tranquil philosophy of non-duality which does not engender such faults as attachment etc. Now the following text starts to show our own process of arriving at truth:

सवस्तु सोपलम्मं च द्वयं लौकिकमिष्यते। अवस्तु सोपलम्मं च क्युद्धं लौकिकमिष्यते॥८७॥

87. The ordinary (waking) state is admitted to be that duality, co-existing with things of empirical reality and fit to be experienced. The objectless ordinary (dream) state is admitted to be without any object and yet as though full of experience.

Savastu, empirical existence, is that which co-exists with an empirically real thing; similarly sopalambham is that which co-exists with experience. That is dvayam, duality, that is the source of all behaviour, scriptural and other, and that is characterized by the subjectobject relationship. It is laukikam, the ordinary state, or in other words, the state of waking. In the Upanişads, the waking state is *isyale*, admitted, to be of such characteristics. That which is avastu, unsubstantial, there being an absence of empirical existence as well; which is sopalambham, associated with experience of things, as it were, though in fact there are no objects that is *isyale*, admitted in the dream state; to be *suddham*, pure, objectless, subtler¹ than the gross objects of the waking state; and it is *laukikam*, ordinary, being common to all beings.

अवस्त्वनुपलम्भं च लोकोत्तरमिति स्मृतम् । ज्ञानं ज्ञेयं च विज्ञेयं सदा बुद्धैः प्रकीर्तितम् ॥८८॥

88. It is traditionally held that the extraordinary is without content and without experience. Knowledge, object, and the realizable thing are for ever declared by the wise.

That which is avastu, unsubstantial; ca, and; anupalambham, without experience, or in other words, that which is devoid of object and perception; is smptam, traditionally held to be; lokottaram, beyond the ordinary, and therefore, since it is devoid of those (objects and perception), it is super-normal; for the ordinary consists of objects and perception. The idea is that the state of deep sleep is the seed of all activity. That (mental state) is called *manam*, knowledge, by which is known in succession the supreme Reality together with Its means (of realization), the ordinary, the objectless ordinary, and the extraordinary. The jneyam, object of knowledge, is comprised of all these three states, for logically there is no object (of knowledge) over and above these, the objects fancied by all the sophists being verily included in them. Vineyam. the object of realization, is the supreme Reality which

226

¹ Another reading is 'pravibhaktam, different from'.

IV. 89]

is called the Fourth, that is to say, the non-dual and birthless Reality that is the Self. All this, ranging from the ordinary to the realizable thing, *prakīrtitam*, is declared; *sadā*, for ever; *buddhaiḥ*, by the wise, by the seers of the *summum bonum*, by the knowers of Brahman.

ज्ञाने च त्रिविधे ज्ञेये ऋमेण विदिते स्वयम्। सर्वज्ञता हि सर्वत्र मवतीह महाधियः ॥८१॥

89. When after the acquisition of the knowledge (of the threefold object) and the knowledge of the objects in succession, the supreme Reality becomes self-revealed, then there emerges here, for the man of supreme intellect, the state of being All and enlightened for ever.

 $J\bar{n}ane$ (vidite), when (after) knowledge — knowledge of the ordinary etc. — is acquired; and j $\bar{n}eye$ trividhe krameņa (vidite), when (after) the knowable things of three kinds are known in succession — viz first the gross ordinary, then when these are not present, the objectless ordinary, and in the absence of that again, the extraordinary; and then, when the three states are eliminated and the supreme Reality, the Fourth, the non-dual, birthless, and fearless vidite, has become known; svayam, of Its own accord; then mahādhiyah, for the man of great intellect, for such a knower; bhavati, there emerges; iha, here, in this world; sarvajnata, the state of being All and enlightened; sarvatra, for ever, since his realization relates to what transcends the whole universe; that is to say, if one's true nature is realized once, it never leaves him. For unlike the knowledge of the sophists, there is no rise or decline of the knowledge of a man who has realized the highest Truth.

From the fact that the ordinary state etc. have been presented as objects to be known successively, some one may conclude that they have real existence. Hence it is said:

हेयज्ञेयाप्यपाक्यानि विज्ञेयान्यप्रयाणतः । तेषामन्यत्र विज्ञेयादुपऌम्भस्त्रिषु स्मृतः ॥६०॥

90. Things to be rejected, realized, accepted, and made ineffective are to be known at the very beginning. From among them, the three, excepting the realizable, are traditionally held to be only fancies resulting from ignorance.

The heya, rejectable, are the three states counting from the ordinary. That is to say, just like the denial of an illusory snake on the rope, waking, dream, and sound sleep are to be denied as having any existence in the Self. The *jñeya*, thing to be known (realized), in this context, is the supreme Reality, free from the four alternatives (*Kārikā*, IV. 83). The *āpya*, acceptable, are the disciplines, called scholarship, the strength arising from knowledge, and meditativeness,¹ that

¹ Br. III. v. 1: 'Therefore the knower of Brahman, having known all about scholarship, should try to live upon the strength which comes of knowledge; having known all about this strength as well as scholarship, he becomes meditative.'

IV. 91]

are to be accepted by the monk after discarding the three kinds of desire (for progeny, property, and worlds). Pākyāni, those that are fit to be rendered ineffective-the blemishes, viz attraction, repulsion, delusion, etc., called passions (kāsāyas). All these, viz those that are to be rejected, known, accepted, and rendered ineffective, are to be vijneyani, known well, by the monk; agrayāņatah, in the beginning as (his) means. Tesam, among those, among the things to be rejected etc.; smrtah, it is held traditionally, by the knowers of Brahman; that vijneyāt anyatra, apart from Brahman alone which is to be realized, which is the ultimate Reality; there is upalambhah, a mere imagination of perception, owing to ignorance, with regard to all the three - the rejectable, the acceptable, and the fit to be made ineffective. The idea is that those three are not admitted to be true from the highest standpoint.

But from the ultimate standpoint:

प्रकृत्याऽऽकाशवज्ज्ञेयाः सर्वे धर्मा अनादयः। विद्यते न हि नानात्वं तेषां क्वचन किंचन॥६१॥

91. All the souls should be known as naturally analogous to space and as eternal. There is no plurality among them anywhere, even by a jot or tittle.

Sarve dharmāh, all the souls; *jneyāh*, are to be known, by those who hanker after liberation; to be *prakrtyā*, by nature; *ākāšavat*, analogous to space, in point of subtleness, freedom from taints, and allpervasiveness; and (to be) *anādayah*, eternal. Lest any misconception of diversity be created by the use of the plural number, the text says by way of rebutting it: *nānātvam*, plurality; *na vidyate*, does not exist; *teşām*, among them; *kvacana*, anywhere; *kim cana*, even by a jot or tittle.

As for the souls being objects of cognition, that, too, is merely from empirical experience but not in Reality. This is being stated:

आदिबुद्धाः प्रकृत्यैव सर्वे धर्माः सुनिध्चिताः । यस्यैवं भवति क्षान्तिः सोऽमृतत्वाय कल्पते ॥१२॥

92. All the souls are, by their very nature, illumined from the very beginning, and their characteristics are well determined. He, to whom ensues in this way the freedom from the need of any further acquisition of knowledge, becomes fit for immortality.

Since just like the ever effulgent sun, sarve dharmāḥ, all the souls; are prakrtyā eva, by their very nature; ādibuddhāḥ, illumined from the very beginning; that is to say, as the sun is ever shining, so are they ever of the nature of Consciousness, (therefore) there is no need for ascertaining their character; or in other words, their nature is ever well established, and it is not subject to such doubts as to 'whether it is so or not so'. As the sun is ever independent of any other light, for its own sake or for any other, so yasya, he, for whom, for which seeker after Liberation; bhavati, there occurs, in his own soul; kṣāntiḥ, eternal freedom from any need of further acquisition of knowledgeIV. 93]

either for himself or for others; evam, thus, in the way described above; sah, that man; kalpate, becomes fit; amrtatvāya, for immortality; that is to say, he becomes able to attain Liberation.

Similarly, there is no need for bringing about tranquillity in the Self. This is being pointed out:

आदिशान्ता ह्यनुत्पन्नाः प्रकृत्यैव सुनिर्वृताः। सर्वे धर्माः समामिन्नाः अजं साम्यं विशारदम् ॥१३॥

93. Since the souls are, from the very beginning tranquil, unborn, and by their very nature completely unattached, equal, and non-different, and since Reality is (thus) birthless, uniform, and holy, (therefore there is no need for any acquisition etc.).

Since sarve dharmāh, all the souls; are ādišāntāh, tranquil from the beginning, always peaceful; and anutpannāh, birthless; prakŗtyā eva suniroytāh, completely detached, by their very nature; sama-abhinnāh, equal and non-different; and since the reality of the Self is ajam, birthless; sāmyam, equipoised (uniform); višāradam, holy; therefore there is no such thing as peace or Liberation that has to be brought about. This is the idea. For anything done can have no meaning for one that is ever of the same nature.

Those who have grasped the ultimate Truth, as described, are the only people in the world who are not pitiable; but the others are to be pitied. This is being stated:

[IV. 94

वैशारद्यं तु वै नास्ति भेदे विचरतां सदा। भेदनिम्नाः पृथग्वादास्तस्मात्ते कृपणाः स्मृताः ॥१४॥

94. There can be no perfection for people who have proclivity for multiplicity, tread for ever the path of duality, and talk of plurality. Hence they are traditionally held to be pitiable.

Since they are bhedanimnāh, have a proclivity for duality, follow duality, that is to say, confine themselves to the world—who are they? Prthagvādāh, those who talk of multiplicity of things, or in other words, the dualists—tasmāt, therefore; they are smptāh, traditionally held to be; kpanāh, pitiable. For, na asti, there is no; vaisāradyam, perfection; teṣām sadā vicaratām bhede, for those who are ever roaming about in duality, that is to say, for those who ever persist in the path of duality conjured up by ignorance. Consequentlý, it is proper that they should be objects of pity. This is the purport.

The next verse says that this nature of the supreme Truth is beyond the ken of those who have not the requisite expansion of heart, who are not learned, who are outside the pale of Vedānta, who are narrowminded, and who are dull of intellect.

अजे साम्ये तु ये केचिद्भविष्यन्ति सुनिध्चिताः। ते हि लोके महाज्ञानास्तच्च लोको न गाहते॥ ६५॥

95. They alone will be possessed of unsurpassable knowledge in this world, who will be firm in their

IV. 96]

conviction with regard to That which is birthless and uniform. But the ordinary man cannot grasp That (Reality).

Ye kecit, those -- even women and others, who perchance; bhavisyanti, will become; suniscitah, firm in conviction, that 'This is so indeed'; with regard to the nature of the ultimate Reality, aje sāmye, which is birthless and uniform; te hi loke mahājnānāh, they alone in this world are possessed of great wisdom, or in other words, endowed with unsurpassing knowledge about the Reality. Ca na lokah, and nobody, no other man of ordinary intellect; gahate, can dip into, that is to say, grasp; tat, that thing, viz their path, the content of their knowledge-the nature of the ultimate Reality. For it is stated in the Smrti, 'As it is not possible to sketch the flight of birds in the sky, so even the gods get puzzled in trying to trace the course of one who has become identified with the Self of all beings, who is a source of bliss to all, and who has no goal to reach' (Mbh. Sā. 239. 23-24).

The next verse says in what their great knowledge consists:

अजेष्वजमसंक्रान्तं धर्मेषु ज्ञानमिष्यते । यतो न क्रमते ज्ञानमसङ्गं तेन कीर्तितम् ।।९६॥

96. It is traditionally held that the knowledge inhering in the birthless souls is unborn and nonrelational. Since the knowledge has no objective relation, it is said to be unattached. Since isyate, it is traditionally held; that the *jnānam*, knowledge; ajeşu dharmeşu, inhering in the birthless, steady, souls; is ajam, birthless, steady—like light and heat in the sun; therefore that knowledge which is asamkrāntam, unassociated with any other object; ajam isyate, is said to be unborn. *Tatah*, since; *jnānam*, the knowledge; na kramate, does not relate, to any other object; tena, because of that reason; it is kīrtitam asangam, proclaimed to be non-relational like space.

अणुमात्रेऽपि वैधर्म्ये जायमानेऽविपव्चितः । असङ्गता सदा नास्ति किमुतावरणच्युतिः ।।१७।।

97. Should there occur any change for anything, however slight it may be, there can never be any nonattachment for the non-discriminating man;¹ what need one speak of the destruction of covering for him?

If, in accordance with the schools of disputants which differ from this, *jāyamāne vaidharmye aņumātre api*, it be admitted that there is origination of any object of a different nature, inside or outside, however insignificant that origination be; then *na asti sadā*, there can never be; any *asangatā*, non-attachment; *avipascitah*, for that non-discriminating man. Kim uta, what need one say that there is no; *āvaraņacyutih*, destruction of covering?

Objection: By asserting that there is no removal of covering, you lay yourself open to the charge of accept-

¹ For the slightest idea of origination carries with it the idea of the subject-object relation, i.e. duality.

IV. 99]

ing a covering for the souls as your own conclusion. To this it is answered, 'No'.

अलब्धावरणाः सर्वे धर्माः प्रकृतिनिर्मलाः । आदौ बुद्धास्तथा मुक्ता बुध्यन्त इति नायकाः ।।१८।।

98. No soul ever came under any veil. They are by nature pure as well as illumined and free from the very beginning. Thus being endowed with the power (of knowledge), they are said to know.

(Sarve) dharmāh, (all) the souls; alabdhāvaraņāh, never had any veil, any bondage of ignorance etc., that is to say, they are free from bondage; and they are prakrtinirmalāh, intrinsically pure; buddhāh tathā muktāh, illumined and also free; ādau, from the beginning, since they are by nature ever pure, illumined, and free. If they are so, why is it said that they budhyante, know? The answer is: They are nāyakāh, masters, have the power, of learning; that is to say, they are by nature endowed with the power of knowledge. This is just like saying, 'The sun shines', though the very nature of the sun is constant effulgence; or like saying, 'The hills stand', though it is the very nature of the hills to be perpetually motionless.

ऋमते न हि बुद्धस्य ज्ञानं धर्मेषु तायिनः। सर्वे धर्मास्तथा ज्ञानं नैतद्बुद्धेन भाषितम् ॥ १९॥

99. The knowledge of the enlightened man, who is all-pervasive, does not extend to objects; all the souls, also, like knowledge (do not reach out to objects). This view was not expressed by Buddha.

Hi, since; jñānam, the knowledge; buddhasya, of the enlightened one who has realized the ultimate Reality; tāyinah, of the all-pervading one, of the one who has no interstices like space, or of the one who is either adorable or enlightened; na kramate, does not extend to; other dharmeşu, objects; that is to say, his knowledge is ever centred in (or identified with) the soul, like light in the sun; tathā, similarly, like knowledge itself; sarve dharmah, all the souls also; do not extend to other things whatsoever, the souls being analogous to (the all-pervasive) space. This is the meaning. The knowledge that was introduced in, 'through his knowledge that is comparable to space' (Kārikā, IV. 1), is this knowledge that is analogous to space, that does not reach out to other things, and that belongs to the enlightened one who is all-pervasive by virtue of his identity with knowledge itself. So also are the souls. Hence they are the reality that is the Self, Brahman, which like space is unchanging, immutable, partless, eternal, non-dual, unattached, invisible, unthinkable, beyond hunger etc., as is said in the Vedic text, 'for the vision of the witness can never be lost' (Br. IV. iii. 23). That the nature of the supreme Reality is free from the differences of knowledge, known, and knower, and is without a second, etat, this fact; na bhāsitam, was not expressed; buddhena, by Buddha; though a near approach to non-dualism was implied in his negation of outer objects and his imagination of everything as mere consciousness. But this non-duality, the

essence of the ultimate Reality, is to be known from the Upanisads only. This is the purport.

At the end of the treatise a salutation is uttered in praise of the knowledge of the supreme Reality:

दुर्वर्शमतिगम्मीरमजं साम्यं विशारदम् । बुद्ध्वा पदमनानात्वं नमस्कुर्मो यथाबलम् ॥१००॥

100. After realizing that State of non-duality which is inscrutable, very profound, birthless, uniform, and holy, we make our obeisance to It to the best of our ability.

Durdaršam, that which can be seen with difficulty, that is to say, inscrutable, It being devoid of the four alternatives of existence, non-existence, etc. (Kārikā, IV. 83); and hence atigambhīram, very profound, unfathomable like an ocean — to the people lacking in discrimination. Ajam, birthless; sāmyam, uniform; višāradam, holy. Buddhvā, having realized, having become identified with; such a padam, State; which is anānātvam, non-duality; namaskurmah, we make our obeisance, to that State; yathābalam, to the best of our ability, by bringing It within the range of empirical dealings, though It defies all relative experience. This is the idea.

अजमपि जनियोगं प्रापदैक्वर्ययोगा-दगति च गतिमन्तां प्रापदेकं ह्यनेकम् । विविधविषयधर्मग्राहिमुग्धेक्षणानां प्रणतभयविहंतृ ब्रह्म यत्तन्नतोऽस्मि ।।१।।

Salutation by the commentator:

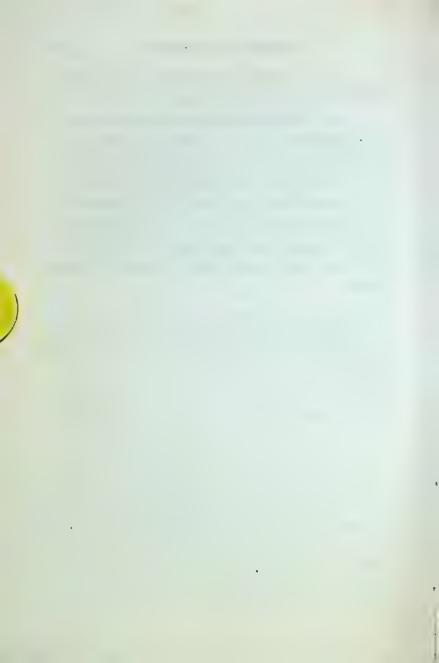

1. I bow down to that Brahman which, though birthless, appears to be born through Its inscrutable power; which, though ever quiescent, appears to be in motion; which, though one, appears to be multiple to those whose vision has become perverted by the perception of diverse attributes of objects; and which destroys the fear of those who take shelter in It.

2. I salute by prostrating myself at the feet of that teacher of my teacher,¹ the most adorable among the adorable, who, on seeing the creatures drowned in the terrible sea (of the world) infested with sea-monsters in the form of repeated births, extricated, out of compassion for all beings, this nectar, which is difficult to be obtained even by gods and which lies in the depths of the ocean called the Vedas, which (Vedas)

¹ Gaudapāda, the teacher of Govindapāda who taught Śankara.

stirred up by inserting the churning rod of his illumined intellect.

3. I offer my obeisance with my whole being to those sanctifying feet—the dispellers of the fear of transmigration — (the feet) of my own teacher, through the light of whose illumined intellect was dispelled the darkness of delusion enveloping my own mind, who destroyed for ever my fear of appearance and disappearance in this terrible sea of innumerable births, and having taken shelter at whose feet others also get unfailingly the knowledge of the Upanişads, self-control, and humility, which is fruitful and most worthy.
